Mr. Bohnsack explained the storm sewer problem in the Ossman Acres area and the boards investigation into the possibility of diverting the water drainage into a southerly route through a part of Mr. Pflaum's farm. Mr. Bohnsack stated that the board members were interested in obtaining either an easement or purchasing some land or possibly paying some damages for the privilege of obtaining this southerly route. Mr. Pederson explained how this could be handled to best advantage at the present. Mr. Bohnsack explained that the board would have to abandon about 7,000 to 8,000 dollars work if they were required to go in a northerly direction at this time and that they were interested in spending this amount to go in the proper direction.

Y2-P208

Mr. Pflaum agreed that a southerly direction seemed most plausible but that he would like to have the board give some consideration to Mr. Martin, the farm owner immediately south, also. Mr. Pflaum also requested that the town furnish him with the amount of water which would added to his land over and above the amount which ran there prior to that time. This was to be computed under average normal conditions. He also requested the size of open ditch needed. Mr. Pederson was instructed to get this information from the engineer.

Special Meeting

7:30 P.M.

July 24, 1957

All board members present, also Messrs. Phil Pederson, Entwistle, Christian and Howard Pflaum.

V2-P.88 Mr. Pederson explained the survey that has been made and that the estimate of additional water on Pflaum property would be about two times as much as at present, but that this water would be taken away faster at the south end. He stated that Mr. Gerhardt had requested only an open ditch on his property and that at the Pflaum property it could be a shallow sloping ditch which could be seeded to prevent erosion. An estimate of a 2 rod ditch would take about 4 acres of land out of cultivation. Mr. Pederson stated that it might be necessary to install a 36" storm sewer to get the water along Pflaum Road to the drainage ditch, and that the drainage ditch might have to be cleaned, but that he had not contacted the Martins regarding this.

Mr. Pederson stated that Mr. Gerhardt requested that only an agreement be made in writing rather than a permanent easement in order to permit the storm sewer to be placed in its proper place when the land is developed. Mr. Pflaum thought he would prefer a similar agreement. ✓ V2-P111

Mr. Pflaum stated that he would be out of town until August 4, but that he would call Saturday Morning, July 24 if they would permit the town to start immediately. ✓

The board members authorized Mr. Pederson to get estimates on cleaning out the drainage ditch on the Martin Farm and also to contact Mr. Martin. ✓ V2-P.173

each operator shall give to the other at least one-half of the main traveled portion of the roadway as nearly as possible.

6.23 Overtaking and Passing on the Left. The following rules govern the overtaking and passing of vehicles proceeding in the same direction, subject to those limitations, exceptions and special rules stated in Sections 346.08 to 346.11, Wisconsin Statutes of 1957:

(1) The operator of an overtaking motor vehicle not within a business or residence district shall give audible warning with his warning device before passing or attempting to pass on the left a vehicle proceeding in the same direction.

(2) The operator of a vehicle overtaking another vehicle proceeding in the same direction shall pass to the left thereof at a safe distance and shall not again drive to the right side of the roadway until safely clear of the overtaken vehicle.

(3) Except when overtaking and passing on the right is permitted, the operator of an overtaken vehicle shall give way to the right in favor of the overtaking vehicle on audible signal and shall not increase the speed of his vehicle until completely passed by the overtaking vehicle.

6.24 When Overtaking and Passing on the Right Permitted. The operator of a vehicle may overtake and pass another vehicle upon the right only under conditions permitting such movement in safety and only if he can do so without driving off the pavement or main-traveled portion of the roadway, and then only under the following conditions:

(1) When the vehicle overtaken is making or about to make a left turn; or

(2) Upon a street or highway with unobstructed pavement of sufficient width to enable 2 or more lines of vehicles lawfully to proceed,

each operator shall give to the other at least one-half of the main traveled portion of the roadway as nearly as possible.

§ 23. Overtaking and Passing on the Left. The following rules govern the overtaking and passing of vehicles proceeding in the same direction, subject to those limitations, exceptions and special rules stated in Sections 346.08 to 346.11, Wisconsin Statutes of 1957:

(1) The operator of an overtaking motor vehicle not within a safe zone or reasonable distance shall give audible warning with his warning device before passing or attempting to pass on the left a vehicle proceeding in the same direction.

(2) The operator of a vehicle overtaking another vehicle proceeding in the same direction shall pass to the left thereof at a safe distance and shall not again drive to the right side of the roadway until safely clear of the overtaken vehicle.

(3) Except when overtaking and passing on the right is permitted, the operator of an overtaken vehicle shall give way to the right in favor of the overtaking vehicle on audible signal and shall not increase the speed of his vehicle until completely passed by the overtaking vehicle.

§ 24. When Overtaking and Passing on the Right Permitted. The operator of a vehicle may overtake and pass another vehicle upon the right only under conditions permitting such movement in safety and only if he can do so without driving off the pavement or main-traveled portion of the roadway, and then only under the following conditions:

(1) When the vehicle overtaken is making or about to make a left turn; or

(2) Upon a street or highway with unobstructed pavement of sufficient width to enable 5 or more lanes of vehicles lawfully to proceed,

at the same time, in the direction in which the passing vehicle is proceeding; or

(3) Upon a one-way street or divided highway with unobstructed pavement of sufficient width to enable 2 or more lines of vehicles lawfully to proceed in the same direction at the same time.

6.25 Limitations on Overtaking on Left or Driving on Left Side of Roadway.

(1) Upon any roadway where traffic is permitted to move in both directions simultaneously, the operator of a vehicle shall not drive to the left side of the center of the roadway in overtaking and passing another vehicle proceeding in the same direction unless such left side is clearly visible and is free of oncoming traffic for a sufficient distance ahead to permit such overtaking and passing to be done in safety. In no case when overtaking and passing on a roadway divided into 4 or more clearly indicated lanes shall the operator of a vehicle drive to the left of the pavement marking indicating allocation of lanes to vehicles moving in the opposite direction or, in the absence of such marking, to the left of the center of the roadway. In no case shall the operator of a vehicle drive in a lane when signs or signals indicate that such lane is allocated exclusively to vehicles moving in the opposite direction.

(2) Upon any roadway where traffic is permitted to move in both directions simultaneously, the operator of a vehicle shall not drive on the left side of the center of the roadway upon any part of a grade or upon a curve in the roadway where the operator's view is obstructed for such a distance as to create a hazard in the event another vehicle might approach from the opposite direction.

at the same time, in the direction in which the passing vehicle is proceeding or

(2) Upon a one-way street or divided highway with unobstructed

pavement of sufficient width to enable 2 or more lines of vehicles

lawfully to proceed in the same direction at the same time.

6.25 Limitations on Overtaking on Left or Driving on Left Side of Highway.

(1) Upon any roadway where traffic is permitted to move in both

directions simultaneously, the operator of a vehicle shall not drive to

the left side of the center of the roadway in overtaking and passing

another vehicle proceeding in the same direction unless such left side

is clearly visible and is free of oncoming traffic for a sufficient

distance ahead to permit such overtaking and passing to be done in

safety. In no case when overtaking and passing on a roadway divided

into 4 or more clearly indicated lanes shall the operator of a vehicle

drive to the left of the pavement marking indicating allocation of

lanes to vehicles moving in the opposite direction or, in the absence

of such marking, to the left of the center of the roadway. In no case

shall the operator of a vehicle drive in a lane when signs or signals

indicate that such lane is allocated exclusively to vehicles moving in

the opposite direction.

(2) Upon any roadway where traffic is permitted to move in both

directions simultaneously, the operator of a vehicle shall not drive on

the left side of the center of the roadway upon any part of a grade or

upon a curve in the roadway where the operator's view is obstructed

for such a distance as to create a hazard in the event another vehicle

might approach from the opposite direction.

(3) The operator of a vehicle shall not drive on the left side of the center of a roadway on any portion thereof which has been designated a no-passing zone, either by signs or by a yellow unbroken line on the pavement on the right-hand side of and adjacent to the center line of the roadway, provided such signs or lines would be clearly visible to an ordinarily observant person.

6.26 When Passing at Railroad Crossing or Intersection Prohibited.

(1) The operator of a vehicle shall not overtake and pass any other vehicle proceeding in the same direction at any railroad crossing unless the roadway is of sufficient width for 2 or more lines of vehicles to lawfully proceed simultaneously in the direction in which such vehicle is proceeding or unless permitted or directed by a traffic officer to pass at such crossing.

