Annual Newsletter - December 2025

Drinking Water Testing: March 2, 2026

Municipalities (public water suppliers) are required by State regulations to test the water they provide to citizens. Rural residents own their own well so they only know if their water is safe if they have had it tested.

Reserve a test kit TODAY by signing up: <https://forms.gle/ZtsEsgftmLpMLipg6> or use the QR code to the left. (To use the QR code: Turn on your smart phone's camera app and hover over the "picture" — a link will pop up; click on it.)

You must register with this form by February 6, 2026, to get reminders of the program. The Town will coordinate sample bottle pick up and payment the last week of February. On Monday, March 2nd, 2026, all participants will sample their water and return the bottles to the Town Hall. At the end of April there will be a free educational program where participants can learn about groundwater and how to interpret their test results. Any questions? Contact Tonya Gratz, Green County LWCD at 608-325-4195 ext. 121.
