

Mudhen Lake Rehabilitation Annual Board Meeting August 12, 2023

Open Meeting was called to order at Daniels Town Hall at 7:55 AM by Mitchell Otterson on Saturday, August 12, 2023. There were fifteen members in attendance. Proposed budget was discussed, including the increase for the annual budget. \$400 for the ILIDS camera and \$30 for the annual postcard creation and mailing. In addition, the fee of \$2602 for the Aquatic Plant Management Plan was discussed. It was confirmed that the Lake Management Plan account will have enough funds to pay for this when the invoice arrives in Dec.2024. It was also determined that Mike Orlikowski will update the financial reporting to align with the calendar year as opposed to beginning of the annual meeting each year.

Motion was made to adjourn the meeting by Mike Hoef. Chuck Awe seconded the motion. Motion carried. Meeting adjourned.

Annual Board Meeting was called to order at Daniels Town Hall at 8:10 AM by Mitchell Otterson on Saturday, August 12, 2023. There were twenty - five members in attendance.

I. Secretary's Report Mary Sagstetter read secretary's report. Motion was made to approve secretary's report by Chuck Awe. Mike Orlikowski seconded the motion. Motion carried.

II. Treasurers Report - Mike Orlikowski reported the following balances:

Beginning Balance - Checking \$3161.92 / Savings \$8717.39 for a total of \$11,879.31

Expense paid of \$2800 - ILIDS/ Additional ILIDS Charge/ Post Card Fee

\$300 was moved from Checking to Savings.

.92 cents was accrued in interest

\$9 analysis services charge

Ending Balances - Checking \$652.92 / Savings \$11,218.31 for a total of \$11,871.23

Discussed increases in fee of \$730 for ILIDS and internet fee for this upcoming year.

Motion was made to approve treasurer's report by Mike Hoef. Chuck Awe seconded the motion. Motion carried.

III. Old Business

A. Lake Update

1. ILIDS Report – Total launches since the April 2023 installation totals 273. One potential violation was noted on 5/28/23. Process is to notify DNR. DNR then contacts to provide education for first offense and if second occurs a fine would be issued. During the time period of June 19 – June 24 there was no camera recordings due to the weeds being in front of the camera. It is important to check the landing to make sure the camera is clear of weeds. Thanks to Mike Huber and the Heintz's for assisting with the weed removal. As for the videos- nothing remarkable was noted. Read the specific notes on line or in the minutes.

Discussion occurred as to the cost of this ILIDS service and the value we are receiving. Options were offered from remaining on the same course with Environmental Sentry Protection to seeking another

company to taking this back and moving to a trail camera and then video viewing could be as a volunteer or paid opportunity. It is felt that the current plan keeps honest people honest and acts like a security guard. It was determined the current plan will remain. Mitch Otterson will check into the message that is being shared with boaters to see if we can add to use the wash station. He also will look into the changing the viewing area as it may be advantageous to also see who is washing their boats. Mitch stated the goal would be to look for grants to assist with the funding. This topic will be revisited at future meetings.

2. Lake Monitoring – Ten clarity readings have been taken from this May thru the end of July and submitted to the SWIMS WI DNR site:

May – 23 ft

June - 14 feet /13 feet

July – 12 ft / 11 ft / 11 ½ ft / 11 ft / 10 ft

Scott Stennes also has submitted the dissolved oxygen readings to the SWIMS site.

3. Purple Loosestrife –Dan Heinz stated the Purple Loosestrife is blooming. The eradication of the Purple Loosestrife from Mudhen Lake will be:

Date: Saturday, August 19, 2023

Time: 8 AM

Meeting Location: Dan Heintz's house - 9663 N. Mudhen Lake Dr.

Volunteers should plan to stay for a light lunch and conversation after at the Heintz's house

4. Online Meetings – Discussion occurred regarding making On-line meetings available for the Board and Annual Mudhen Lake Rehab District meetings. Comments shared included:

- Current available technology is not totally understood.
- The Board cannot manage this task it would have to be managed by a volunteer member.
- A member could record the meeting and then post on the Mudhen Lake Facebook page as these are public meetings.
- Website option offered.
- Website option would cost money and need to be managed.