(2) Subject to the exception stated in sub. (3), the operator of a vehicle shall not overtake and pass any other vehicle proceeding in the same direction at any intersection unless the roadway is marked or posted for 2 or more lines of vehicles moving simultaneously in the direction in which such vehicle is proceeding or unless permitted or directed by a traffic officer to pass at such intersection.

(3) Outside of a business or residence district, the restrictions which sub. (2) places upon passing at an intersection apply only if such intersection has been designated by an official traffic sign or signal, regardless of whether such sign or signal was intended to guide, direct, warn or regulate traffic.

6.27 Passing or Meeting Frightened Animal. Whenever a person riding, driving or leading an animal which is frightened gives a signal of distress to the operator of a motor vehicle by a raising of the hand or otherwise, the operator of the motor vehicle shall promptly stop his

vehicle unless a movement forward is necessary to avoid an accident or injury and shall, upon request, stop all motive power until such animal is under control.

6.28 Driving Through Safety Zones Prohibited. The operator of a vehicle shall not at any time drive through or over a safety zone when such safety zone is clearly indicated.

6.29 Driving on Roadways Laned for Traffic. Whenever any roadway has been divided into 2 or more clearly indicated lanes, including those roadways divided into lanes by clearly indicated longitudinal joints, the following rules, in addition to all others consistent with this section, apply:

(1) The operator of a vehicle shall drive as nearly as practicable entirely within a single lane and shall not deviate from the traffic lane in which he is driving without first ascertaining that such movement can be made with safety to other vehicles approaching from the rear.

(2) Upon a 2-way roadway which is divided into 3 lanes the operator of a vehicle shall not drive in the center lane except when overtaking and passing another vehicle where the roadway is clearly visible and such center lane is clear of traffic within a safe distance, or in preparation for a left turn, or where such center lane is at the time allocated exclusively to traffic moving in the direction the vehicle is proceeding and is marked or posted to give notice of such allocation.

(3) Notwithstanding sub. (2), when lanes have been marked or posted for traffic moving in a particular direction or at designated speeds, the operator of a vehicle shall drive in the lane designated.

6.30 Distance Between Vehicles.

(1) The operator of a motor vehicle shall not follow another

vehicle unless a movement forward is necessary to avoid an accident or injury and shall, upon request, stop all motive power until such vehicle is under control.

6.28 Driving Through Safety Zones Prohibited. The operator of a vehicle shall not at any time drive through or over a safety zone when such safety zone is clearly indicated.

6.29 Driving on Roadways Lanes for Traffic. Whenever any roadway has been divided into 2 or more clearly indicated lanes, including those roadways divided into lanes by clearly indicated longitudinal joints, the following rules, in addition to all others consistent with this section, apply:

(1) The operator of a vehicle shall drive as nearly as practicable entirely within a single lane and shall not deviate from the traffic lane in which he is driving without first ascertaining that such movement can be made with safety to other vehicles approaching from the rear.

(2) Upon a 2-way roadway which is divided into 2 lanes the operator of a vehicle shall not drive in the center lane except when overtaking and passing another vehicle where the roadway is clearly visible and such center lane is clear of traffic within a safe distance, or in preparation for a left turn, or where such center lane is at the time allocated exclusively to traffic moving in the direction the vehicle is proceeding and is marked or posted to give notice of such allocation.

(3) Notwithstanding sub. (2), when lanes have been marked or posted for traffic moving in a particular direction or so designated speeds, the operator of a vehicle shall drive in the lane designated.

6.30 Distance Between Vehicles.

(1) The operator of a motor vehicle shall not follow another

vehicle more closely than is reasonable and prudent, having due regard for the speed of such vehicle and the traffic upon and the condition of the highway.

(2) Upon a highway outside a business or residence district, the operator of any motor truck with a gross weight of more than 10,000 pounds or of any motor vehicle which is drawing or towing another vehicle where the combined gross weight is more than 10,000 pounds shall keep the vehicle he is operating at a distance of not less than 500 feet to the rear of any vehicle immediately preceding it, being driven in the same direction. This subsection does not apply upon any lane especially designated for use by motor trucks or by truck tractor-semi-trailer or tractor-trailer units nor does it apply when overtaking and passing another vehicle, but the fact that the operator of any vehicle or combination of vehicles mentioned in this subsection follows the preceding vehicle more closely than 500 feet for one mile or more or follows more closely than 500 feet when the preceding vehicle is moving at the maximum speed then and there permissible for such following vehicle is prima facie evidence that the operator of such following vehicle is violating this subsection.

#### Right of Way

##### 6.31 General Rules of Right of Way.

(1) GENERAL RULE AT INTERSECTIONS. Except as otherwise expressly provided in this section or in Section 346.19 or 346.20 of the Wisconsin Statutes of 1957, when 2 vehicles approach or enter an intersection at approximately the same time, the operator of the vehicle on the left shall yield the right of way to the vehicle on the right. The operator of any vehicle driving at an unlawful speed forfeits any right of way which he would otherwise have under this subsection.

vehicle more closely than is reasonable and prudent, having due regard for the speed of such vehicle and the traffic upon and the condition of the highway.

(2) Upon a highway outside a business or residence district, the

operator of any motor truck with a gross weight of more than 10,000 pounds or of any motor vehicle which is drawing or towing another vehicle where the combined gross weight is more than 10,000 pounds shall keep the vehicle he is operating at a distance of not less than 500 feet to the rear of any vehicle immediately preceding it, being driven in the same direction. This subsection does not apply upon any lane especially designated for use by motor trucks or by truck tractor-trailer or tractor-trailer units nor does it apply when overtaking and passing another vehicle, but the fact that the operator of any vehicle or combination of vehicles mentioned in this subsection follows the preceding vehicle more closely than 500 feet for one mile or more or follows more closely than 500 feet when the preceding vehicle is moving at the maximum speed then and there permissible for such following vehicle is prima facie evidence that the operator of such following vehicle is violating this subsection.

#### Right of Way

##### 6.31 General Rules of Right of Way.

(1) GENERAL RULE AT INTERSECTIONS. Except as otherwise expres-

ly provided in this section or in Section 306.19 or 306.20 of the Wisconsin Statutes of 1957, when 2 vehicles approach or enter an intersection at approximately the same time, the operator of the vehicle on the left shall yield the right of way to the vehicle on the right. The operator of any vehicle driving at an unlawful speed forfeits any right of way which he would otherwise have under this subsection.

(2) TURNING LEFT AT INTERSECTION. The operator of a vehicle within an intersection intending to turn to the left across the path of any vehicle approaching from the opposite direction shall yield the right of way to such vehicle.

(3) RULE AT INTERSECTION WITH THROUGH HIGHWAY. (4) ENTERING HIGHWAY FROM ALLEY OR NON-HIGHWAY ACCESS. The operator of a vehicle entering a highway from an alley or from a point of access other than another highway shall yield the right of way to all vehicles approaching on the highway which he is entering.

(5) MOVING FROM PARKED POSITION. The operator of any vehicle that has been parked or standing shall, while moving such vehicle from such position, yield the right of way to all vehicles approaching on the highway.

6.32 What to do on Approach of Emergency Vehicle.

(1) Upon the approach of any authorized emergency vehicle giving audible signal by siren the operator of a vehicle shall yield the right of way and shall immediately drive such vehicle to a position as near as possible and parallel to the right-hand edge or curb of the roadway, clear of any intersection and, unless otherwise directed by a traffic officer, shall stop and remain standing in such position until the authorized emergency vehicle has passed.

(2) This section does not relieve the operator of an authorized emergency vehicle from the duty to drive with due regard under the circumstances for the safety of all persons using the highway.

(2) TURNING LEFT AT INTERSECTION. The operator of a vehicle within an intersection intending to turn to the left across the path of any vehicle approaching from the opposite direction shall yield the right of way to such vehicle.

(3) BULK AT INTERSECTION WITH THROUGH HIGHWAY. 6.32. What to do on Approach of Emergency Vehicle.

(1) Upon the approach of any authorized emergency vehicle giving audible signal by siren the operator of a vehicle shall yield the right of way and shall immediately drive such vehicle to a position as near as possible and parallel to the right-hand edge or curb of the roadway, clear of any intersection and, unless otherwise directed by a traffic officer, shall stop and remain standing in such position until the authorized emergency vehicle has passed.

