NOTE: Permit to be issued to property owner only. Send permit to: (Check One) Owner: _____ Agent: _____

The work proposed under this permit will be completed by: _____

GENERAL REQUIREMENTS AND RESTRICTIONS FOR COUNTY DRIVEWAY PERMIT

1. The applicant represents all parties in interest, and that any driveway or approach constructed is for the bona-fide purpose of securing access to the property and not for the purpose of parking or servicing vehicles, or for advertising storage or merchandising of goods on the highway right-of-way.
2. The permittee shall furnish all materials, complete all the work and pay all costs in connection with the construction and maintenance of the driveway and its appurtenances on the right-of-way. Materials used, type and character of work shall be suitable for its intended purpose, and the type of construction shall be as designated and subject to approval of the Oconto County Highway Commission. The permittee shall make the installation without jeopardy to or interference with traffic using the highway. Highway surfaces, shoulders, ditches and vegetation disturbed shall be restored to equivalent or original condition by the permittee.
3. No revisions or additions shall be made to the driveway or its appurtenances on the right-of-way, without the written permission of the Oconto County Highway Department.
4. Oconto County Highway Department reserves the right to make such changes, additions and relocations within the statutory limits on the right-of-way as may at any time be considered necessary to permit the relocation, widening and maintaining of the highway, or to provide proper protection to life and property on the highway.
5. The applicant, his successors or assigns agrees to hold Oconto County, its agents and employees harmless against any action for personal injury or property damage sustained by reason or exercise of this permit.
6. The surface of the driveway connecting with rural-type highway sections shall slope down and away from the highway shoulder a sufficient amount and distance to preclude ordinary surface water drainage from the driveway area flowing onto the highway roadbed. The driveway shall not obstruct or impair drainage in highway side ditches or roadside areas. Driveway culverts, where necessary shall be adequate for surface water drainage along the highway and in no case less than the equivalent of a 18-inch diameter pipe in new or like new condition. (Size to be determined by County representative).
7. No non-commercial driveway or combination of driveways shall be a width less than 16 feet, nor greater than 24 feet measured at right angles to the centerline of the driveway. No commercial driveway shall be less than 16 feet or greater than 35 feet measured at right angles to the centerline of the driveway. On a typical curb cut section, use a measured opening of the driveway at right-of-way line or if sidewalk is to be placed, use the sidewalk like plus a 5-foot flair (Maximum) on each end of the driveway as the gutter line.
8. Oconto County Highway Department does not assume any responsibility for the removal or clearance of snow, ice or sleet or the opening of windows of such material, upon any portion of the driveway or entrance along any county highway, even though snow, ice or sleet is deposited or windrows on said driveway or entrance at the time engaged in normal winter maintenance operations.
9. Construction operation contemplated under the terms of this permit shall conform to all requirements for the specific class of work as may be set forth in the Wisconsin Statutes and to the regulations imposed by all legally empowered commission boards, or individuals having jurisdiction therein.
10. Driveway side slopes shall be of earth material only. No concrete, stone or bituminous side slopes shall be constructed. If enwalls are to be used on the culvert, the slope of the walls shall not be steeper than 3:1 slope and the elevation of the walls shall not protrude above the grade of the driveway.
11. A driveway shall be located and restricted as to width as necessary so that the entire driveway roadway and its appurtenances are contained within the frontage along the highway of the property served. At public highway intersections a driveway shall not provide direct ingress or egress to or from the public highway intersection area and shall not encroach on or occupy areas of the roadway or right-of-way deemed necessary for effective traffic control for highway signs or signals. A driveway shall be so located and constructed that vehicles approaching or using it will have adequate sight distance in both directions along the highway.
12. The number of driveways permitted serving a single property frontage along a county trunk highway shall be the minimum deemed necessary by the County Highway Commissioner for reasonable service to the property without undue impairment of safety, convenience, and utility of the highway.
13. Driveway culverts that exceed 100 feet in length may need intermediate manholes adequate for clean out purposes. (Specifications on manholes to be approved by Oconto County).
14. Oconto County reserves the right to correct any deficiencies that have not been addressed and shall charge all associated costs to the owner/applicant.
15. Any change in land use, which would generate greater traffic volumes, would nullify this agreement for access and a new application must be submitted.
16. This permit expires one year from the date of approval.
17. If a used pipe is to be used, it must be inspected by an Oconto County representative.
18. No culvert end or end wall shall be closer than 10 feet from adjoining property line whether owned by permit applicant or another property owner - no exceptions.

TO BE FILLED OUT BY OFFICE PERSONNEL
