

FIRE SHUTTERS

Automatic electric shutters, including electric roller shutters and electric roller shutter doors ensure a high level of security for commercial entrances in retail outlets, fire stations, warehouses, airports and seaports etc. Automatic shutters are available in a variety of sizes, colours and materials to suit your environment. Our automated fire doors and shutters provide additional protection against fire and smoke.

Key features

- Available in a variety of sizes
- Both fire shutters and curtains available
- Can be set up in numerous ways to fit specific requirements for location

Automatic electric shutters, including electric roller shutters and electric roller shutter doors, ensure a high level of security for commercial entrances in retail outlets, fire stations, warehouses, airports and seaports etc. Automatic shutters are available in a variety of sizes, colours and materials to suit your environment.

Our automated fire doors and shutters provide additional protection against fire and smoke.

Products can be integrated into various automatic shutters utilising existing equipment if necessary and using customised PCB's

We can tailor our electric shutters to meet your bespoke requirement. JLC's team of Service Engineers are fully trained, DDA aware and ADSA qualified.

JLC Service & Maintenance Contracts

Service and maintenance contracts are available to ensure smooth operation of equipment and to reduce overheads

FIRE RATED SLIDING DOORS

Our fire rated sliding doors combine the functionality and aesthetics of an automatic door, with additional fire and flame retardant properties to maximise safety.

Key features

- Bi-parting or single leaf options
- Fire resistant glazed leaves for maximum transparency
- Tempered glass with intumescent gel
- Rated for 30 or 60 minutes

Sliding Door Systems

Working with our partner, Manusa, the standard automatic sliding doors allow the fastest opening speed on the market, which is ideal for environments of intense circulation of people. Fully customisable, with maximum security, these doors offer a fully functional solution of the highest quality. They are designed to guarantee a lower visual impact and great integration with different architectural complexes. As leaders in the supply, manufacturing and maintenance of automatic doors, we are able to manage every step of the project strictly complying with current regulations.

Swing Door Systems

Automatic swing doors allow a better use of space by facilitating the flow of people in public areas, meaning they are an ideal solution for shopping centres. They are designed to provide functionality, security, with customised finishes and colours according to the spaces and preferences of each client. These doors easily integrate with the environment in which they are installed. Automatic swing doors are more adaptable than most door types on the market.
