On April 6, 2023, staff from WGNHS, DATCP, Portage County, and UW-Madison Extension will host a public roll-out of the Central Sands Nitrate and Neonicotinoid Study. This event will present the study results and the Groundwater Quality Resource Guide, as well as an overview of how DATCP and other state agencies are working together to address nitrate and neonicotinoid contamination of groundwater. Attendees can attend either in person or via the online weblink provided above. If you are not able to attend the meeting a recording of the meeting will be available via the Wisconsin Geological Natural History Survey Website.

Meeting hosted by:
