

ELECTRIC VEHICLE CHARGING POINTS

JLC Group can supply individuals or businesses with electric vehicle charging points for the home, commercial locations, workplaces and fleets. We are OZEV approved suppliers and installers of ROLEC, Podpoint, Wallbox and SyncEV chargers.

Key features

- Europe's largest and most comprehensive range of electric vehicle (EV) charging points and solutions
- The UK's most competitively priced EV charging points and cables
- Charging points compatible with ALL EVs and PHEVs
- Corrosion resistant, fire retardant and impact resistant design
- Faster, greener, cheaper charging
- ROLEC have been chosen as charge point partners for various reputable businesses and organisations

JLC group are pleased to have become ROLEC, Podpoint, Wallbox and SyncEV charge point approved installers.

This includes supply and installation of electric vehicle charging solutions for the home, commercial locations, workplaces and fleets.

We can offer a huge range of AC Fast and DC Rapid charging points and have the reputation for delivering cost-effective, scalable solutions to suit all budgets and requirements.

We are Office for Zero Emission Vehicles (OZEV) authorised to install Charge Points, for both the Electric Vehicle Home Charge Scheme (EVHS) and Workplace Charging Scheme (WCS).

Office for Low Emission Vehicles

Approved EV Charge Point Installer

ELECTRIC VEHICLE CHARGING POINTS

Let us help you take advantage of significant cost savings when purchasing and installing electric vehicle charging points at your homes and workplaces.

We have been approved to install Office for Zero Emission Vehicles (OZEV) authorised ChargePoints, for both the Electric Vehicle Home Charge Scheme (EVHS) and Workplace Charging Scheme (WCS).

The OZEV grant is offered to encourage UK drivers to switch to electric plug-in vehicles. This particular grant is focused on the acquisition and installation of the charger. Drivers can claim a government grant up to £350, which can be deducted off the price of a charging point and the related installation costs.

Benefits of investing in electric fleet, and utilising OZEV and ROLEC EV points, include being able to decrease your company's fleet/fuel costs as well as reducing business Co2 Levels.

The Workplace Charging Scheme (WCS) grant eligible charging points feature; a mobile app / RFID operated charging, operator management, optional revenue stream, analytical feedback, customisable EV Driver Tariffs as well as being OCPP 1.6 Compliant.

Contact us today to enquire about fitting and installing EV charging points for your Business or for your home.
