## **City of Olean Continues Work on Lead Service Line Inventory** **April 30 through May 3**

**April 30, 2025—Olean**—William J. Aiello, Mayor of the City of Olean, announced that the City is continuing its lead service line inventory partnering with General Dynamics Information and Technology. The project will take place from Wednesday, April 30, 2025 until Saturday, May 3, 2025 and will include homes in the north and east ends of the City. Four groups of contractors accompanied by a City of Olean representative will complete a comprehensive tour of the streets and ask to gain entry into homes to inspect the service line material at the water meter. Each visit should take about 3 to 5 minutes.

The contractors will only ask to inspect the water service line at the point where it enters the home; it may be in the basement or utility closet. If residents are not at home, a notice will be left on the door, allowing residents to reschedule at their convenience.

“The City Of Olean, as required by state and federal law, is working on a plan to replace all lead service lines as soon as possible and not later than 2037. The inventory will allow the City to properly fund this endeavor and apply for grants,” said Mayor Aiello. “We appreciate the help of our residents as we continue this project.”

If you have any questions, please feel free to call the Mayor’s office or Brad Camp, Water and Sewer Superintendent, at 716 376-5659.
