

Nov. 11, 2013

Sept. 9, 2025 Amended

Policy and fees regarding use of town owned equipment for snowplowing or grading of gravel in private driveways and field roads. Policy and fees pertain to all Town of Taft residents and landowners and those Town of Thorp landowners along the three miles of County Line Rd from State Hwy 73 west to Meridian Drive or Koser Ave.

Billing of snowplowing and grading of gravel are charged at the same rate. \$120 per hour \$2.00 per minute. A minimum of \$50 is required.

Non-residence or individuals not owning the property for which the service of the town owned equipment has been requested may be subject to a service fee of \$50 in addition to the regular fee rate.

Request for snowplowing of private driveways will be completed secondary to the town roads being plowed. Request for snowplowing of private driveways should also be made early during a considerable snowfall so that a list may be compiled to save time and money. Once the town roads and the list of requests for snowplowing of the private driveways have been completed and the town equipment has been shut down it will not go out on a private request unless it is an emergency. If going out on a private request, emergencies excluded, when the town equipment is not performing routine road maintenance the billing fee will begin at the time the equipment is started at the town garage and the billing time will end when the equipment returns to the town garage.

Requests and scheduling for services must be made with the Town Chairperson or the Town Clerk. Failure to do so may subject the individual to a service fee of \$50. And in addition to the regular fee rate.

All outstanding bill from previous snowplowing season must be paid in full before the Town of Taft will honor any new requests for snowplowing. No off-road work, field ditching, dirt work, or earth moving services will be performed with the town equipment. This current supersedes any policy or fee schedule previously recorded by the Town of Taft.