(2) This section does not relieve the operator of an authorized emergency vehicle from the duty to drive with due regard under the circumstances for the safety of all persons using the highway.

6.33 Right of Way of Funeral Processions.

(1) Funeral processions have the right of way at intersections when vehicles comprising such procession have their bright headlights lighted, subject to the following conditions and exceptions:

(a) Operators of vehicles in a funeral procession shall yield the right of way in accordance with Section 346.19, Wisconsin Statutes of 1957, upon the approach of an authorized emergency vehicle giving audible signal by siren;

(b) Operators of vehicles in a funeral procession shall yield the right of way when directed to do so by a traffic officer;

(c) The operator of the leading vehicle in a funeral procession shall comply with stop signs and traffic control signals, but when the leading vehicle has proceeded across an intersection in accordance with such signal or after stopping as required by the stop sign, all vehicles in such procession may proceed without stopping, regardless of the sign or signal.

(2) The operator of a vehicle not in the funeral procession shall not drive his vehicle between the vehicles of the funeral procession, except when authorized to do so by a traffic officer or when such vehicle is an authorized emergency vehicle giving audible signal by siren.

(3) Operators of vehicles not a part of a funeral procession shall not form a procession and have their headlights lighted for the purpose of securing the right of way granted by this section to funeral processions.

6.34 Right of Way of Livestock. The operator of a motor vehicle shall yield the right of way to livestock being driven over or along any highway but any person in charge of such livestock shall use reasonable care and diligence to open the roadway for vehicular traffic.

8.33. Right of Way of Funeral Processions.

- (1) Funeral processions have the right of way at intersections when vehicles comprising such procession have their bright headlights lighted, subject to the following conditions and exceptions:
- (a) Operators of vehicles in a funeral procession shall yield the right of way in accordance with Section 346.19, Wisconsin Statutes of 1957, upon the approach of an authorized emergency vehicle giving audible signal by siren;
- (b) Operators of vehicles in a funeral procession shall yield the right of way when directed to do so by a traffic officer;
- (c) The operator of the leading vehicle in a funeral procession shall comply with stop signs and traffic control signals, but when the leading vehicle has proceeded across an intersection in accordance with such signal or after stopping as required by the stop sign, all vehicles in such procession may proceed without stopping, regardless of the sign or signal.
- (2) The operator of a vehicle not in the funeral procession shall not drive his vehicle between the vehicles of the funeral procession, except when authorized to do so by a traffic officer or when such vehicle is an authorized emergency vehicle giving audible signal by siren.
- (3) Operators of vehicles not a part of a funeral procession shall not form a procession and have their headlights lighted for the purpose of securing the right of way granted by this section to funeral processions.
- 8.34. Right of Way of Livestock. The operator of a motor vehicle shall yield the right of way to livestock being driven over or along any highway but any person in charge of such livestock shall use reasonable care and diligence to open the roadway for vehicular traffic.

6.35 Persons Working on Highway. The operator of a vehicle shall yield the right of way to persons engaged in maintenance or construction work on a highway whenever he is notified of their presence by flagmen or warning signs.

Turning and Stopping and Required Signals

6.36 Required Position and Method of Turning At Intersections.

(1) TURNS INDICATED BY MARKERS. Where state or local authorities have placed markers, buttons or signs within or adjacent to an intersection directing traffic turning at such intersection to follow a particular course, the operator of a vehicle turning at such intersection shall comply with such directions. In the absence of such markers, buttons or signs, the operator of a vehicle intending to turn at an intersection shall do as provided in subs. (2) to (4).

(2) RIGHT TURNS. Both the approach for a right turn and the right turn shall be made as closely as practicable to the right-hand edge or curb of the roadway. If, because of the size of the vehicle or the nature of the intersecting roadway, the turn cannot be made from the traffic lane next to the right-hand edge of the roadway, the turn shall be made with due regard for all other traffic.

(3) LEFT TURNS. Except as otherwise provided in sub. (4), left turns at intersections shall be made as follows:

(a) The approach for a left turn shall be made in that lane farthest to the left which is lawfully available to traffic moving in the direction of travel of the vehicle about to turn left. Unless otherwise marked or posted, this means the lane immediately to the right of the center line or center dividing strip of a 2-way highway and the lane next to the left-hand curb or edge of the roadway of a one-way highway.

6.35 Persons Working on Highway. The operator of a vehicle shall yield the right of way to persons engaged in maintenance or construction work on a highway whenever he is notified of their presence by flagman or warning signs.

Turning and Stopping and Redefined Signals

6.36 Redefined Position and Method of Turning At Intersections.

(1) TURNS INDICATED BY MARKERS. Where state or local authorities

have placed markers, buttons or signs within or adjacent to an inter-

section directing traffic turning at such intersection to follow a

particular course, the operator of a vehicle turning at such intersection

shall comply with such directions. In the absence of such markers,

buttons or signs, the operator of a vehicle intending to turn at an

intersection shall do as provided in sub. (2) to (4).

(2) RIGHT TURNS. Both the approach for a right turn and the right

turn shall be made as closely as practicable to the right-hand edge or

curb of the roadway. If, because of the size of the vehicle or the na-

ture of the intersecting roadway, the turn cannot be made from the first

lane next to the right-hand edge of the roadway, the turn shall be

made with due regard for all other traffic.

(3) LEFT TURNS. Except as otherwise provided in sub. (4), left

turns at intersections shall be made as follows:

(a) The approach for a left turn shall be made in that lane

farthest to the left which is lawfully available to traffic moving

in the direction of travel of the vehicle about to turn left. Use

of lanes otherwise marked or posted, this means the lane immediately to

the right of the center line or center dividing strip of a 2-way

highway and the lane next to the left-hand curb or edge of the road-

way of a one-way highway.

(b) The intersection shall be entered in the lane of approach and, whenever practicable, the left turn shall be made in that portion of the intersection immediately to the left of the center of the intersection. For the purposes of this paragraph, a divided highway intersected by any other highway is considered to be one intersection.

(c) A left turn shall be completed so as to enter the intersecting highway in that lane farthest to the left which is lawfully available to traffic moving in the direction of the vehicle completing the left turn. Unless otherwise marked or posted, this means the lane immediately to the right of the center line or center dividing strip of a 2-way highway and the lane next to the left-hand curb or edge of the roadway of a one-way highway.

(4) LEFT TURNS ON 3-LANE HIGHWAYS. On a 2-way highway having an uneven number of lanes the approach for a left turn shall be made in the center lane thereof, unless otherwise posted or marked. A left turn into a 2-way highway having an uneven number of lanes shall be made so as to enter the highway in the lane immediately to the right of the center lane.

6.37 Required Position for Turning Into Private Road or Driveway. The operator of a vehicle on a highway who intends to turn into a private road or driveway shall make the approach for the turn in the same manner as specified in Section 346.31, Wisconsin Statutes of 1957, for vehicles making an approach for a right or left turn at an intersection. If, because of the size of the vehicle or the nature of the intersecting private road or driveway, the turn cannot be made from the specified lane of approach, the turn shall be made with due regard for all other traffic.

(c) A left turn shall be completed so as to enter the intersecting highway in that lane farthest to the left which is fully available to traffic moving in the direction of the vehicle completing the left turn. Unless otherwise marked or posted, this means the lane immediately to the right of the center line or center dividing strip of a 2-way highway and the lane next to the left-hand curb or edge of the roadway of a one-way highway.

(4) LEFT TURNS ON 3-LANE HIGHWAYS. On a 3-way highway having an uneven number of lanes the approach for a left turn shall be made in the center lane thereof, unless otherwise posted or marked. A left turn into a 2-way highway having an uneven number of lanes shall be made so as to enter the highway in the lane immediately to the right of the center lane.

6.37. Required Position for Turning Into Private Road or Driveway. The

operator of a vehicle on a highway who intends to turn into a private road or driveway shall make the approach for the turn in the same manner as specified in Section 346.31, Wisconsin Statutes of 1957, for vehicles making an approach for a right or left turn at an intersection. If, because of the size of the vehicle or the nature of the intersecting private road or driveway, the turn cannot be made from the specified lane of approach, the turn shall be made with due regard for all other traffic.

