What are your organization's top cloud challenges?

Developer eXperience

Developer eXperience

“Developer Experience is the activity of studying, improving and optimizing how developers get their work done.”

Des outils et méthodologies pour

travailler efficacement

aider à la production de code de qualité

aider à la collaboration et communication entre les dév

fournir une documentation et un support sur l'utilisation de
framework / outils

<https://developerexperience.io/>

Pourquoi utiliser un CDE ?

```
git commit -m "It works on my machine 😎"
```

Onboarding amélioré

Limitation des outils à installer sur son poste

Configuration mutualisée

Directement dans les projets et partageable

Sécurisation

Application des règles de sécu en place et pas de code ou d'apps en local

Démarche #GreenIT #FinOps

Prolonge la durée de vie de vos ordinateurs, moins besoin de puissance

Démos

✓ GitHub Codespaces

✓ Idx

✓ Gitpod

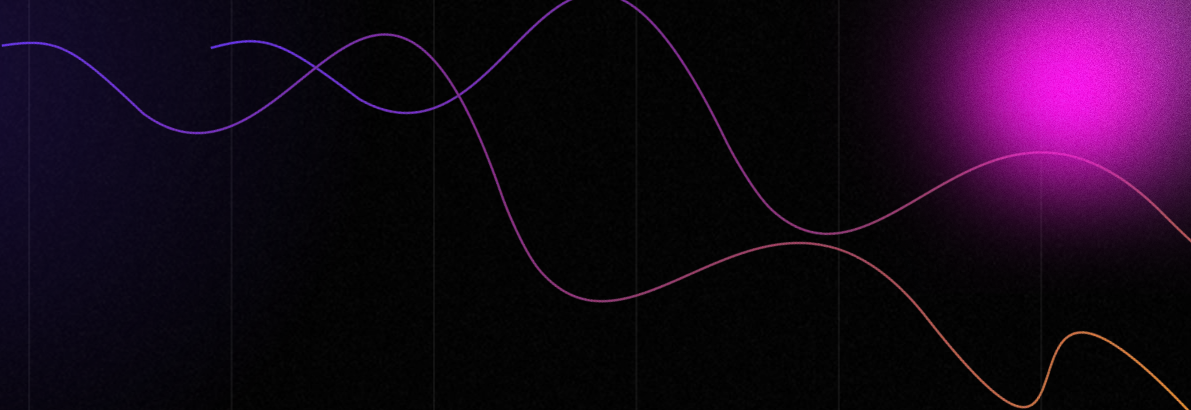

✓ Cloud Workstations

✓ Docker Dev Environments

✗ ~~GitLab remote dev~~

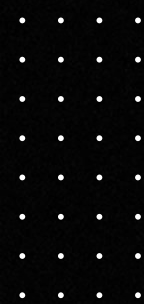

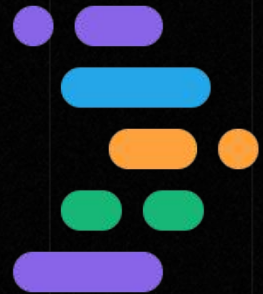

Concrètement ?

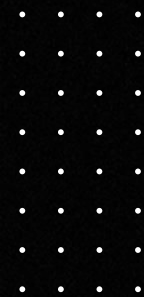

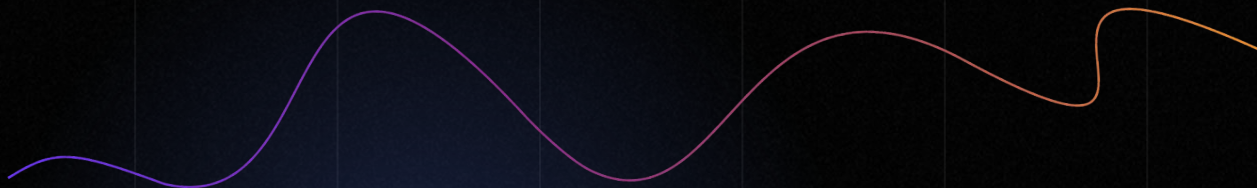

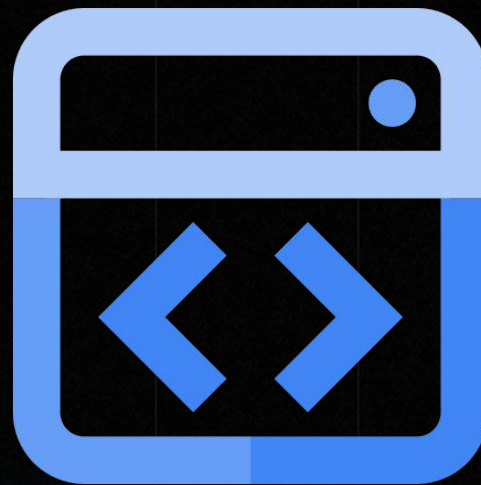

Basé sur nos avis personnels et nos expériences

Projets persos ou Opensource

En entreprise
