5 T HYDRAULIC TROLLEY JACK

TECHNICAL SPECIFICATIONS

Capacity	5T
Minimum height	150mm
Maximum height	685mm
Weight	89,00Kg

SUMMARY

Essential tool for automotive maintenance in workshops, garages and repair facilities. Designed with a lifting capacity of up to 5 tonnes, it is suitable for most passenger cars, light commercial vehicles and medium-duty commercial vehicles. Its hydraulic system ensures safe, stable and efficient lifting. Once the vehicle has been raised, it must always be supported with suitable jack stands before working underneath, as the hydraulic jack is intended solely for lifting and must never be used as a permanent support.
