

Classifying the Entire Service Line When Ownership Is Split

Purpose of this worksheet : To summarize EPA's requirements for classifying the entire service line when ownership is split.

Introduction

In many cases, service line ownership is **split** meaning that the system owns a portion and the customer owns a portion of the service line. Exhibit 1 below is a diagram of a possible division in service line ownership between the water system and customer. While the LCRR requires the inventory to categorize each service line or portions of the service line where ownership is split, a single classification per service line is also needed to support various LCRR requirements, such as lead service line replacement (LSLR), tap sampling, and risk mitigation. **Table 1 below indicates how to classify the material for the entire service line when ownership is split between the water system and customer.** For more information, see EPA's, *Guidance for Developing and Maintaining a Service Line Inventory* (2022).

Exhibit 1. Example of Service Line Ownership Distinction between the Water System and Customer

Source: Exhibit 2-2 of *Guidance for Developing and Maintaining a Lead Service Line Inventory* (USEPA, 2022).

Table 1: Classification of Entire Service Line When Ownership is Split

System-Owned Portion	Customer-Owned Portion	Classification for Entire Service Line
Lead	Lead	Lead
Lead	Galvanized Requiring Replacement	Lead
Lead	Non-lead	Lead
Lead	Unknown	Lead
Non-lead	Lead	Lead
Non-lead and never previously lead	Non-lead - galvanized	Non-lead
Non-lead	Non-lead - material other than galvanized	Non-lead
Non-lead	Unknown	Unknown
Non-lead, but may have previously been lead	Galvanized Requiring Replacement	Galvanized Requiring Replacement
Unknown	Lead	Lead
Unknown	Galvanized Requiring Replacement	Galvanized Requiring Replacement
Unknown	Non-lead	Unknown
Unknown	Unknown	Unknown

Source: Exhibit 2-3 of *Guidance for Developing and Maintaining a Service Line Inventory* (USEPA, 2022).

PWS Information

Purpose of this worksheet: For water systems to document basic system information.

Facility Information

Water System Name:

Ilwaco Water Department City Of

PWSID:	Population Served (number of people):	Number of Service Connections:	PWS Type:

Location Information		System-Owned Portion				Customer-Owned Portion			Entire Service Line Material Classification (required)	Other Potential Sources of Lead		Lead Service Line Replacement (LSLR)	
Location Identifier (required)		System-Owned Portion Service Line Material Classification (required)	If Non-Lead in Column D, Was Material Ever Previously Lead?	Basis of Material Classification (required)	Notes	Customer-Owned Portion Service Line Material Classification (required)	Basis of Material Classification (required)	Notes		Is there a Lead Connector?	Is there Lead Solder in the Service Line?	Date of System-owned LSLR	Date of Customer-owned LSLR
Street Address	Other Location Identifier												
Water systems must track addresses of all service lines in their internal inventory. If the system does not use addresses for their location identifier, other options could include a unique ID, parcel number, landmark, intersection, block, or other details to specify service line locations.		Dropdown list includes recommended subclassifications. If "Non-Lead Other", describe in Notes field	Dropdown list. Select Yes, No, or Don't know. Important for determining if downstream/ customer-owned galvanized service line requires replacement	Select option from drop down list. If "Other," describe in the Notes field	Use this field for documenting additional relevant information.	Dropdown list includes recommended subclassifications. If non-lead other, describe in Notes field.	Select option from drop down list.	Use this field for documenting additional relevant information.	Select the proper classification using dropdown list and "Classifying SLs" tab.	For example, lead gooseneck or pigtail where the water main is connected to the service line	Select Yes, No, or Don't Know

Inventory Summary

PWS Name: City of Ilwaco

PSWID: 35500 2

Enter Date Last Updated: 10/14/24

Purpose of this worksheet: For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Part 1. General Information

1. Is this the **Initial Inventory** or an **Inventory Update**? Initial Inventory

2. If you used a lead ban date to classify non-lead, what date did you use? Provide rationale if date used is prior to 1986.

1986

3. Do you have lead goosenecks, pigtails or connectors in your system? Don't Know

Part 2. Inventory Summary Table ¹

The below summary will help you when submitting your inventory to the state. The classifications listed in the "Detailed Inventory" tab Column K "Entire Service Line Material Classification" are used to calculate the total number of service lines for each of the four material classifications below. **These are the totals for the four classifications for all service lines inventoried.**

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	183
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	350
TOTAL		533

Notes

¹ This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the **Classifying SLs** worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

² A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.
