On November 22nd 2025 at approximately 6:15 p.m., the Olean Fire Department responded to a report of a structure fire at 401 W. Green Street. Multiple 911 calls were received as units were en route, prompting the request of a second alarm.

The first arriving unit reported smoke showing from the structure and initiated fire attack. Additional crews conducted searches of all floors, including the basement and attic, to ensure no occupants were inside and to check for any fire extension. All searches were negative.

Firefighters brought the fire under control within approximately 8 minutes, at 6:23 p.m. Crews then performed salvage and overhaul operations and ventilated the building using positive-pressure fans. No fire extension was found beyond the area of origin.

Olean Fire Department investigators were requested to the scene and completed their examination. The cause of the fire was determined to be accidental. No injuries were reported.
