### **WAUKESHA COUNTY PARKS AND LAND USE LAUNCHES NEW LAND INFORMATION SYSTEMS HUB**

**(Waukesha, WI)** – Waukesha County Department of Parks and Land Use is pleased to announce the launch of the Land Resources Division's new Land Information Systems Hub. The hub site enables the public to easily access various mapping applications, databases and other County information online. The hub will assist residents and businesses with planning, research, site selections, spatial analysis and land records.

"This new hub site conveniently connects users, in a variety of interest areas, to geographic information, data and other mapping applications," said Director of Parks and Land Use Dale Shaver. "It's also a great tool for exploring and discovering Waukesha County."

The Land Information Systems Hub features a collection of map-related applications built using ArcGIS Online that allow users the ability to explore and acquire GIS data. Some of these focused applications include road construction projects, home building resources, real estate purchasing and environmental conservation volunteer opportunities.

Several of the applications link to other internal County systems and databases to enable easier access to information and data. There are also story maps and dashboards describing various County projects, as well as an interactive map with links to surrounding county GIS systems.

The hub will be updated as new applications are created, so users are encouraged to visit often. It can be accessed at <https://www.waukeshacounty.gov/lis>

#### **About the Department of Parks & Land Use**

The Waukesha County Department of Parks and Land Use, working through a combination of collaboration, education and regulation is dedicated to fostering economic development, sound land use, and the protection, enhancement and enjoyment of the County's natural resources and health of its citizens.
