YOU WILL LEARN

- ☑ What you'll build
- ☑ Step 1 — ✅ Confirm fit and requirements
- ☑ Step 4 — 📊 Set up your application tracker
- ☑ Platforms & tools
- ☑ Step 3 — 🧾 Build a targeted resume
- ☑ Step 5 — ✍️ Tailor resumes quickly with AI

▸ MODULE 01

What you'll build

A complete, zero-fluff system to land a medical courier job: what hiring teams look for, how to tailor your resume, where to find openings, how to reach decision-makers, and how to prep for interviews. You'll also get an optional automation to scrape fresh roles and generate tailored resumes in minutes.

1. A targeted resume with healthcare keywords
2. A Google Sheets tracker for all applications
3. A cross-platform search + outreach routine
4. Optional Apify + Make/n8n sourcing automation
5. Interview-ready STAR stories and follow-ups

▸ MODULE 02

Platforms & tools

Lead & Outreach

3 free · 5 paid

LinkedIn · Upwork · Loom · Apollo · Cal.com · Smartlead · Fiverr · Instantly

Website Builders

0 free · 2 paid

Lovable · GoHighLevel

AI Models

2 free · 3 paid

ChatGPT · Claude · Gemini · OpenAI · Anthropic

Dev & Hosting `0 free · 2 paid`

GitHub · VS Code

Automation `3 free · 1 paid`

Make.com · n8n · Apify · Zapier

▸ MODULE 03

Step 1 — ✅ Confirm fit and requirements

Check that your background maps to medical courier expectations: reliable driving and routing habits, precision with sensitive materials, and professional communication. Highlight any HIPAA familiarity and healthcare-adjacent admin work.

1. 1+ year similar/related experience helps
2. HIPAA knowledge is valued
3. Strong attention to detail and organization
4. Microsoft Office/Google Workspace comfort
5. Customer service and clear communication

> **Tip**
> Many companies train on their systems after hire; emphasize ability to learn and accuracy over prior software experience.

▸ MODULE 04

Step 2 — 🧠 Understand day-to-day expectations

Expect precision tasks tied to healthcare logistics: retrieving and transporting sensitive items/records, handling authorizations, and maintaining clear communications via email/phone or ticketing. Accuracy and privacy discipline are non-negotiable.

1. Secure handling and documentation
2. Timely pickups and drop-offs
3. Clear status communication
4. Privacy and professionalism

▸ MODULE 05

Step 3 —  Build a targeted resume

Tailor your resume to each posting. Front-load role-relevant proof: safe driving history, on-time performance, healthcare privacy awareness, and high-accuracy record handling. Swap achievements to match the job instead of relying on reverse-chronological order.

1. Front-load key wins (F-pattern)
2. Quantify on-time/accuracy metrics
3. Highlight HIPAA and records handling
4. List route planning and multitasking
5. Include Microsoft/Google suite skills

> **Tip**
>
> Avoid vague bullets like “handled deliveries.” Specify volume, accuracy, and timeliness. If new, emphasize study-developed skills (time management, collaboration, resilience).

▸ MODULE 06

Step 4 — 📊 Set up your application tracker

Centralize every lead and submission in one Google Sheet to prevent lost opportunities and enable fast follow-ups.

1. Create columns: Position Name, Job Type, Company Location, Description, URL, Customized Resume, Date Created, Posted At, Scraped At
2. Add columns for contact names, email, follow-up dates, status

▸ MODULE 07

Step 5 — ✍️ Tailor resumes quickly with AI

Use ChatGPT or Claude to refine language and align bullets to the posting. Keep control by templating most content and letting AI fill only small, role-specific portions for reliability.