Current format of in-person meetings only and the meeting notes being sent after the meetings and then posted once approved will continue.

5. Meeting Time – Discussion occurred as to changing the time of the meeting from 8 AM to a later time. Motions requested to be deferred until Public Comments section in agenda.

IV. New Business

A. Tamarack Lake Survey Report / Lake Level – The elevation of the Mudhen Lake, taken on June 28, 2023 was 97.1. Historical data has been included in the report. It was noted that this was the same level as the previous year. Discussion occurred as to the timing of the lake level reading and if this should change as the information present at the annual meeting is information of the lake level in June and not currently being experienced in August. Comments shared included:

- It is important to continue with the June reading each year as that is the date that is used for comparison over time
- Three data points for readings requested – Ice out- June and prior to August meeting
- What is the purpose of more readings? Would there be an actionable item.
- Sometimes more information could be confusing
- Other factors come into play - rainfall, lack of rainfall, etc.
- Staff gauge could be added to the lake for monitoring
- No official lake level has been recorded by the DNR for Mudhen Lake _ Per Mitch Otterson
- Is the lake a seepage or spring fed- DNR lists as a seepage lake – yet there are springs on the lake

Result: Current timing of the lake level reading by Tamarac Land Surveying will remain the same.

B. Annual Financial Audit - The Mudhen lake Rehab District books were audited by Denise and Jerry Fedie and both checking and saving financials were found to be in order. Signed certification will be included in the meeting minutes.

C. Approve Budget – Mike Orlikowski explained the proposed budget of \$5430. Increases from previous year are \$400 for the ILIDS internet and \$30 for the creation and mailing of the annual meeting postcard.

Tamarack Land Surveying Lake Level Reading	Expense	\$300.00
Burnett County Lakes & Rivers	Dues	\$50.00
Secretary	Meeting Expenses	\$180.00
Environmental Sentry Protection	Camera at Landing	\$2,900.00
Burnett County Land & Water	Donation	\$150.00
Lake Mapping	APM report	\$500.00
Emergency Fund	Replenishment	\$1350.00
Total		\$5430.00

Motion was made to accept the proposed budget by Mike Hoef. Chuck Awe seconded the motion. Motion carried.

D. Vote for Board Member Position – Mike Orlikowski submitted his letter of intent to run for this position by the July 1, 2023 deadline. Since he was the only one to submit, Mike ran unopposed. The Board welcomed him to continue in this position for the next 3 years.

E. Public Comments

1. A motion was made by Pete Kujawa to have future meeting at 8 AM, Mike Huber seconded the motion. Grant Wilhem amended the motion to move the meeting time to 8:30 AM, Deb Luzinski seconded the motion. A show of hands vote was taken, the 8 AM meeting time will remain for future meetings.

2. Question was asked as to the results of the second part of the feasibility study. This study is still in progress and will be shared at the Oct. 14, 2023 meeting. It was clarified that the original study was initially at a \$25,000 price point, so only a partial study was completed which cost \$6000. The second part of the study will cost approx. \$8000. Mitchell shared at the June 2023 meeting that a group of concerned lake citizens have offered to donate the funds towards the completion of the study. At that meeting, Chuck Awe suggested that the group donate the funds to the Mudhen Lake Rehabilitation

District and the Board would then pay for the completion of the Feasibility Study. This allows the report to belong to the Mudhen Lake Rehabilitation District. To date the donated funds total \$6510.00. donations are still being accepted, if interested in joining the effort, please email mps1300@aol.com.

3. A request was made to see the invoice for the initial part of the Feasibility study. All information and documents are public. So, it is possible to view the records at the meeting or request to view at a later date.

Motion was made to adjourn the meeting by Mike Hoef. Chuck Awe seconded the motion. Motion carried. Meeting adjourned.

