

HOW TO FLUSH YOUR WATER HEATER

A helpful tip for Travis County MUD No. 2 residents

Easy Steps (Gas Water Heater)

*Recommended after discolored-water events to improve quality.
Austin-area hard water also builds sediment — flush yearly!*

1. Turn the cold-water supply valve OFF.
2. Turn the gas control to PILOT.
3. Open a hot-water faucet in the house.
4. Hook a garden hose to the tank drain.
5. Open the drain valve and empty the tank.
6. Turn the cold-water supply back ON.
7. Flush until the water runs clear.
8. Close the drain valve and refill the tank.
9. Turn the gas control back to ON.

For information only. Always follow your manufacturer's manual for your specific unit.

Safety first: shut off power/gas before starting. Not sure? Call a licensed plumber.
