Appendix A State Environmental Quality Review FULL ENVIRONMENTAL ASSESSMENT FORM

Purpose: The full EAF is designed to help applicants and agencies determine, in an orderly manner, whether a project or action may be significant. The question of whether an action may be significant is not always easy to answer. Frequently, there are aspects of a project that are subjective or unmeasurable. It is also understood that those who determine significance may have little or no formal knowledge of the environment or may not be technically expert in environmental analysis. In addition, many who have knowledge in one particular area may not be aware of the broader concerns affecting the question of significance.

The full EAF is intended to provide a method whereby applicants and agencies can be assured that the determination process has been orderly, comprehensive in nature, yet flexible enough to allow introduction of information to fit a project or action.

Full EAF Components: The full EAF is comprised of three parts:

- Part 1: Provides objective data and information about a given project and its site. By identifying basic project data, it assists a reviewer in the analysis that takes place in Parts 2 and 3.
- Part 2: Focuses on identifying the range of possible impacts that may occur from a project or action. It provides guidance as to whether an impact is likely to be considered small to moderate or whether it is a potentially-large impact. The form also identifies whether an impact can be mitigated or reduced.
- Part 3: If any impact in Part 2 is identified as potentially-large, then Part 3 is used to evaluate whether or not the impact is

PART 1--PROJECT INFORMATION Prepared by Project Sponsor

NOTICE: This document is designed to assist in determining whether the action proposed may have a significant effect on the environment. Please complete the entire form, Parts A through E. Answers to these questions will be considered as part of the application for approval and may be subject to further verification and public review. Provide any additional information you believe will be needed to complete Parts 2 and 3.

It is expected that completion of the full EAF will be dependent on information currently available and will not involve new studies, research or investigation. If information requiring such additional work is unavailable, so indicate and specify each instance.

Description of Action:			

Please Complete Each Question--Indicate N.A. if not applicable

A. SITE DESCRIPTION

	Ph	nysical setting of overall project, both developed and undeveloped areas.					
	1.	Commercial	Residential (suburban)	Rural (non-farm)			
	2.	Total acreage of project area:acres.					
		APPROXIMATE ACREAGE	PRESENTLY	AFTER COMPLETION			
		Meadow or Brushland (Non-agricultural)	acres	acres			
		Forested	acres				
		Agricultural (Includes orchards, cropland, pasture, etc.)	acres	acres acres			
		Wetland (Freshwater or tidal as per Articles 24,25 of ECL)	acres				
		Water Surface Area	acres	acres			
		Unvegetated (Rock, earth or fill)		acres			
	1	Roads, buildings and other paved surfaces	acres	acres			
		Other (Indicate type)	acres	acres			
			acres	acres			
3.	٧	What is predominant soil type(s) on project site?					
	а	Coil draine					
			rately well drained% c	of site.			
	b. If any agricultural land is involved, how many serve of site						
	D	. If any agricultural land is involved, how many acres of soil are classific Classification System? acres (see 1 NYCRR 370).	ed within soil group 1 throug	gh 4 of the NYS Land			
4.	Α	re there bedrock outcroppings on project site? Yes No					
	а.	What is depth to bedrock (in feet)					
5.	Αŗ	pproximate percentage of proposed project site with slopes:					
	The state of the s	0-10%%	%				
6.							
7.	ls į	project substantially contiguous to a site listed on the Register of Nationa	Natural Landmarks?	Yes			
		nat is the depth of the water table?(in feet)		l Yes L No			
		site located over a primary, principal, or sole source aquifer?	es No				
10.[Dο	hunting, fishing or shell fishing opportunities presently exist in the projec		No			

11. Does project site contain any species of plant or animal life that is identified as threatened or endangered?
According to:
Identify each species:
12. Are there any unique or unusual land forms on the project site? (i.e., cliffs, dunes, other geological formations?
Yes No
Describe:
13. Is the project site presently used by the community or neighborhood as an open space or recreation area?
Yes No
If yes, explain:
14. Does the present site include scenic views known to be important to the community? Yes No
15. Streams within or contiguous to project area:
a. Name of Stream and name of Divor to which it is a
a. Name of Stream and name of River to which it is tributary
16. Lakes, ponds, wetland areas within or contiguous to project area:
16. Lakes, ponds, wetland areas within or contiguous to project area:
16. Lakes, ponds, wetland areas within or contiguous to project area:
16. Lakes, ponds, wetland areas within or contiguous to project area:
16. Lakes, ponds, wetland areas within or contiguous to project area: b. Size (in acres):

