

NOTICE: Electrical utility upgrades planned

Dear Neighbor:

A project is planned to rebuild the power line and structures, and install fiber on line Y-42 from the North Monroe Substation to the New Glarus Substation and line Y-208 from the New Glarus Substation to the Verona Substation.

In the coming weeks and months, you may see crews in the field locating existing utilities and performing environmental and engineering surveys or soil borings. Activities will take place within the utility corridor easement on or near your property.

Our records indicate you may own property along or near the planned power line project (*please see map on the other side*).

There is no disruption to your electric service expected during project construction.

If you have questions or if you'd like additional information about the project, please contact me at (608) 877-3541 or rhise@atcllc.com.

Thank you in advance for your patience and cooperation as we work to improve the reliability of the electric grid in your area.

Sincerely,

Rod Hise
ATC Local Relations

Thank you in advance for your cooperation!