Respectfully Submitted by Mary Sagstetter, Mudhen Lake Secretary

Videos Captured

Videos Reviewed by ESP

Total Videos Reviewed

Launches counted

% of boat launch videos ¹

Suspect AIS Violations

Hours of operation

Total hours of inspection time

Observations:**Recommendations:**

Total launches since installation in April = 273

One potential violation - process - education

6-19-6-24 - no videos due to long weeds

Nothing remarkable in the notes re: video reviewed
- feel free to read online or in the minutes when sent out

¹ The number of videos is always greater than the number of launches. If there is a magnetic sensor, it will trigger the camera to look for motion for 120 seconds. During this time, any activity (inspection, tie-downs, people moving, cloud movement, etc.) in front of the camera will trigger another video. Infrequently, the magnetic sensor may trigger randomly, or vehicle movement behind the sensor may set up the camera for additional video capture. If there's no magnetic sensor, the camera simply looks for sufficient motion and will capture a video.

July 19, 2023

Mary Sagstetter
Mud Hen Lake Association Secretary

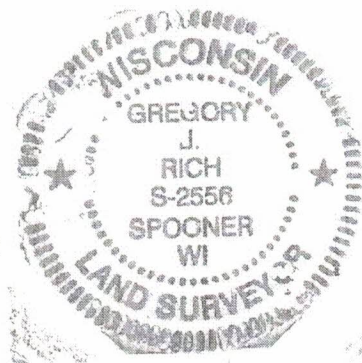

Dear Mary,

On June 28, 2023, the elevation of Mud Hen Lake was 97.1 feet based on DNR benchmark 771-D near Lindberg Park. The DNR bench is a brass cap set in a concrete post with an assumed elevation of 103.1 feet (this is a local datum). The water elevation converted to the NAVD88 datum is 969.3 feet. The historic lake level data is included in the table on page 2 in both datums.

In addition, I wanted to note that due to apparent recent construction activity near the DNR bench at the park, we included a check into the Burnett County Benchmark "MudHen Lake #1" to verify that the DNR benchmark was not disturbed. This check confirmed the DNR benchmark was undisturbed.

Sincerely,

Gregory J. Rich

Hi Mary,

When I asked Tom Swenson if he could do the field work for this he had indicated, based on observation in passing by the site, there had been some recent grading or brush removal/cleanup in the area of the benchmark and was concerned it may have been hit, and if it was, it could be an issue with future data or surveyors unknowingly using that benchmark. When we spoke on the phone I said we were concerned it may have been disturbed and the only way to check it was to re-level back into the county monument to the south. We had leveled between those 2 benchmarks when Tamarac Land Surveying took over this project years ago. The reason why we originally leveled between them was so that we could show the data in both Datums. Both datums being the local assumed DNR datum (which has historical data referenced to it) as well as the NAVD88 datum which is a national datum that all of the FEMA data and County GIS data is referenced to and a datum that will be much more useful for future use. Tom did level between the benchmarks when he did the work on June 28th and verified the DNR benchmark was not disturbed.

I attached a pdf of the updated data with the units on the table and your name in the header.

Sincerely,

Greg

Hi Greg -

Thank you for the conversation today.

I appreciate this information as well.

BTW - you mentioned that the survey marker was disturbed to me and then the letter states it was not and does not mention the other marker that you said Tom took the level from.

Can you please review the attached letter and clarify?

I appreciate the follow - up.

If the letter is to be edited in any way - please remove Kandice Unger's name. I will be the contact and our new chairperson is Mitchell Otterson.

Many thanks

Mary Sagstetter

Hi Mary,

I already created pdf's of the data and Megan has it and will be sending it but after our discussion I noticed the data does not include the units it is reported in. I can see why you asked about that and how that would be confusing to non-surveyor or engineer folks so in the spreadsheet, for future outputs, I will include the unit designation in the header.

I wanted to follow up on this as it is fairly important if you have others reading elevations in inches and comparing it to decimal feet. Survey and engineering data is almost always reported in feet and decimal feet. You can convert between decimal feet and inches by multiplying or dividing by 12.... 12" in a foot or $12" = 1.00'$

A good/easy example is 6" (inches) is half a foot (0.50'). If you divide 6" by 12 you get 0.50' or you can multiply 0.50 feet by 12 and you get 6".

Sincerely,

Greg