17. Is the site served by existing public utilities?							
a. If YES, does sufficient capacity exist to allow connection?							
b. If YES, will improvements be necessary to allow connection?	No						
18. Is the site located in an agricultural district certified pursuant to Agriculture and Markets Law, Arti 304? Yes No	icle 25-AA, Section 303 and						
19. Is the site located in or substantially contiguous to a Critical Environmental Area designated pursuand 6 NYCRR 617? Yes No	ant to Article 8 of the ECL,						
20. Has the site ever been used for the disposal of solid or hazardous wastes?	No						
B. Project Description							
Physical dimensions and scale of project (fill in dimensions as appropriate).							
a. Total contiguous acreage owned or controlled by project sponsor: acres.							
b. Project acreage to be developed:acres initially;acres ultimately.							
c. Project acreage to remain undeveloped: acres.							
d. Length of project, in miles: (if appropriate)	d. Length of project, in miles: (if appropriate)						
e. If the project is an expansion, indicate percent of expansion proposed%							
f. Number of off-street parking spaces existing; proposed							
g. Maximum vehicular trips generated per hour:(upon completion of project)?							
h. If residential: Number and type of housing units:							
One Family Two Family Multiple Family	Condominium						
Initially							
Ultimately							
i. Dimensions (in feet) of largest proposed structure: height; width;	length.						
j. Linear feet of frontage along a public thoroughfare project will occupy is?ft.							
2. How much natural material (i.e. rock, earth, etc.) will be removed from the site?tons/cubi	c yards.						
3. Will disturbed areas be reclaimed Yes No N/A							
a. If yes, for what intended purpose is the site being reclaimed?							
b. Will topsoil be stockpiled for reclamation? Yes No							
c. Will upper subsoil be stockpiled for reclamation? Yes No							
4. How many acres of vegetation (trees, shrubs, ground covers) will be removed from site?	acres						

5. Will any mature forest (over 100 years old) or other locally-important vegetation be removed by this project?
Yes No
6. If single phase project: Anticipated period of construction: months, (including demolition)
7. If multi-phased:
a. Total number of phases anticipated (number)
b. Anticipated date of commencement phase 1: month year, (including demolition)
c. Approximate completion date of final phase: month year.
d. Is phase 1 functionally dependent on subsequent phases? Yes No
8. Will blasting occur during construction? Yes No
9. Number of jobs generated: during construction; after project is complete
10. Number of jobs eliminated by this project
11. Will project require relocation of any projects or facilities? Yes No
If yes, explain:
12. Is surface liquid waste disposal involved? Yes No
h Name of water body into which affiliant all literatures and amount
13 le subsurface liquid moste dina et la
14. Will surface area of an existing water body increase or decrease by proposal? Yes No If yes, explain:
п усо, скрыт.
15 Is project or only particular of the state of the stat
15. Is project or any portion of project located in a 100 year flood plain? Yes No 16. Will the project generate solid waste? Yes No
a. If yes, what is the amount per month?tons
b. If yes, will an existing solid waste facility be used? Yes No
c. If yes, give name; location
d. Will any wastes not go into a sewage disposal system or into a sanitary landfill? Yes No

e. If yes, explain:
17. Will the project involve the disposal of solid waste? Yes No
a. If yes, what is the anticipated rate of disposal? tons/month.
b. If yes, what is the anticipated site life? years.
18. Will project use herbicides or pesticides? Yes No
19. Will project routinely produce odors (more than one hour per day)? Yes No
20. Will project produce operating noise exceeding the local ambient noise levels? Yes No
21. Will project result in an increase in energy use? Yes No
If yes, indicate type(s)
22. If water supply is from wells, indicate pumping capacity gallons/minute.
23. Total anticipated water usage per day gallons/day.
24. Does project involve Local, State or Federal funding? Yes No
If yes, explain:

Zoning and Planning Information				
Does proposed action involve a p		decision?	es No	
If Yes, indicate decision required:				
Zoning amendment	Zoning varia	nce	New/revision of master plan	Subdivision
Site plan	Special use	permit	Resource management plan	Other

C.

