

Journey - Browser Policy

This policy defines the web browsers which we support for all Journey websites.

1. Statistics for browser support are based on information collected from Google Analytics.
2. The list of supported browsers is reviewed on a quarterly basis.
3. Older browsers (notably Internet Explorer) should employ graceful degradation to ensure that core function is achievable however the user experience may be limited or degraded.
4. Only the latest stable version of browsers which adopt a rapid release cycle will be supported. This is due to the nature of rapid-release, meaning browser support could change on a weekly basis. When a new version of a browser is released, we will endeavor to ensure that our software is operable as soon as reasonably possible. From time to time, browser updates may reduce functionality of live sites.

Browser Support Termination Policy

When a browser falls below 2% share, it will no longer be supported. Our share algorithm incorporates usage data from currently installed base and regional & global data sourced from Statcounter and W3Counter.
