1. Introduction

The Town of Alta (“the Town”) operates a wastewater system consisting of a network of gravity sewers including laterals, collectors, and an outfall to the Salt Lake County Services Area #3 (SLCSA3) system. The system consists of approximately 2 miles of pipeline (pipe sizes range from 8-inch to 10-inch diameter) and 47 manholes. The system serves 861 Equivalent Residential Units (ERUs). Much of the Town’s water system is on land owned and managed by the USDA Forest Service (USFS) under special use authorization from USFS. As of September 2024, the Town initiated development of a wastewater system master plan that identified 5 capital improvement projects to be carried out over the next 5 – 10 years, with the project described in this RFP taking the highest priority.

2. Project Goals

- To replace structurally and hydraulically deficient pipes
- To improve pipe slope, reducing the need for cleaning and reducing potential for future corrosion and deterioration

3. Scope of Project and Services

a) Engineering and design services to replace approximately 765 feet of 10-inch diameter pipe in the vicinity of the Goldminer’s Daughter Lodge/Wildcat Parking lot between manholes LC154

and LC157. This segment is in poor condition. Sagging pipes and flat or inverse slopes cause standing water, which accelerates deterioration.

Images of the proposed wastewater pipe segment are attached in “Exhibit A”.

b) Successful respondent will submit relevant applications or other documentation required for approval to authorities having jurisdiction over the project including the State of Utah Department of Environmental Quality (DEQ) and the Division of Water Quality (DWQ) and the USDA Forest Service (USFS) or coordinate with Town staff to do so.

This limited waiver has been mutually negotiated by the Parties and is expressly made effective only for the purposes of this Agreement.