PROMPT — RESUME TAILORING FOR MEDICAL COURIER

```
System: You improve resumes for medical courier roles.
User: Here is my base resume in plain text:
[PASTE_RESUME]
Here is the job description:
[PASTE_JOB_DESCRIPTION]
Tasks:
- Rewrite my 4–6 top bullets to match the posting using measurable outcomes
(on-time %, accuracy %, miles/day, tickets/day, HIPAA handling).
- Insert relevant keywords naturally: HIPAA, medical records, healthcare,
accuracy, organization, customer service, routing.
- Keep my voice concise; output in markdown ATX with sections: Summary, Skills,
Experience (top 3 roles), Education/Certs.
- Return only the resume content, no extra commentary.
```

> **Tip**
>
> Front-load your best social proof; recruiters scan in an F-pattern across headers and first bullets.

▸ MODULE 08

Step 6 — 🔎 Find and vet openings across platforms

Search daily, save alerts, and track every lead. Use role variants like “medical courier,” “specimen courier,” and “lab courier.”

Platform	What to do in this step
LinkedIn	Use Jobs → search “medical courier” + your city. Set alerts, save leads, and research hiring team profiles before applying.

Platform	What to do in this step
Indeed	Search by title and location; filter by date posted. Save jobs and export links to your tracker for follow-up.
Google	Search “medical courier jobs near me” and include local lab/hospital names; click through to original career sites.
Upwork	Search “courier”/“delivery” for ad-hoc gigs. Rare, but set alerts for local deliveries requiring secure handling.

> **Tip**
>
> Some companies restrict hiring to specific states for payroll/compliance. Always check location restrictions before applying.

▸ MODULE 09

Step 7 — 🤖 (Optional) Automate sourcing and tracking

If you’re technical, build a light workflow that scrapes fresh postings and logs them to your Sheet, then generates a tailored resume draft for each role.

1. Apify basics: actor → task → dataset
2. Actor: Indeed bulk job scraper; query “medical courier”, set location, max items
3. Make.com: Scenario 1 runs actor; Scenario 2 watches completion, calls OpenAI/Claude to tailor resume, appends Google Sheet row
4. n8n alternative: Add Apify node (API key), OpenAI node (API key), Google Sheets credentials; map fields (date, role, URL, resume link)

Tip

Avoid auto-applying. Use automation only to collect listings and draft materials. Respect site ToS; use Apify's Watch Actor Runs and Hookdeck delays to avoid unnecessary polling.

▸ MODULE 10

Step 8 — 📧 Send a short cover email to the hiring inbox

After applying through the portal, email the hiring inbox or operations lead with a concise, respectful note and your tailored resume link.

TEMPLATE — COLD EMAIL TO HIRING

```
Subject: [Personalized hook for [Name]]
Hi [Name],

I hope you're having a good week. I see you might be leading the hiring process
at [Company] and I wanted to personally pass along my resume for the [Medical
Courier] position you have open. I'm looking to work under a fast growing
company like yours and I would love the opportunity to speak to you and share
how my background could be an asset to your organization as I'm excited about
the possibility of joining the team.

Hope to hear from you soon,

[Your Name]
```

Tip

Use multiple channels (email, LinkedIn, company form). Messaging only on LinkedIn often gets buried.

▸ MODULE 11

Step 9 — 🤝 Ask for informational chats

Warm up your pipeline by learning from people doing or managing the role. Keep the ask small and respectful.

TEMPLATE — DM FOR INFORMATIONAL INTERVIEW

```
Subject: [Personalized hook for [Name]]
I'd be very interested to get your expert opinion on this industry and where
it's going, could you spare some time?
```

1. Target dispatch/ops supervisors or current couriers
2. Ask 2–3 thoughtful questions; never pitch first
3. Close by asking if there's a best place to apply

▸ MODULE 12

Step 10 — 📨 Apply first, then reach 2–3 people

Submit your application formally, then contact three humans: hiring/HR, someone doing the role, and a team lead. Reference your submitted application and resume link.

1. Log each outreach in your Sheet
2. If asked for an application number you lack, email the careers inbox politely to retrieve it
3. Keep messages short; show genuine interest

▸ MODULE 13

Step 11 — 🎥 Add a 60–90s Loom intro (optional)

Record a brief video: who you are, safe driving record, on-time reliability, healthcare privacy awareness, and why you want to deliver for this employer. Include the Loom link on your resume header and in follow-ups.

