Information depicted on this map was interpreted from digital orthophotos and various other land records. An attempt was made to accurately represent the information shown hereon, however, recent changes in the physical and cultural landscape many not be represented. This map is intended for planning and general use only. Please refer to the original source documents for detailed information. If you have any questions or discover any discrepancies on this map please contact the Shawano County Information Services Office.

*Floodplain delineations are for flood insurance purposes only. All areas subject to flooding in the community are not necessarily shown. These maps are based on data from FEMA but have not been approved by FEMA. Unless officially approved by FEMA, these maps cannot be referenced in ordinances nor can they be used for regulatory purposes such as floodplain zoning.

Wetlands, Dam, Endangered Species, and Major Watershed layers were created by the WIDNR. For more information on these layers please contact - <http://www.dnr.state.wi.us/>

Woodlands information was created by East Central Regional Planning Commission as part of their 2000 Land Use Mapping. For more information on this layer please contact - <http://www.eastcentralrpc.org/>

Slope information was derived from the NRCS soils inventory for Shawano County. For more information on this layer please contact - <http://soils.usda.gov/>
