Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]

Project :

Date :

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Part 2 - Section 17: Consistency with Community Plans

Question 17 was answered "Yes" because the proposed zoning amendment modifies existing development standards, which warrants review for consistency with adopted plans. However, all sub-questions were rated "no or small impact may occur" for the reasons set forth below, and the amendment will not result in a significant adverse environmental impact.

The proposed amendments are directly responsive to the Village of Saranac Lake's adopted Housing Plan (December 2021), which post-dates the Comprehensive Plan and was adopted specifically to address documented housing needs in light of changed market conditions. The Housing Plan identifies "zoning that limits multi-family development" as a predominant housing issue and explicitly calls for review and revision of local zoning codes to support a wider range of housing types (Action 4.3C), including townhomes and multi-family housing. The ADU amendments similarly implement the Housing Plan's directive to promote ADU creation as a housing supply strategy (Action 2.2A).

The amendment carefully balances these directives against the character-preservation goals of the Comprehensive Plan. The Comprehensive Plan's restrictions on multi-family development in Sub-areas K1 and K3 were motivated by concerns about maintaining residential neighborhood character. The new 3-4 Family Dwelling/Townhouse category addresses those concerns directly: structures of 3-4 units can be designed to be architecturally compatible with the existing building stock, and such structures are already present throughout the Village including in Plan Area K. The Local Law also includes Design Standards for Townhouse and Rowhouse Structures. The Design Standards and Special Use Permit requirements ensures case-by-case review of compatibility before any approval is granted, and structures of 5 or more units remain prohibited in both sub-areas. Any potential impact on community plan consistency is therefore small, and no significant adverse environmental impact will result.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information
Village of Saranac Lake Comprehensive Plan (2013) and Village of Saranac Lake Housing Plan (2021)

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Saranac Lake Village Board of Trustees as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