6.38 Where Turns Prohibited.

(1) The operator of a vehicle shall not turn his vehicle so as to proceed in the opposite direction upon a highway at any of the following places:

(a) At any intersection at which traffic is being controlled by traffic control signals or by a traffic officer;

(b) In mid-block on any street in a business district;

(c) In mid-block on any through highway in a residence district.

(2) The operator of a vehicle shall not back his vehicle into an intersection at which turns are prohibited by sub. (1) (a) for the purpose of turning his vehicle so as to proceed in the opposite direction upon the highway.

(3) In this section, "mid-block" means any part of a street or highway other than an intersection.

6.39 Turning Movements and Required Signals on Turning and Stopping.

(1) TURNING. No person shall turn a vehicle at an intersection unless the vehicle is in proper position upon the roadway as required in Section 346.31, Wisconsin Statutes of 1957, or turn a vehicle to enter a private road or driveway unless the vehicle is in proper position on the roadway as required in Section 346.32, Wisconsin Statutes of 1957, or otherwise turn a vehicle from a direct course or move right or left upon a roadway unless and until such movement can be made with reasonable safety. In the event any other traffic may be affected by such movement, no person shall so turn any vehicle without giving an appropriate signal in the manner provided in Section 346.35, Wisconsin Statutes of 1957. Such signal shall be given continuously during not less than the last 100 feet traveled by the vehicle before turning.

6.38 Where Turns Prohibited.

(1) The operator of a vehicle shall not turn his vehicle so as to proceed in the opposite direction upon a highway at any of the following places:

- (a) At any intersection at which traffic is being controlled by traffic control signals or by a traffic officer;
- (b) In mid-block on any street in a business district;
- (c) In mid-block on any through highway in a residence district.

(2) The operator of a vehicle shall not back his vehicle into an intersection at which turns are prohibited by sub. (1) (a) for the purpose of turning his vehicle so as to proceed in the opposite direction upon the highway.

(3) In this section, "mid-block" means any part of a street or highway other than an intersection.

6.39 Turning Movements and Required Signals on Turning and Stopping.

(1) TURNING. No person shall turn a vehicle at an intersection unless the vehicle is in proper position upon the roadway as required in Section 346.31, Wisconsin Statutes of 1957, or turn a vehicle to enter a private road or driveway unless the vehicle is in proper position on the roadway as required in Section 346.32, Wisconsin Statutes of 1957, or otherwise turn a vehicle from a direct course or move right or left upon a roadway unless and until such movement can be made with reasonable safety. In the event any other traffic may be affected by such movement, no person shall so turn any vehicle without giving an appropriate signal in the manner provided in Section 346.33, Wisconsin Statutes of 1957. Such signal shall be given continuously during not less than the last 100 feet traveled by the vehicle before turning.

(2) STOPPING. No person shall stop or suddenly decrease the speed of a vehicle without first giving an appropriate signal in the manner provided in Section 346.35, Wisconsin Statutes of 1957, to the operator of any vehicle immediately to the rear when there is opportunity to give such signal.

6.40 Method of Giving Signals on Turning and Stopping.

(1) Whenever a stop or turn signal is required by Section 346.34, Wisconsin Statutes of 1957, such signal may in any event be given by a signal lamp or lamps or mechanical signal device of a type meeting the specifications set forth in Section 347.15, Wisconsin Statutes of 1957. Except as provided in sub. (2), such signals also may be given by the hand and arm in lieu of or in addition to signals by signal lamp or mechanical signal device. When given by hand and arm, such signals shall be given from the left side of the vehicle in the following manner and shall indicate as follows:

- (a) Left turn -- Hand and arm extended horizontally.
- (b) Right turn -- Hand and arm extended upward.
- (c) Stop or decrease speed -- Hand and arm extended downward.

(2) Any motor vehicle in use on a highway shall be equipped with, and required signal shall be given by, a signal lamp or lamps or mechanical signal device when the distance from the center of the top of the steering post to the left outside limit of the body, cab or load of such motor vehicle exceeds 24 inches, or when the distance from the center of the top of the steering post to the rear limit of the body or load thereof exceeds 14 feet. The latter measurement shall apply to any single vehicle and also to any combination of vehicles.

Required Stops

6.41 Vehicles to Stop at Stop Signs.

(1) Every operator of a vehicle approaching an official stop sign

(2) STOPPING. No person shall stop or suddenly decrease the speed of a vehicle without first giving an appropriate signal in the manner provided in Section 346.35, Wisconsin Statutes of 1957, so the operator of any vehicle immediately to the rear when there is opportunity to give such signal.

6.40 Method of Giving Signals on Turning and Stopping.

(1) Whenever a stop or turn signal is required by Section 346.34, Wisconsin Statutes of 1957, such signal may in any event be given by a signal lamp or lamp or mechanical signal device of a type meeting the specifications set forth in Section 347.15, Wisconsin Statutes of 1957. Except as provided in sub. (2), such signals also may be given by the hand and arm in lieu of or in addition to signals by signal lamp or mechanical signal device. When given by hand and arm, such signals shall be given from the left side of the vehicle in the following manner and shall indicate as follows:

- (a) Left turn -- Hand and arm extended horizontally.
  - (b) Right turn -- Hand and arm extended upward.
  - (c) Stop or decrease speed -- Hand and arm extended downward.
- (2) Any motor vehicle in use on a highway shall be equipped with, and required signal shall be given by, a signal lamp or lamp or mechanical signal device when the distance from the center of the top of the steering post to the left outside limit of the body, cab or load of such motor vehicle exceeds 24 inches, or when the distance from the center of the top of the steering post to the rear limit of the body or load thereof exceeds 14 feet. The latter measurement shall apply to any single vehicle and also to any combination of vehicles.

Required Stops

6.41 Vehicles to Stop at Stop Signs.

(1) Every operator of a vehicle approaching an official stop sign

at an intersection shall cause such vehicle to stop before entering the intersection except when directed to proceed by a traffic officer or traffic control signal.

(2) Stops required by sub. (1) shall be made in the following manner:

(a) If there is a clearly marked stop line, the operator shall stop his vehicle immediately before crossing such line.

(b) If there is no clearly marked stop line, the operator shall stop his vehicle immediately before entering the crosswalk on the near side of the intersection.

(c) If there is neither a clearly marked stop line nor a marked or unmarked crosswalk at the intersection or if the operator cannot efficiently observe traffic on the intersecting roadway from the stop made at the stop line or crosswalk, he shall, before entering the intersection, stop his vehicle at such point as will enable him to efficiently observe the traffic on the intersecting roadway.

## Joint Meeting Town of Blooming Grove &amp; Village of Monona

November 25, 1957 7:30 P.M.

Present: Messrs. Rankin, Kilgust, Meyer, Kaiser, Jaeger, Gannon (Village of Monona); Kurt and Tipple (Town of Blooming Grove).

Also present: Messrs. Lottes, Buehner, Cooper and Christian.

V2-P. 165 Mr. Rankin called the meeting to order and requested discussion on the Library Budget.

Mr. Tipple stated that the members of the Town Board appreciated the fine job the Library Committee had done in such a short time and hoped that they would all be able to continue in their present capacities and they also realize the need and importance of a Library in this community. However, they had also hoped to have a report from the Survey Committee presently conducting a study to indicate what priority a Library held in their list of community needs and, therefore, in the absence of this report and other Budget problems, the members of the Town Board felt that it should not be included in the present Town Budget, but should be deferred to some time in the future, possibly the next fiscal year.

V2-P.222 Mr. Rankin stated that the discussion regarding the Library, held by the members of the Village Board, also indicated that inclusion of a Library in this years Budget might not be practical.

Mr. Kilgust presented the following resolution:

V2-P.225 Be it resolved by the Board members of the Village of Monona and the Town of Blooming Grove in joint meeting, to extend their thanks and appreciation to the Joint Library Committee for its excellent work, and be it further resolved that although the members recognize the need and importance of a Library in the Monona-Grove Community and in the absence of a report from the Survey Committee, that the establishment of a joint Library be delayed until a more practical time in the future. It is also their request that members of the Joint Library Committee will continue to serve in their present capacity and assist making the hope for a joint Library a reality in the very near future.

All members of both Boards voted adoption of the above resolution.

