ABSTRACT

Homoeopathy is a system of medicine that heals illness using substances capable of causing the same illness. From the proving's of Dr Samuel Hahnemann in 1790, there are over 2000 homoeopathic drugs that have been proved and are in used world over. homoeopathic medicines are prepared from a wide range of natural sources like plants, chemicals, minerals, animals, nosodes, sarcodes, imponderabilia, synthetic sources, allersodes, and isodes.

KEYWORDS: New sources, Preparation of medicine, Potency, Complementary Medicine.

INTRODUCTION

Homoeopathy is a system of medicine that heals illness using substance capable of causing the same illness, that is presenting the same symptoms & condition when administered to healthy people. After so many years homoeopathy had proven the science of holistic & scientific approach.

The Homoeopathic medicines are Prepared from wide range of natural sources & Homoeopathy had discovered two new sources i.e., Allersodes & Isodes.

Isodes are the Homoeopathic attenuation of botanical, zoological or chemical substances, including drug excipients on binders; which have been ingested or absorbed by body & they believed to produce a disease which interferes with Hormesis.

MATERIALS AND METHODS**Theoretical Study**

1. Homoeopathic journal,
2. Internet sites & database
3. Homoeopathic textbooks and Allopathic textbooks.

RESULTS AND DISCUSSION

Homoeopathic Medicines were in used traditionally for the treatment of various allergies, infections, toxicities,

autoimmune diseases, chronic diseases and acute diseases.

The Homoeopathic medicines are prescribed on the basis of Homoeopathic cardinal principles "Similia similibus Curentur"

The practice of homeopathy has become contemporized to meet the challenges of today's industrialized, stressful society. Modern living has created chronic "diseases" that are unresponsive to conventional, symptom suppressing drugs. Alternative/ complementary practitioners have rediscovered the teachings of Hippocrates; "the cause is the cure" has been termed the isopathic or homeovitic approach. This contemporary approach is being used successfully to overcome chronic conditions often associated with toxicities.

CONCLUSION

Isodes is a new source of homoeopathic medicines is proved useful in treating toxicities and allergies. After meta- analysis of literature, the effect of medicines prepared from Isodes have good therapeutic effect in potencies (12C,30C, 200C).

Thus, based on study of isodes it can be concluded that isodes – Homoeopathic medicines (12 C, 30C, 200C)

Potencies in treatment of toxicities, allergies, autoimmune diseases, and infections.

Further analysis of different potencies of isodes can be studied in the in-vitro and in-vivo experiments.

Conflict of Interest

No any conflict of interest and no funding was provided.

ACKNOWLEDGEMENT

It gives immense pleasure to extend heartfelt thanks with an abounding sense of gratitude to our Teachers, all hospital staff for their support encouragement and guidance.

We take this opportunity to express our profound respect and humble regards to our career. We Would not have been What we are today without their effort, blessings and encouragement.

We pay our gratitude to Dr. Samuel Hahnemann for making us a part of this great external science.
