Village of Barneveld Resident,

Please review the attached information the EPA is **requiring** the Village of Barneveld to mail to all residents that did not complete the water survey or who answered the water survey as “unknown” service line material.

The Village of Barneveld is working to identify all service line materials throughout the water system. We are under the assumption that our city service lines are lead free, however, we need your assistance to verify that at your residence.

To help us determine the material of your service line please fill out the survey. You may access the survey by the QR code/website. Use the attached information to help identify your service line material.

Thank you for your time!

The Village of Barneveld  
Public Works Department
