**Subject:** Determination Regarding Sign Placement and Height Adjustment

To: Whom it may concern,

After a thorough review of the sign schematic and a site assessment of the proposed placement location, the Department of Public Works (DPW) has determined that the sign does not impede sightlines for roadway visibility.

Additionally, the requested increase in height has been evaluated and found to have no impact on sightlines. This determination is based on the significant topographic grade change between the roadway and the lot, which sits at a substantially lower elevation. Coupled with the presence of the rock wall, these conditions justify the request for additional height.

From a visual standpoint, the sign's appearance will remain consistent with other signs when viewed from the roadway, despite the height adjustment.

Please let us know if you require any further clarification or documentation.

Sincerely,

Nolan Lynch  
Public Works Deputy Director
