Your Gateway to Advanced Research in
Polymer and Composite Materials

About the Journal

The Journal of Polymer and Composites (JoPC) is a peer-reviewed journal that focuses on publishing high-quality research in polymer science and composite materials. JoPC serves as a platform for researchers, academics, and professionals to share innovative ideas, cutting-edge advancements, and practical applications in the field. The journal is indexed in Web of Science, ensuring global recognition and visibility.

JoPC covers a wide range of topics, including but not limited to:

- Polymer Chemistry and Physics
- Composite Material Development and Applications
- Recycling and Sustainable Polymers
- Nanocomposites and Advanced Materials
- Mechanical Properties and Structural Analysis

Journal Particulars

Issues Per Year (Frequency)	6 online Issues (Bi-Monthly) from 2024
ISSN	2321-2810
Impact Factor (SJIF)	2020: 6.025, 2021: 6.018, 2022: 6.005
Publisher	STM Journals, An imprint of Consortium e-Learning Network Pvt. Ltd.
Starting Year	2013
Specialization	Chemistry/ Chemical Engineering/ Material Science/ Mechanical Engineering/ Polymer Science/ Physics/ Applied Chemistry/ Biomedical Engineering/ Civil Engineering/ Aerospace Engineering/ Nano Science Department
Indexing	Web of Science, Citefactor, Chemical Abstracts Service (CAS), Scientific Literature (SCILIT), Google Scholar, ICV Value: 2022 : 68.37

Key Highlights

- Access to 1000+ Articles Online
- Print Copies Available
- Indexed in Web of Science for Global Visibility
- Rapid Review and Publication Process
- Open Access Option for Enhanced Reach

Recent Articles

Influence of the Load, Sliding Speed, and Weight Fractions on Wear of a Hybrid Aluminium Metal Matrix Composite

Author: Kousik Kumaar R., Somasundara Vinoth K, Srikanth H.V., Boopathy G,

Evaluation of Mechanical Properties of Carbon Reinforced Composite for Different Process Parameters Using FDM

Author: Ananda M.N., Sudheer Reddy J., Vijay Kumar S., Vikram K.V., Mahesh Kumar,

Optimization of Liquid Metal Nanocomposites and Biogas Addition Rate Using ANN-GA

Author: S. Lalhriatpuia, Neeraj Budhraj, Kiran Pal,

Dielectric Properties of Reduced Graphene Oxide with Nickel Cobalt Ferrite and Nickel Zinc Ferrite Epoxy Nanocomposites

Author: Manuel George, P.P. George,

Strength Investigation on Butt Welded Polymer Tubes

Author: Ram Vishal Gandham, Srikanth H.V, Abhishek T.K., Mahendra K., Anirudh P., Rahul B.,
