Les Skills & MCP

Context Engineering

Maximiser le résultat de votre agent de code en donnant du contexte de qualité en entrée

Prompt Engineering : donner le bon contexte

AGENTS.md : Information du projet automatiquement ajouté dans le contexte

MCP : Connexion au monde externe

Skill : Compétence spécifique associant Prompt, exemples et scripts

Agentic AI Foundation

Model Context Protocol

An open protocol that enables seamless integration between LLM applications and external data sources and tools.

goose

An open source, extensible AI agent that goes beyond code suggestions. Install, execute, edit, and test with any LLM.

AGENTS.md

A dedicated, predictable place to provide the context and instructions to help AI coding agents work on your project.

Les powers

Les Powers: Équipez votre agent comme il faut

 **Bundle d'Expertise** : Un pack unifié comprenant outils MCP, configurations et fichiers de pilotage (POWER.md).

 **Activation Dynamique** : Chargement intelligent par mots-clés (ex: "Stripe", "Supabase") pour éviter la pollution du contexte.

 **Expertise "Out-of-the-box"** : Accès immédiat aux meilleures pratiques (sécurité, performance, APIs).

Les Powers: Équipez votre agent comme il faut

 **Context Optimization** : Économise jusqu'à 40% de la fenêtre de contexte en ne chargeant que le nécessaire.

 **Écosystème Ouvert** : Installation en un clic (Marketplace) ou création de Powers internes personnalisés.

Les hooks

Les Hooks: Automatiser votre workflow de développement

 **Déclencheurs (Triggers)** : Pre-task / Post-task / File Saved / Prompt Submit / etc...

 **Automation** : Tests, Linters, Docs, Build

 **Feedback Loop** : Auto-correction contextuelle

 **Language Agnostic** : Scripts Shell, JS, TS, Python

Feedback

Joseph

SECURITY.md across repos

1. **SECURITY.md** — the security tab advisory link now points to

`github.com/jwdomb/<repo>/security/advisories/new`

2. **README.md** — all cross-reference links in the "Related Gorilla Packages" table now point to

`github.com/jwdomb/<repo>`

All changes have been pushed to the existing `add-security-and-cross-references` branches and are reflected in the open PRs:

7 tools

Repo	PR
mux	#1
csrf	#1
handlers	#1
websocket	#1
sessions	#1

Cloned repo 5

GitLab Support and Specs in the Browser

This release expands Kiro Web beyond GitHub with full GitLab support and brings the Specs workflow to the browser. Connect GitLab repos with a personal access token, and plan work as reviewable requirements, design, and task files before the agent writes a line of code.

Connect your GitLab repositories

Work on GitLab repositories the same way you work on GitHub. The agent clones your repos, writes code, and opens merge requests on your behalf. Connect with a personal access token, inspect existing merge requests and review issues without leaving the chat, and mix GitLab and GitHub repos in a single session.

[Learn more →](#)

Specs in the browser

Describe what you want to build, fix, or plan, and Kiro generates requirements, design, and task files for you to review before work begins. Edit the plan through chat, run every task or just the ones you select, and download the artifacts when you're done. A single spec session can span multiple repos, with the agent planning across all of them. [Learn more →](#)

Merci !
