## GENERAL GUIDELINES

1. The Journal of Science and Technology publishes research results with novel scientific and practical values in scientific research, technological transfer and production practice. The work described must not have been published in or submitted to other scientific journals.
2. Manuscript to be submitted must be prepared according to the journal's template.
3. All manuscripts will be double blind reviewed. Authors need to ensure that their manuscripts are prepared in a way that does not give away their identity.
4. The contribution and affiliation of each author in a paper should be clarified. One author should be assigned as the corresponding author.
5. Publications of results from research projects must have permission from the funding agencies and should include conforming acknowledgment.
6. Authors are requested to submit their manuscript and follow the review progress electronically by using the online submission system on the journal's web site.
7. The detail guidelines for authors and reviewers can be consulted on the journal's website.
