

54826

TURBO PRESSURE TESTING SET

TECHNICAL SPECIFICATIONS

Pieces	17
Adapters	38/31, 46/51, 55/60, 65/70, 75/80, 85/90, 95/100, 105/110mm
Maximum pressure	80PSI
Weight	7,00Kg
Dimensions (LxWxH)	580x480x130mm

54826**TURBO PRESSURE TESTING SET****SUMMARY**

Ideal for mechanical workshops, automotive technicians, and engine enthusiasts who wish to perform preventive maintenance and accurate diagnostics of the turbocharging system. Designed to check for leaks, pressure, and sealing in intake and turbo systems, this set ensures optimal engine performance and prevents costly failures.

Main features:

- Pressure range: 0 – 80 PSI, ideal for most turbocharger systems.
- Universal application: Compatible with a wide range of vehicles and intake pipe sizes.
- Included sizes: 38/31 mm, 46/51 mm, 55/60 mm, 65/70 mm, 75/80 mm, 85/90 mm, 95/100 mm, 105/110 mm.
- High-strength materials: Made of durable aluminum and rubber, resistant to pressure and engine chemicals.
- Precision gauge: Clear-reading manometer for accurate pressure monitoring during testing.
- Easy to use: Detects leaks in intercoolers, hoses, connections, and turbo system valves.
