50T AIR/HYDRAULIC PRESS

TECHNICAL SPECIFICATIONS

Capacity	50T
Piston stroke	200mm
Working range	85-985mm
Includes	Pantalla protectora/Protect screen
Operated	Manual,neumática
Weight	247,00Kg
Dimensions (LxWxH)	1330x850x1740mm

SUMMARY

Designed for industrial applications requiring high pressure capacity with precision and efficiency. Its hydro-pneumatic system combines hydraulic power with the speed of compressed air, enabling pressing, assembly and straightening tasks with less effort and greater control.

Specifications:

- Air inlet connection: 1/4" NPT plug
- Air pressure: 0.75 – 0.85 MPa
