

PREFACE

Arnaud SZMALEC
Ghent University

This Special Issue of *Psychologica Belgica* is a Festschrift in honour of André Vandierendonck's scientific and institutional contributions to cognitive psychology. It is a collection of scientific papers that represent the lectures included in the *International Symposium André Vandierendonck: Working Memory and Executive Control*, which took place on September 20th 2010, at Ghent University. We are grateful to Etienne Quertemont, Editor-in-Chief of *Psychologica Belgica*, for supporting this special issue, to the contributing authors for giving us the opportunity to include their valuable work in this Festschrift, and to the reviewers who devoted their time to optimise the outcome.

We also would like to thank the Faculty of Psychology and Educational Sciences at Ghent University, the European Society for Cognitive Psychology, and Profacts for their financial support in this project.
