Welcome Cursor! 🔥

History

- 2022: Anysphere Inc., the company behind Cursor, is founded in San Francisco by four former MIT classmates: Michael Truell (CEO), Sualeh Asif (CPO), Arvid Lunnemark (CTO), and Aman Sanger.

Their vision: To create a "hybrid" programmer, combining human ingenuity and the power of AI to make development faster, more creative, and more enjoyable.

2023: Official launch of Cursor and a first investment of \$8 million

2024: A \$60 million Series A round in August 2024

2025: The company is valued at \$9.9 billion with \$500 million in Annual Recurring Revenue (ARR)

Individual Plans

Hobby
Free

Includes:

- ✓ Two-week Pro trial
- ✓ Limited Agent requests
- ✓ Limited Tab completions

Download

Pro **Recommended**
\$20/mo.

Everything in Hobby, plus:

- ✓ Extended limits on Agent
- ✓ Unlimited Tab completions
- ✓ Background Agents
- ✓ Maximum context windows

Get Pro

Pro+
\$60/mo.

Everything in Pro, plus:

- ✓ 3x usage on all OpenAI, Claude, Gemini models

Get Pro+

Ultra
\$200/mo.

Everything in Pro, plus:

- ✓ 20x usage on all OpenAI, Claude, Gemini models
- ✓ Priority access to new features

Get Ultra

Business Plans

Teams

\$40/user/mo.

Everything in Pro, plus:

- ✓ Centralized team billing
- ✓ Usage analytics and reporting
- ✓ Org-wide privacy mode controls
- ✓ Role-based access control
- ✓ SAML/OIDC SSO

Get Teams

Enterprise Custom

Everything in Teams, plus:

- ✓ Pooled usage
- ✓ Invoice/PO billing
- ✓ SCIM seat management
- ✓ AI Code Tracking API
- ✓ Granular admin and model controls
- ✓ Priority support and account management

Cursor's Foundations: A new approach to the editor

An IDE designed for coding with AI

- Cursor's entirely its own editor, not just a plug-in
- You get an interface optimized for coding with LLMs
- Get AI in all the right, additive places to your workflow

Built on a foundation developers love

- Cursor was originally a fork of VS Code
- Offers you a feature-rich core you can trust
- Import your extensions & settings with just a click

Codebase indexing for context that matters

- Vector embedding of your codebase at scale
- Highly relevant outputs that fit your style
- Uses folders and your codebase for context

Cursor is built by developers for developers

Cursor Tab

- Best-in-class next-action prediction
- Custom model suggesting multi-line diffs
- Especially good memory and codebase understanding

Command K

- Inline code edits and generation in the editor
- Use @ symbols to reference files, folders, and context
- Powered by industry-leading models (Sonnet)

Cursor Chat

- Ask questions and solve problems in your codebase
- Picks its own context and execute multi-step commands
- Complete tasks end-to-end with an in-editor agent

The Cursor enterprise difference

CTOs, VPEs, and DexEx leaders at scale trust Cursor to ship code faster.

Measure increased developer productivity

Understand how your developers use AI in their workflows with detailed usage analytics.

Your code is never stored or used for training

We protect your code with our [Privacy Mode Guarantee](#).

Powered by the industry's leading AI models

Bring OpenAI, Anthropic, and Gemini models directly into your editor.

Manage your team in one place

Yes, companies have access to SAML 2.0 and OIDC SSO integration with Just-in-Time authentication support.

Context-aware across your codebase

Large-scale indexing to get the most out of complex codebases.

What engineering leaders say

“

Cursor is at least a 2x improvement over Copilot. It's amazing having an AI pair programmer, and is an incredible accelerator for me and my team.

BEN BERNARD

“

The Cursor tab completion while coding is occasionally so magic it defies reality - about ~25% of the time it is anticipating exactly what I want to do. It is enough to make you believe that eventually you'll be able to code at the speed of thought.

KEVIN WHINERY

“

I can knock out huge features in a couple hours max. This is on a big codebase too - no hello world stuff here.

Organisé par

Julien Landuré

Samuel Berthe

88 Participant(s)

⚡ Join us for Cursor Meetup Nantes LIVE hosted by Julien Landuré, Cursor Ambassador! Whether you're a seasoned pro or just curious about what Cursor can do, this is your chance to swap stories, share tips, and see what's new—all in a relaxed atmosphere.

👋 We're thrilled to announce that Nick Miller from Anysphere, the company behind Cursor, will be joining us to share his insights!

📅 Agenda :

- New Cursor features by Nick
- Q&A with the community x Nick

👉 Grab your favorite drink, fire up your webcam, and jump into the conversation.

🔥 Don't miss out—Cursor Meetup LIVE is where AI meets the developer community!

Thank you ! 🙏
