## Cascade First Responders

Submitted by Kelly Green

The Cascade First Responders would like to take this time to thank the community for all their support throughout the year. Our next event will be the Fish Boil we hold during Lent. Please watch for posters and on Facebook for more information.

During the winter months we get a lot of calls for slip and falls, carbon monoxide poisoning from defective furnaces, car accidents on slippery roads, and injuries from snow shoveling. Please be aware of your surroundings, slow down and be safe.

We would like to wish everyone a Merry Christmas and a very Blessed New Year!

## Cascade Fire Department

Submitted by Chief Todd Triebensee

So here we are getting ready to embrace another Wisconsin winter! With that in mind please help out where you can in clearing fire hydrants in the Village near your home! The hydrants in the Village are spaced approximately 600ft apart and in a structure fire situation the fire department may need to use more than one hydrant!

Hopefully you have checked and cleaned your smoke/ fire alarms and Carbon Monoxide detectors and have updated them if they are older than 7 years old! There are some out now that will last 10 years so it is a good idea to date them before you install them and be sure to keep ice and snow away from any vents that exhaust your furnaces and hot water heaters as well!

Also, please be sure to check ice conditions before venturing out on the lakes and rivers for any winter activities.

One last reminder- please be sure to work with your children on their home address and phone numbers and work with them on Exit Drills In The Home (EDITH), keep lighters and other hazards in a cabinet or on a high shelf away from curious kids!

Have a fun and safe winter!

On behalf of the Governor, we are pleased to forward to you a grant agreement for financial assistance for your 2020 Clean Boats Clean Waters Project.**

We would like to remind anglers that invasive plants and animals can be spread while ice fishing. Take care to not transport bait, live fish, water and plants from one body of water to another.