1. Speak clearly; 60–90 seconds max
2. Show energy and reliability
3. Add the link to your emails

> **Tip**
> Avoid static screens; move through relevant pages (resume/portfolio snippet) so the video feels live, not a screenshot.

▸ MODULE 14

Step 12 — 🧪 Prepare for interviews with proof

Enter with company context and specific stories showing calm under pressure, accuracy, and customer empathy. Practice a tight “Tell me about yourself” aligned to courier work.

1. Research: company age, mission, key people on LinkedIn
2. Prepare STAR stories: urgent delivery, routing snag solved, privacy upheld
3. Demonstrate multitasking and professionalism on calls

> **Tip**
> Interviewers make quick judgments; avoid rambling 'volcano answers'. Read the job description closely and mirror the skills they request.

▸ MODULE 15

Step 13 — ⏱️ Show you can plan routes and time

Demonstrate schedule thinking. Even a simple mock route plan shows you can sequence activities, manage dependencies, and control your time.

1. Sequence activities; identify dependencies
2. Estimate durations; pad for traffic windows
3. Optionally build a mini Gantt in Sheets/Excel

▸ MODULE 16

Step 14 — 🔐 Emphasize privacy and compliance signals

Signal you understand healthcare privacy and data handling. Use resume keywords that reflect this awareness and speak to accuracy and documentation discipline.

1. Keywords: HIPAA, medical records, healthcare
2. Accuracy, documentation, routing, organization
3. Customer service and clear communication

▸ MODULE 17

Step 15 — 🖨️ Prepare onboarding documents

Keep your paperwork organized for rapid onboarding: IDs, licenses, proof of insurance if required, emergency contacts, and any training certificates.

1. Application and ID copies
2. License/insurance (if applicable)
3. Emergency contacts, basic trainings

> **Tip**
> Some employers are region-bound for compliance; confirm eligibility early to avoid wasted cycles.

▸ MODULE 18

Step 16 — 📈 Track metrics and iterate weekly

Review your Sheet weekly: response rates, interviews scheduled, and where outreach lands. Adjust resume keywords and subject lines based on replies. Keep quantifying results; if you can’t articulate metrics, you remain invisible.

1. Add follow-up dates and outcomes
2. Refresh resume bullets with stronger metrics
3. Trim low-yield platforms; double down on high-yield ones

▸ MODULE 19

Mistakes to avoid

🚫

MASS APPLYING WITHOUT FIT

Spraying applications without healthcare/privacy signals or route reliability gets crickets.

📄

VAGUE RESUMES

Front-load measurable wins; avoid generic bullets. Recruiters scan in an F-pattern.

🤐

WEAK INTERVIEW PREP

Not preparing 'Tell me about yourself' or STAR stories sinks otherwise strong candidates.

🔗

SINGLE-CHANNEL OUTREACH

Only DM'ing on LinkedIn gets buried. Use email + LinkedIn + application portal.

🤖

AUTO-APPLYING WITH SCRAPERS

Violates ToS and harms reputation. Automate sourcing, not submissions.

🧩

OVERLOADING AI

Give AI small, clear tasks. Keep name/email extraction separate for reliability.

🗺️

IGNORING LOCATION LIMITS

Some employers hire only in specific states. Check before investing time.

🎯

PAST-ONLY POSITIONING

Build the resume for the next role, not just what you used to do.

▸ MODULE 20

Salary Estimate

$20–$22/hr

Enrollment specialist (adjacent healthcare ops) — source-reported example

$24–$30/hr

Customer support associate (adjacent) — source-reported example

> **Note**
>
> Compensation for medical courier roles varies by employer, region, schedule, and vehicle/insurance requirements. Always verify pay in the specific posting.

▸ MODULE 21

Resources

RESOURCES