2	What is the zoning classification(s) of the site?
3.	What is the maximum potential development of the site if developed as permitted by the present zoning?
	, made by the present 20 ming:
4.	What is the proposed zoning of the site?
5.	What is the maximum potential development of the site if developed as permitted by the proposed zoning?
6.	Is the proposed action consistent with the recommended uses in adopted local land use plans?
,	
7.	What are the predominant land use(s) and zoning classifications within a ¼ mile radius of proposed action?
	the proposed action compatible with adjoining/surrounding land uses with a ¼ mile? Yes No
	the proposed action is the subdivision of land, how many lots are proposed?
а.	What is the minimum lot size proposed?

10. Will proposed action require any authorization(s) for the formation of sewer or water districts? Yes No					
11. Will the proposed action create a demand for any community provided services (recreation, education, police, fire protection? Yes No					
a. If yes, is existing capacity sufficient to handle projected demand? Yes No					
12. Will the proposed action result in the generation of traffic significantly above present levels?					
a. If yes, is the existing road network adequate to handle the additional traffic. Yes No					
D. Informational Details					
Attach any additional information as may be needed to clarify your project. If there are or may be any adverse impacts associated with your proposal, please discuss such impacts and the measures which you propose to mitigate or avoid them.					
E. Verification					
I certify that the information provided above is true to the best of my knowledge.					
Applicant/Sponsor Name Date

Title					

If the action is in the Coastal Area, and you are a state agency, complete the Coastal Assessment Form before proceeding with this assessment.

PART 2 - PROJECT IMPACTS AND THEIR MAGNITUDE

Responsibility of Lead Agency

General Information	(Read	Carefully)
---------------------	-------	------------

- In completing the form the reviewer should be guided by the question: Have my responses and determinations been 1 reasonable? The reviewer is not expected to be an expert environmental analyst.
- The Examples provided are to assist the reviewer by showing types of impacts and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site other examples and/or lower thresholds may be appropriate for a Potential Large Impact response, thus requiring evaluation in Part 3.
- The impacts of each project, on each site, in each locality, will vary. Therefore, the examples are illustrative and have been ł offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
- The number of examples per question does not indicate the importance of each question. !
- In identifying impacts, consider long term, short term and cumulative effects. !

Instructions (Read carefully)

- Answer each of the 20 questions in PART 2. Answer Yes if there will be any impact.
- Maybe answers should be considered as Yes answers. b.
- If answering Yes to a question then check the appropriate box(column 1 or 2)to indicate the potential size of the impact. If C. impact threshold equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
- Identifying that an Impact will be potentially large (column 2) does not mean that it is also necessarily significant. Any d. large impact must be evaluated in PART 3 to determine significance. Identifying an impact in column 2 simply asks that it be looked at further.
- If reviewer has doubt about size of the impact then consider the impact as potentially large and proceed to PART 3. e.
- If a potentially large impact checked in column 2 can be mitigated by change(s) in the project to a small to moderate f. impact, also check the Yes box in column 3. A No response indicates that such a reduction is not possible. This must be explained in Part 3.

			1 Small to Moderate Impact	2 Potential Large Impact	3 Can Impact Be Mitigated by Project Change

•	Proposed Action will create or eliminate employment.			Yes No
•	Other impacts:			Yes No
20. Is ti	here, or is there likely to be, public controversy related to potential verse environment impacts?			
auv	NO YES	1		

If Any Action in Part 2 Is Identified as a Potential Large Impact or If you Cannot Determine the Magnitude of Impact, Proceed to Part 3

Part 3 - EVALUATION OF THE IMPORTANCE OF IMPACTS

Responsibility of Lead Agency

Part 3 must be prepared if one or more impact(s) is considered to be potentially large, even if the impact(s) may be mitigated.

<u>Instructions</u> (If you need more space, attach additional sheets)

Discuss the following for each impact identified in Column 2 of Part 2:

- 1. Briefly describe the impact.
- 2. Describe (if applicable) how the impact could be mitigated or reduced to a small to moderate impact by project change(s).
- 3. Based on the information available, decide if it is reasonable to conclude that this impact is important.

To answer the question of importance, consider:

- ! The probability of the impact occurring
- ! The duration of the impact
- ! Its irreversibility, including permanently lost resources of value
- ! Whether the impact can or will be controlled
- ! The regional consequence of the impact
- ! Its potential divergence from local needs and goals
- ! Whether known objections to the project relate to this impact.
