

AsynRaomCoop

Automatic Chicken Coop Door - Quick User Manual

Read this guide before installation.

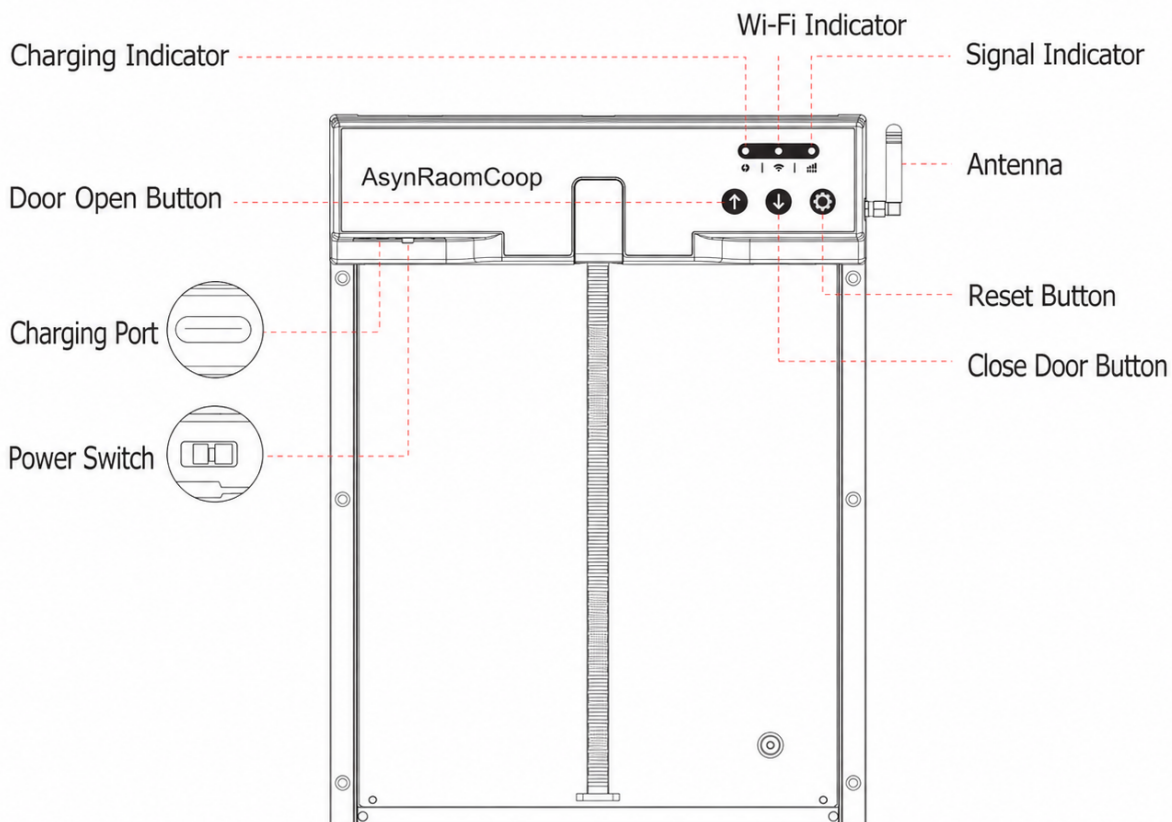

This compact manual covers package contents, first power-on checks, app download, device binding, and basic app control.

1. Package Contents

Main coop door unit	1 m Type-C 9V/1A power adapter	7W solar panel
8 mounting screws	Antenna	1 m data cable
User manual		

If any item is missing or the packaging has obvious damage, keep the package and contact customer support before installation.

2. Device Overview

3. Buttons and Indicators

Part	What it does
Power Switch	Turns the main unit on or off. Move the switch to the right to power on.
Charging Port	Connect the supplied Type-C adapter or supported charging cable.
Charging Indicator	Shows charging status when power is connected.
Door Open Button	Manual open button on the device. Use this for the first function test.
Close Door Button	Manual close button on the device. Use this for the first function test.
Reset / Gear Button	Long press until the blue LED flashes quickly to start app binding.
Wi-Fi Indicator	Shows Wi-Fi pairing or connection status.
Signal Indicator	Shows wireless signal status.

