POTHOLES

HOW ARE POTHOLES FORMED?

- Potholes develop when two factors are present at the same time - **water & traffic**; hence potholes commonly occur in the wheel path.

Special Report 81-21 Pothole primer
By: R.A Eaton, RH Joubert and E.A Wright 9/1981

POTHOLES IN THE ROAD, WHAT TO DO?

- Try to avoid the pothole, but avoid sharp turns of the steering wheel
- Slow down & drive carefully
- Traveling at full speed, slamming on the brakes, or sudden swerves can cause a crash

HOW ARE THEY FIXED?

- The size of the pothole will determine the fix. A common successful technique for smaller potholes is known as **Throw & Roll**. Your municipality will place a modern asphalt and polymer-based patching mix in the hole. Then they will compact it with a truck tire. Slow down and give the workers room.
