

#### SITE VISIT 5/18/23 Brent Smith, Sue Plant and Ned Swanberg (ANR)

Upon review of the parcel, identified area that should not hold graves or any permanent structures (along river beyond bank, area shaded in pale yellow on map above). Can remove some brush and trees in "watershed area", but leave most natural woodland to protect river bank. The upper field (shaded in pale green above) can be used for gravesites. Access could be in the center of upper field or/and on far left, to a flat open area (could be used for parking). Some honeysuckle was growing in watershed area and should be removed. Did see Coats Beard but not invasive (see picture). Can level out bumpy spots on upper field but not recommended to add gravel/soil to the area.
