

ERRATA

Sources of Polonium 210 within the troposphere

By ALAIN MARENCO and JACQUES FONTAN, *Physique des Aérosols et Echanges Atmosphériques, Centre de Physique Atomique, Université Paul Sabatier, Toulouse, France*

(Manuscript received February 12, 1973)

Some misprints have unfortunately occurred in the article by Marenco & Fontan (vol. 24, I). The beginning of the section III.3 (p. 42) should read:

“No correlation was to be found between

the ratio $^{210}\text{Po}/^{210}\text{Pb}$ and the ^{90}Sr . The ^{90}Sr being representative of products of stratospheric origin, it follows that the high values of $^{210}\text{Po}/^{210}\text{Pb}$, and therefore of ^{210}Po , encountered in the low layers ...”