4. First Power-On Check

- 1 Inspect the outer package and the main unit for damage, cracks, loose parts, or obvious defects.
- 2 Confirm that all package contents are included.
- 3 Take out the main unit and move the **Power Switch** to the right.
- 4 Check whether the LED indicators turn on. If no light appears, charge the unit with the supplied adapter before use.
- 5 After the unit has power, press the **Door Open Button** to confirm that the door opens smoothly.
- 6 Press the **Close Door Button** to confirm that the door closes smoothly.
- 7 If both manual tests work correctly, continue to app download and device binding.

Important: Do not install the door until the open and close test passes. If the door does not move normally, charge it fully and test again before mounting.

5. Download the App

The AsynRaomCoop door works with the JJ Chicken app. On iOS, the App Store page may display the name **JJJ Chicken**; it is the same app for this door.

iOS

Download from the U.S. Apple App Store. The app page may show the name **JJJ Chicken**.

App Store

<https://apps.apple.com/us/app/jjj-chicken/id6743930858>

Android

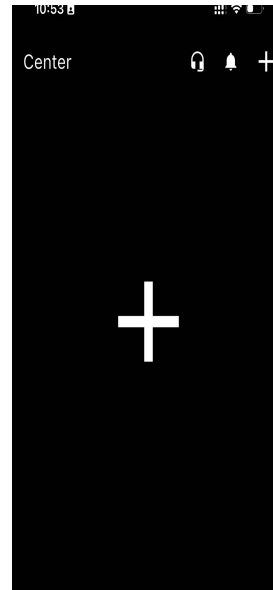

Download **JJ Chicken** from Google Play.

Google Play

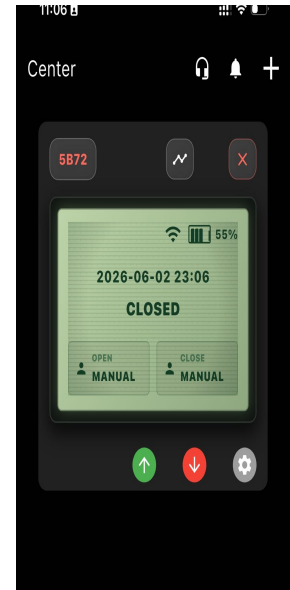

<https://play.google.com/store/apps/details?id=com.jj.jjchicken&pli=1>

6. Bind the Door to Your Phone

- 1 Open the **JJ Chicken** app and register with an email address, or sign in with an available third-party login option.
- 2 After login, enter the home page. Make sure the phone has Bluetooth enabled and is close to the coop door.
- 3 On the coop door, long press the **Reset / Gear Button** until the blue LED flashes quickly.
- 4 On the app home page, tap the **plus (+)** button to start adding a device.
- 5 Follow the app prompts. Allow Bluetooth and location permissions if requested by your phone.
- 6 Select the detected coop door device, then enter your Wi-Fi name and password when prompted.
- 7 Wait while the app sends the Wi-Fi information to the door. Keep the phone near the door during this step.
- 8 Name your coop door. When binding succeeds, a device card appears on the home page.

Home page
Tap the plus button to add a door.

Device card
Use open, close, and settings controls after binding.

Wi-Fi tip: Use a 2.4 GHz Wi-Fi network during binding if your router provides separate 2.4 GHz and 5 GHz network names.

7. Test App Control

- 1 On the device card, tap the **green open button** and confirm the door opens.
- 2 Tap the **red close button** and confirm the door closes.
- 3 Tap the **gear button** on the app card to set the open timer and close timer.
- 4 After setting timers, confirm the door status on the device card and check that the door moves freely.

8. Daily Use

Part	What it does
Open from app	Tap the green open button on the device card.
Close from app	Tap the red close button on the device card.
Set timers	Tap the gear button, then set the open time and close time.
Manual operation	Use the physical open and close buttons on the main unit when needed.
Charging	Use the supplied adapter if the unit is low on power or the LED does not light after power-on.

9. If Binding Does Not Work

- Make sure the main unit is powered on and charged.
- Long press the Reset / Gear Button again until the blue LED flashes quickly.
- Keep your phone close to the coop door during binding.
- Turn on Bluetooth and allow the app permissions requested by the phone.
- Check that the Wi-Fi name and password are correct.
- Restart the app and repeat the binding process if the device is not found.

10. Get Help

Website	Support Website https://go-chicken.enterprises/
In-app support	Open the JJ Chicken app and use the built-in customer service option.

Before installation:

Finish the package check, charging check, manual open/close test, and app binding test first. Install the door only after the unit operates correctly.