V2-P.51 The Rev. Owen Akers requested information regarding what items were on the priority list and stated that he favored the establishment of the Library. Mr. Rankin informed him that this list of Community needs is an anticipated result of the Youth Study Committee.

V2-P.51 Mr. Francis Hanson, President of the Nichols P.T.A. also expressed a desire that a Library be established as soon as possible.

V2-P.144 The members then proceeded to discuss the question of a Joint Municipal Building with the Town and Village attorneys. Mr. Lottes advised that an appraisal of the two vacant lots behind the Town garage on Gordon Avenue indicated the value as \$3500.00 for both lots. Mr. Neil Thompson is asking \$9,000.00.

V2-P.144 Discussion was held regarding the establishment of a Joint Committee to study possible joining of certain departments and Mr. Rankin requested the members of the Town Board to appoint a three member committee to meet with the three Village members.

Mr. Rankin announced that he had received notice of a meeting at Mayor Nestingen's office at 10:00 A.M. on December 19, 1957, to discuss his proposal on the locks.

V2-P.247 There being no further business to come before the members, the meeting adjourned at 9:45 P.M.

A motion by Mr. Kurt, seconded by Mr. Tipple, to award the purchase to Madison Motors for their low bid of \$780.00 plus \$75.00 for windshield replacement, \$7.00 for clock, \$18.00 for stowage, \$5.00 back-up lights, \$6.00 for windshieldwasher, \$3.00 for variable speed wipers; total \$894.00, was carried. V2-P.210

The joint meeting of said boards on February 28, 1958 was called for the purpose of acting on the above named petitions and at said meeting Ralph Meiller was appointed temporary clerk of said joint meeting of boards and Richard L. Nelson was appointed temporary chairman of said meeting.

MINUTES OF JOINT MEETING OF THE TOWN BOARDS OF THE TOWNS OF DUNN, COTTAGE GROVE AND BLOOMING GROVE, AND THE VILLAGE BOARD OF THE VILLAGE OF NEPESAND, DANE COUNTY, WISCONSIN.

A joint meeting of the above named municipal boards was held at the Firemen's Hall in the Village of Nepeand, Dane County, Wisconsin, on the 28th day of February, 1928, as duly called and noticed by meeting of said boards on the 15th day of February, 1928. The petitions of Peter R. Pierce, Richard J. Pierce, Carl J. Rattmann and Charlotte Rattmann, petitioning said boards to detach the Pierce and Rattmann farms in Sections 30 and 31, Town of Cottage Grove, Dane County, Wisconsin, and being about 161.7 acres, from School District No. 1, Town of Cottage Grove and Blooming Grove, and attach same to Joint School District No. 8, Village of Nepeand, and the Towns of Dunn, Blooming Grove and Cottage Grove, Dane County, Wisconsin, were properly filed with Ralph Kellier, Clerk of the Town of Cottage Grove, affidavits of mailing notices are also on file with said clerk.

The joint meeting of said boards on February 28, 1928 was called for the purpose of acting on the above named petitions and at said meeting Ralph Kellier was appointed temporary clerk of said joint meeting of boards and Richard J. Nelson was appointed temporary chairman of said meeting.

Appearing at said meeting were all of the members of the Town Boards of the Towns of Dunn, Blooming Grove and Cottage Grove, and four members of the Village Board of the Village of Nepeand, namely: Joseph Mace, Willard Kerner, Conrad Thompson and Norman Larson, being a quorum of said board. Also appearing were the School District Clerks of Joint No. 1 and Joint No. 8, along with all the petitioners, except Charlotte Rattmann.

Considerable discussion was had during which the following facts were brought before the boards:

Mr. Rattmann pointed out that he lived more than 2 miles from the school in district No. 1 and had to drive his own children to and from school for a compensation of 30 cents a day. That at the present time the School Bus from Joint No. 8 goes past his farm each day. He

12-9-14-2

wished to be in the Joint No. 8 district for convenience of not having to transport his own children to school and for the best interests of the education of his children. He also pointed out that there was a possibility that Joint No. 1 would consolidate with the Cottage Grove State Graded School and that he would rather have his children attend Joint No. 8 as it was closer and located in the Village of McFarland which was his home town ~~xxxxx~~ and on his telephone line.

The same reasons for annexation were presented by Mr. Pierce, with substantially the same facts, except the school bus of Joint No. 8 did not go by his farm now, but would have to travel about 3/4 mile further to pick-up his children. ✓

The territories of both farms were contiguous to the territory of Joint School District No. 8 and together had an assessed valuation of about \$12,700.00. The proposed annexation at the present time would transfer three (3) children and in the next few years a total of seven (7) children.

Mr. Stanley Jacobson, Clerk of Joint No. 1 pointed out that said school district was in the process of determining if it should join the Cottage Grove Graded School, transport some grades to Cottage Grove (now 7th and 8th being transported on tuition basis) or remodel their school and make two class rooms. He also stated there was no one opposed to the Rattmann and Pierce petitions in the district that he knew of.

No one appeared at this joint meeting that opposed the petitions.

Russell White, Clerk of Joint No. 8, pointed-out that the assessed valuation per pupil in Joint No. 8 was about \$13,000, and it was also pointed-out that the assessed valuation per pupil was some over \$6,000.00. Mr. White stated that Joint No. 8 would not have to build any additions to the Schools of No. 8 to accept the children of the petitioners, but that in 1958 they would have to open the Waubesa School again and probably add a couple of rooms by 1961.

After the discussion each board retired separately and made their individual determinations and vote on the petitions, which was, by boards, as follows:

V2-P.224  
An informal meeting of the Nichols School Board and the Blooming Grove Town Board was held at the Nichols School, on April 28, 1958 at 10:15 P.M. Discussion was held relative to estimated direction of future residential development in the Town of Blooming Grove. Mr. Bohnsack explained that since the majority of the area in the Nichols School District, lying east of the U.S. 51 Beltline and north of Pflaum Road is zoned commercial and industrial, residential development would, in all probability, be in the area south of Pflaum Road.

✓  
Since acquisition of land for municipal and school purpose, in that area, would be of concern to the Monona-Grove High School also, it was determined to call a meeting of the Boards of the Monona-Grove High School, Nichols School and the Town of Blooming Grove. A tentative date, May 13, 1958, at 8:00 P.M., at the Nichols School, was set and Mr. Sargent stated he would try to arrange the meeting with the Monona-Grove High School Board members.

There being no further business to come before the members, the meeting adjourned at 11:00 P.M.

In buildings of reinforced concrete construction, the plans shall show the system of reinforcement, size and location of steel, and size of columns, girders, beams, and slabs. All plans and specifications shall be submitted in duplicate; one as hereinafter provided; the other set shall remain on file in the office of the building inspector.

(3) Waiver of Plans. If, in the opinion of the building inspector the character of the structure and work is sufficiently described in the application, he may waive the filing of plans, provided the costs of such work does not exceed \$2,000.00.

(4) Approval of Plans. If the building inspector finds that the proposed building will comply in every respect with all Ordinances of the Town of Blooming Grove and all laws and lawful orders of the State of Wisconsin, he shall transmit the application papers for such permit, including exterior elevations of the proposed structure, to the building board and the building inspector shall issue a building permit therefor only after said building board has found as a fact that the exterior architectural appeal and the type or functional plan of the

proposed structure will, when erected, not be so at variance with the exterior architectural appeal and the type or functional plan of the structures already constructed or in the course of construction in the immediate neighborhood so as to cause a substantial depreciation in the property values of said neighborhood all in accordance with Section 7.35 of this Ordinance.

(5) Alteration of Plans. The building permit shall be kept at the site of the proposed building. At the time of issuance of such building permit the building inspector shall officially approve the plans and thereafter the plans and specifications shall not be altered in any respect which involves any of the mentioned ordinances, laws or orders or which involves the safety of the building, except with the written consent of the building inspector. In case adequate plans are presented the building inspector may, at his discretion, issue a permit for a part of the building before receiving the plans and specifications, for the entire building. It shall be unlawful to commence work on any building unless a permit or waiver of plans has been issued.

