In the coming weeks, the City of Baldwin will be performing street microsurfacing adjacent to your property. Microsurfacing is a form of pavement preservation which uses a designed mixture primarily consisting of asphalt emulsion and crushed aggregate. A project location map is included on the back.

The contractor for this project is ASTECH Corporation. They anticipate starting the project as soon as October 7th. This date may vary depending on weather in the project and surrounding areas. It is anticipated for construction to take less than a week to fully complete. Working hours for the project will be from 7:00 a.m. to 7:00 p.m., Monday through Friday, and 8:00 a.m. to 6:00 p.m. on Saturdays, if necessary.

When construction crews are present in your area, please avoid all street parking. Driveway access will be maintained for residents throughout the duration of the project. During construction we will do our best to maintain traffic, but some delays and inconveniences will be unavoidable. Your patience is appreciated.

If you have any questions or concerns regarding your specific property, the construction process, or microsurfacing in general, please call Sam Jochum. Project contact information is provided to the left.
