

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**  
**Monitoring Requirements Not Met for CITY OF CLEARWATER, KS**

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During Third Quarter of 2025 we did not monitor for fluoride as required by Kansas Administrative Regulations. Even though this was not an emergency, as our customers you have a right to know what happened and what we did to correct the situation.

What should I do?

You do not need to use an alternative (e.g., bottled) water supply. However, if you have specific health concerns, consult your doctor.

What does this mean?

This is not an immediate risk. If it had been, you would have been notified immediately.

What happened? What is being done?

[Describe corrective action.]

We have collected the fluoride samples for Fourth Quarter of 2025. Except for distributing this public notice to our consumers, no further action is required.