(6) Fee. Before receiving a building permit, the owner, or his agent shall pay to the building inspector the following fee:

| Cost of Structure  | Fee    |
|--|--------|
| For the first \$1,000 of cost or fraction thereof  | \$2.00 |
| Each additional \$1,000 of cost or fraction thereof, up to and including \$10,000          | 1.25   |
| Per \$1,000 or fraction thereof from \$10,000 up to and including \$20,000                 | 1.00   |
| Per \$1,000 or fraction thereof from \$20,000 up to and including \$40,000                 | .75    |
| Per \$1,000 or fraction thereof from \$40,000 and up                                       | .50    |
| The maximum fee, however, in any event, shall not be in excess of \$75.00 per application. |        |

(7) Payment of Fee. All fees collected shall be paid by the building inspector to the town treasurer on or before the last day of each and every month.

(8) Permit Lapses. A building permit shall have lapsed and be void unless building operations are commenced within six months from the date thereof.

(9) Revocation of Permit. If the building inspector shall find at any time that the above mentioned ordinances, laws, orders, plans or specifications are not being complied with he shall revoke the building permit and written notice of such action shall be posted at the site of the work. While any such permit is revoked, it shall be unlawful to do any further work upon such building until the permit is re-issued, excepting such work as the building inspector shall by written order require to be done as a condition precedent to the re-issuance of the permit.

(10) Inspection. Buildings shall be inspected at such times and in such manner as may be necessary to secure compliance with the laws, ordinances, rules and orders applicable thereto. The building inspector shall inspect all buildings when ready for lath and plaster, or any other wall covering, of which the general contractor or other person in charge of such work shall notify the building inspector in writing and in no case shall such lathing or plastering be done before inspection. After inspection, the building inspector shall issue a certificate of compliance, or prescribe any changes necessary to such compliance, upon the making of which changes the certificate shall be issued. After the issuance of such certificate, no structural part of said buildings shall be changed.

66 C

(11) Certificate of Occupancy. Buildings shall have final inspection before occupancy, except as herein provided. If, on final inspection by the building inspector, the electrical inspector and the plumbing inspector no violation of this or any other ordinance, law or order be found, the fact shall be so certified to be the building inspector who shall thereupon issue a certificate of occupancy, stating the purpose for which the building is to be used, also the maximum load and the maximum number of persons that may be accommodated on each floor of buildings to be used for public purposes. No building or part thereof shall be occupied until such certificate has been issued except with the written consent of the building inspector, nor shall any building be occupied in any manner which conflicts with the conditions set forth in the certificate of occupancy.

**7.08 Unsafe Buildings.** Whenever the building inspector shall find that any building or structure, or any part thereof, is dangerous to life, or adjoining property, by reason of bad conditions, defective construction, overloaded floors, decay, lack of guards against fire, general dilapidation or other cause, he shall order the owner or tenant thereof to cause the same to be made safe or to be removed, as in the judgment of the building inspector may be necessary; and he shall also affix a notice of such order in a conspicuous place on the outside wall of the building and no person shall remove or deface such notice. The owner or tenant of such building or structure shall thereupon immediately cause the same to be made safe, or to be removed, as ordered. Any person who fails to comply with any such order shall be guilty of a violation of this ordinance.

Where the public safety requires immediate action, the building inspector shall enter upon the premises with such assistance as may be necessary, and cause the building or structure to be made safe or to be removed, and the expense of such work may be recovered by the Town in action against the owner or tenant.

**7.09 Application to Existing Buildings.** The following specified requirements shall apply to existing buildings which for any reason whatsoever do not conform to the requirements of this code for new buildings:

If alteration and/or repairs in excess of fifty (50) per cent of the value of any existing building are made to any existing building within any period of twelve (12) months, thereafter when further repairs are necessary, the entire building shall be made to conform to the requirements given herein for new buildings; provided, however, that any buildings existing which for any reason require repairs, at any one time in excess of fifty (50) per cent of the value thereof, not deducting from such value any loss caused by fire or any other reason, shall be made to conform to the requirements of this code for new buildings or shall be entirely demolished.

**7.10 Occupancy of Public Areas.** Application to place material or machinery on streets, sidewalks or alleys shall be in writing and shall describe the premises by lots, block and street on which such material or machinery is desired to be placed and shall specify the character of the material for which the permit is desired.

Before a permit is granted by the building inspector the party applying therefor shall give a bond in the sum of one thousand dollars (\$1,000.00) with a good and sufficient surety to be approved by the building inspector, conditioned to save the Town of Blooming Grove harmless from all liability which may be incurred by the deposit or maintenance of such material or machinery in the street, alley, or public ground by the applicant or by his contractor, servants, agents or employees, whether such material or machinery shall be placed within or beyond the limits specified by this chapter.

Such permit shall expire at the end of a reasonable length of time which shall be specified in the permit and upon good cause shown the building inspector may extend any such permit from time to time as may be reasonably required upon written application made to him for that purpose.

Such permit shall not authorize the use of more than one-half of the sidewalk or more than one-third of the carriage way, opposite the premises of the person to whom such permit is granted. No such permit shall be issued where the placing of any such machinery upon the street or public ground will unreasonably interfere with the public safety and convenience, or where there is sufficient room for such material or machinery on the same lot or premises which is accessible from any street or alley.

**7.11 Moving Building.** (1) Bond required. Before a permit to move any building is granted by the building inspector, the party applying therefor shall give a bond in the sum of one thousand (\$1,000.00) dollars with good and sufficient sureties to be approved by the town board, conditioned, among other things, that said party will save harmless and indemnify the town against all liabilities, judgments, costs and expense that may accrue in consequence of the granting of such permit.

(2) Contents of permit; Regulations. Every permit to move a building shall state all conditions to be complied with, designate the route to be taken and limit of time for removal. The removal of a building shall be continuous during all hours of the day, and day by day, and at night if the building inspector shall so order, until completed, with the least possible obstruction to thoroughfares. Lighted lanterns shall be kept in conspicuous places at each end of the building during the night.

(3) Inspection and repair of streets. Every person receiving a permit to move a building shall, within one day after reaching its destination, report that fact to the building inspector. The building inspector shall thereupon inspect the streets and highways over which said building has been moved and ascertain their conditions. If the removal of said building has caused any damage to the streets or highways, the house-mover shall forthwith place them in as good repair as they were before the permit was granted. Upon failure of the house-mover to do so within ten days thereafter to the satisfaction of the building inspector, the town board shall repair the damage done to such streets and highways and hold the sureties of the bond given by the house-mover responsible for the payment of the same.

(4) Permit fees. Before the building inspector shall issue a permit to move a building he shall collect a fee of Three and no/100 (\$3.00) dollars.

**7.12 Construction Requirements.** (1) State code adopted. The Wisconsin State Building code issued by the Industrial Commission of Wisconsin, effective July 29, 1932, is hereby made by reference a part of this ordinance with respect to those classes of buildings, to which the said code specifically applies. Orders 5210 to 5219 (Fire Protection) inclusive, 5302 to 5327 (Foundation, Masonry, Concrete and Steel Construction), inclusive and 5328 (Wood Construction) of the Wisconsin State Building code are hereby made a part of this ordinance with respect to all buildings, or parts thereof, including dwellings, hereafter constructed within the Town of Blooming Grove subject to such exceptions, modifications and additions as are specifically made

### 3—TOWN OF BLOOMING GROVE

by this ordinance. A copy of the Wisconsin State Building Code is on file in the office of the town clerk.

(2) Terms. The building terms used in this ordinance shall have the meaning given them in the State Building Code.

(3) Dwellings. The term "dwelling" includes every building occupied exclusively as a residence by not more than two families.

(4) Workmanship. Workmanship in the fabrication, preparation and installation of materials shall conform to generally accepted good practice.

**7.13 Foundations.** (1) Depth. All foundation walls shall extend below the frost line and have suitable provision at the bottom to keep load distribution within the carrying capacity of the soil. All footing and foundation walls shall be so designed as to carry their imposed loads.

(2) Strength. Foundation walls shall be of adequate strength and thickness to resist lateral pressures from adjacent earth and to support their vertical loads; but the thickness shall not be less than the thickness of walls supported by them.

(3) Thickness. If built of rubble stone, the thickness of foundation walls shall be not less than eighteen inches. If built of brick, concrete, hollow-blocks or solid blocks, the thickness shall be not less than ten inches; provided that when such walls of dwellings or of other buildings not exceeding thirty-five feet in height do not extend more than five feet below the adjacent ground level, the minimum thickness of solid brick or concrete walls shall be eight inches, and the minimum thickness of hollow walls of brick and walls of hollow block or solid-block shall be ten inches. Poured concrete foundations of six inches thickness may be used for one-story wood frame structures without basement.

