PLAY DETECTOR WITH MOVING PLATFORM

TECHNICAL SPECIFICATIONS

Pieces	1
Maximum tire width	330mm
Maximum load	800Kg
Platform dimensions	450x400mm
Weight	23,71Kg
Dimensions (LxWxH)	550x550x630mm

SUMMARY

Easily and quickly diagnose suspension and steering systems in passenger cars and light commercial vehicles. Its articulated platform allows movement in multiple directions to detect play in ball joints and bushings without lifting the vehicle.

- Suitable for cars with a maximum tyre width of up to 330mm.
- Maximum load: 800Kg.