(4) Masonry Foundation. In masonry unit foundation walls the top course shall be of solid masonry units or solid masonry material and shall be not less than four inches thick.

**7.14 Masonry Construction.** (1) Thickness. The thickness of all masonry walls shall comply with orders 5303 to 5313 of the State Building Code, except that for masonry dwelling the exterior bearing walls shall be not less than eight inches thick for a height not to exceed thirty-five feet. Pilasters not less than four by twelve inches shall be constructed to form piers under the ends of girders framing into eight-inch thick masonry walls, and shall be bonded to the wall. Girders framing into masonry walls of hollow-units shall bear upon solid masonry not less than eight inches thick.

(2) Height. The unsupported height of isolated piers shall not exceed ten times their least dimension.

(3) Chases. Chases shall not be constructed in eight-inch bearing or division walls. In such walls of greater thickness the backs of chases shall be not less than six inches in thickness.

(4) Chimneys. All chimneys shall be constructed in compliance with order 5210 of the building code, except that no metallic or tile smoke stack shall be used in a dwelling.

**7.15 Monolithic Concrete Construction.** (1) Thickness. Bearing walls of monolithic plain concrete shall be not less than six inches in thickness.

(2) Hollow walls. Hollow monolithic concrete walls shall have not less than six inches net thickness of material. Wall opening and corners shall be reinforced in the same manner as solid monolithic walls. The inner and outer part of such walls shall be securely fastened together with non-corrodible bracing ties.

(3) Height. Monolithic concrete walls built in accordance with this section may be not more than thirty feet in height, except that in the case of gable construction an additional five feet to the peak of the gable is permissible.

(4) Pilasters. Girders framing into monolithic concrete walls shall be supported by pilasters as provided for masonry wall in article 8 of this ordinance.

(5) Reinforced concrete. All concrete walls having openings therein, all supported floor slabs and all beams and columns shall be as provided in the Wisconsin State Building code.

**7.16 Frame Walls.** (1) Definition. In conventional frame wall construction all structural parts are of wood or are dependent upon a wood frame for support. This includes wall facing or veneer other than wood, such as brick, tile, stone and stucco. (See article 24 for use of special types of wood construction.)

(2) Studding. Wood studding shall be not less than two by four nominal inches and spaced not to exceed sixteen inches on centers.

(3) Wood Sheathing. Where exterior walls or parts thereof are sheathed, the boards shall be not less than one nominal inch in thickness. Sheathing boards shall be laid tight and properly nailed to each stud with not less than two eight-penny nails. Where the sheathing is omitted or is not laid diagonally, the frame shall be diagonally braced with let-in bracing to secure rigidity.

(4) Composition Sheathing. Wood sheathing may be omitted when other types of construction are used that are accepted as of adequate strength and stability by the Industrial Commission. Composition sheathing board may be used, provided the frame is diagonally braced with let-in braces.

(5) Paper or felt. All sheathing shall be covered with water-resistant building paper or saturated asphalt felt. Each lap shall not be less than four inches, with at least a four-inch lap around openings.

(6) Ledger boards. Ledger or ribbon boards used to support joists shall be not less than one by four inches, shall be cut into the studs, and securely nailed with not less than two ten-penny nails to each stud. Where ledger boards are used the outside walls shall be completely fire-stopped with not less than two-inch material.

**7.17 Masonry Veneer or Frame Construction.** (1) Thickness. Masonry veneer supplied to the walls of frame structures shall rest directly upon the masonry foundations of the structure and shall be not less than three and three-fourths inches in thickness. Such veneer shall be backed up with waterproof building paper or saturated felt which shall extend down and under the bottom course of veneer.

(2) Flashing. Flashing shall be installed where necessary to prevent moisture from penetration behind the wall.

(3) Anchoring. The masonry veneer shall be securely attached to the frame structure at intervals of not more than sixteen inches horizontally and twenty-four inches vertically.

(4) Sheathing. Sheathing shall be securely attached to the framework of the structure back of the masonry veneer by properly nailing to each stud with not less than two eight-penny nails.

**7.18 Stucco on Frame Construction.** (1) Flashing. Flashing or other measures adequate to prevent penetration of moisture behind the stucco surface shall be used where necessary.

(2) Back Plastering. Back plastering shall be required where sheathing or its equivalent is omitted.

(3) Sheathing. Where wooden sheathing is used it shall be of boards not less than one-inch (nominal) thickness and securely nailed to each stud with not less than two eight-penny nails, and if applied horizontally with the frame adequately braced with diagonal braces set into the studs.

(4) Metal Lath. Where metal lath is used for the stucco base, it shall be expanded metal lath weighing not less than 3.4 pounds per square yard, or wire fabric not lighter than No. 19 gauge.

7.19 Wood Framing. (1) Strength and soundness. All wooden members shall be so framed, anchored, tied and braced together as to develop the maximum strength and rigidity for the purposes for which they are used. All members shall be sound and free from knots and shakes which would impair their strength and shall be dry and well seasoned. All lath and other members, shall be No. 1 common or of equivalent quality.

(2) Size of members. All wooden members shall be of sufficient size and strength to carry the load safely without exceeding the allowable working stresses of the material. The strength of timber shall be determined from actual dimensions and not from nominal dimensions.

Such hearing may be adjourned from time to time but for not more than 48 hours, and within 48 hours after the close of the hearing the building board shall in writing make or refuse to make the finding required by Section 1 hereof, and file it in the office of the Town Clerk who shall send a copy of it to the building inspector.

**Section 4.** On an appeal to the board of appeals, in the absence of proof to the contrary adduced before the board of appeals, a refusal to grant the building permit because of refusal of the building board to make the finding required by Section 1 hereof, shall be deemed to be based upon facts supporting the conclusion that the exterior architectural and the type or functional plan of the proposed structure for which a building permit was refused would, when erected, be so at variance with all of the exterior architectural appeal and the type or functional plan of structures already constructed or in the course of construction in the immediate neighborhood so as to cause a substantial depreciation in the property values of said neighborhood.

**Section 5.** Any person entitled to appeal from the grant of, or refusal of the building inspector to grant, said building permit, may appeal to the board of appeals of the Town of Blooming Grove in the same manner and with the same force and effect as if this ordinance had not been adopted and the building inspector had taken such action independently of the building board.

**7.38 Effective Date.** The building code ordinance shall be in full force and effect from and after its passage and posting as required by law and shall apply to all buildings, alterations or repairs commenced in the Town of Blooming Grove on and after said effective date.

It is intended that the building code adopted by the town board on the 4th day of January, 1949, and all other existing ordinances of a similar nature shall continue to apply to all buildings or structures, the building, alteration or repair of which was commenced prior to the effective date of this ordinance.

8:00 P.M.

Present: Messrs. Bohnsack, Tipple, Kurt, Cooper, Entwistle, Pederson and Christian.

Messrs. Delevie, Laufenberg and Lothe appeared in response to a request of the Town Board to settle a Personal Property Tax bill. Mr. Delevie stated he had moved his cattle in on May 23, 1956 and Mr. Laufenberg stated he had moved his cattle out on April 7, 1956. Mr. Entwistle stated he had found cattle stanchioned there on May 1, 1956 and had at numerous times attempted to determine their ownership. A neighbor advised they belonged to Mr. Delevie. A motion by Mr. Tipple, seconded by Mr. Kurt, that in view of the information received, the cattle did not belong to Mr. Delevie or Mr. Laufenberg, and that since Mr. Lothe was the owner of the property, the cattle apparently belonged to him and he should therefore be responsible for the Tax bill. The Clerk was instructed to so advise Mr. Lothe and the Town Treasurer. V2-P.169

The minutes of June 3, 1958 and June 9, 1958 were approved as recorded.

The May Police report was received and placed on file. V2-P.210

The May 12, 1958 to June 16, 1958 report of Justice Brandt was received and placed on file. V2-P.147

The Board members thereupon resolved themselves into the Building Committee. Mr. Entwistle presented a house plan which he stated was acceptable. Upon checking the plan with the Building Code Ordinance, it was found that it did not comply in all respects. Mr. Entwistle was instructed to have Mr. Veith comply with the ordinance and to present it to the Building Committee for approval. They called attention especially to Section 7.07 (2) Town of Blooming Grove ordinances. V2-P.64  
or V2-P.263

The Clerk was instructed to advise Mr. Entwistle that after viewing Mr. Klinke's "loading dock", they concurred with his directives and requested that he continue to enforce the Building Code Ordinance. V2-P.152

Mr. Entwistle also presented a request for the erection of a sign which was approved. V2-P.236

There being no further business to come before the Building Committee, the meeting adjourned and the members again resolved themselves into the Town Board.

Mr. Entwistle requested approval to hire a typist for approximately (30) hours work at \$1.00 per hour. V2-P.95

Mr. Vernon Hamel presented some information relative to a storm sewer on Acewood Blvd. in the proposed Acewood Plat. The Board members took the information under advisement. Mr. Hamel also ~~xxx~~ ~~suggested~~ suggested a plan for storm sewer for the C. L. Femrite Plat. He recommended that this be made a joint project with the Village of Monona, as both municipalities would benefit financially. V2-P.121  
V2-P.50  
V2-P.100

Mr. Hamel also advised that the service roads for the Highway 51 East Beltline Highway were in the process of being dedicated to the Town. V2-P.237

Mr. Doolittle advised that all bids for the Fire Station were in order and that the prices bid were favorable. In order to determine which plumbing bid to accept, Mr. Doolittle suggested that a list of items which they proposed in their bid be obtained from both bidders. Mr. Doolittle advised he would do so. The Board members therefore decided to hold up awarding the plumbing contract until this information is available. V2-P.103

✓

The Clerk was instructed to contact the Entwistle Heating Company, The Badger Sheet Metal Company and Thomas Ellestad for bids on the heating of the fire station.

V2-P.236

Mr. Severance's note relative to a bill for supplying gravel for Woodvale Drive was considered. It was the opinion of the Board that since this had not been petitioned for in the legal manner, the cost thereof could not be assessed until the further improvement for the street is petitioned for. The Clerk was instructed to include the amount due when an assessment is made.

V2-P.63

Further discussion was held relative to Platters furnishing a bond to assure that streets be completed to specifications of the Highway Superintendent.

Figure 1 is a line graph showing the percentage of total catch versus the number of hauls for three species: *P. setiferus*, *P. setiferus* + *P. setiferus* + *P. setiferus*, and *P. setiferus* + *P. setiferus* + *P. setiferus*. The x-axis represents the number of hauls (1 to 10), and the y-axis represents the percentage of total catch (0 to 100). The graph shows that the percentage of total catch increases with the number of hauls for all three species, with *P. setiferus* + *P. setiferus* + *P. setiferus* showing the highest percentage of total catch.

The town board of the Town of Blooming Grove does ordain as follows:

**11.01 Electrical Inspector.** (1) To enforce the provisions of this chapter, there is hereby authorized and established the position of Electrical Inspector. The Electrical Inspector shall, under the direction of the Building Inspection Superintendent, be responsible for the inspection of electrical wiring as prescribed by town ordinances.

(2) The Electrical Inspector shall be a person who is skilled in the installation, planning, designing, superintending, and inspection of electrical wiring and equipment and who has at least six years of practical experience in such work. He shall be well versed in approved methods of electrical construction for safety to life and property and the laws and ordinances pertaining thereto.

(3) The Electrical Inspector shall make all inspections of electrical wiring and equipment, shall have the right to enter any building during reasonable hours in the discharge of his official duties, and shall have the authority to cause the disconnection of any wiring or equipment where such wiring or equipment in his judgment is dangerous to life or property or may interfere with the work of the fire department.

(4) The Electrical Inspector shall have the supervisory powers and duties of a Class A electrician and shall supervise any electrical construction or repair work made or installed by or for the Town of Blooming Grove, its officers, employees, contractors, or subcontractors on any of the buildings, grounds, streets, or apparatuses within the Town of Blooming Grove, provided such work or installation shall be under the supervision of the Building Inspection Superintendent.

**11.02 Board of Examiners of Electricians.** (1) The Board of Examiners of Electricians shall consist of five members as follows: The Electrical Inspector, one journeyman electrician having had at least six years of experience as a journeyman electrician, and who holds no class of electricians' license, one Class A licensed electrical contractor, one electrical engineer, and a master electrician who holds no license. The examining board shall elect its own officers.

(2) The Board of Examiners shall be appointed by the town board on the third Tuesday of April in each year, or within ten days thereafter. Their terms of office shall begin immediately upon their appointment, and shall be for one year, or until their successors are appointed.

**11.03 Contractors Required to Have License.** No person, either individually, as a member of a firm, or as an officer or employee of a corporation, shall conduct the business of an electrical wiring construction or contracting either as a master electrician, maintenance electrician, or neon installation unless such person shall have a license as required by this chapter, and no electrical work except minor repair work shall be done by a person not having such license unless as prescribed in the following description of the three classes of electrical work. The Electrical Inspector may, however, issue a permit to any person desiring to personally install electrical wiring in his own private single family residence if the person desiring the permit can prove he is competent to do such work on conformity with all rules and regulations governing the installation of electrical wiring in residences, and such person shall pay the same fee as is required of contractors under section 11.15 of this chapter. Nothing herein provided shall apply to servicing of electrical appliances installed by the manufacturer.

**11.04 Licenses—How Obtained.** (1) There shall be three classes of licenses for electricians. Class A shall be issued to a person desiring to enter into the business of electrical wiring and construction. Class B shall be issued to a person desiring to enter into employment in a public or industrial plant as a maintenance electrician. Class C license shall be issued to a person engaged in the neon sign business.

(2) Examinations for Class A and B licenses shall be given by the Board of Examiners on the first Monday of May and December of each year. No examinations for these two licenses shall be given at any other time than the dates specified in this section, and any person desiring such license shall make application therefor to the said Board of Examiners not less than ten days prior to the date on which an examination is to be held. The Board of Examiners shall then examine each applicant at such place as it shall designate. Examinations for Class C licenses may be given by the Board of Examiners at any time, and such examinations may be oral.

(6) It is further provided that in the event that any person holding a Class A license shall sever his connection with an electrical wiring and construction firm, association or corporation which has been in continuous operation for a period of one year or more and there shall be no other person in such firm, association or corporation, or employed by it, who is licensed under the provisions of this chapter to conduct the business of electrical wiring and contracting, the Electrical Inspector shall, upon application continue to issue electrical permits to that firm, association or corporation until the next regular examination period. At that time, some other member or employee of the firm, association or corporation must apply for a license to conduct the business of electrical wiring and contracting, according to the provisions of this chapter. In the event that such applicant fails to obtain such license, then said firm, association or corporation shall employ an electrician licensed to conduct

Mr. Kurth advised he had paid \$19,700.00 for the home, but claimed that part of this cost reflected a trade situation. Mr. Lansing stated he had paid \$13,800.00 for the property in 1954 and then had added a garage and breezeway for \$2,200.00. Mr. Entwistle estimated market value at \$15,300.00 and Mr. Lansing estimated it at \$13,500.00. Mr. Lansing stated he had paid \$13,500.00 for the property in 1953. The Board members could not understand why his property value should not increase as well as other properties and since Mr. Lansing could give no explanation, no change in assessment was made.

V2-P.1661. Arthur Lyster, 4303 Hegg Avenue, Lot 4, Assessors Plat No.5; assessors estimate of full value--\$14,900.00. Since Mr. Lyster could produce no evidence to substantiate his objections to the assessment, no change was made.

BOARD OF REVIEW

September 19, 1958

7:30 P.M.

Present: Messrs. Bohnsack Tipple, Kurt, Entwistle and Christian.

Messrs. Aberg and Powell, representing the F. S. Royster Guano Company, gave their testimony under oath. Mr. Aberg named a list of plants which had been recently sold and stated that the price they had been sold for was only a percentage of their costs. These were all single use plants as Royster also is. The Green Bay fertilizer plant sold for 40% of its cost. The Royster Plant, in the Town of Blooming Grove, was built just after World War II with many excessive expenditures, so a \$500,000. excessive cost account was set up. On August 7, 1948 Mr. Hatch suggested that \$500,000.00 be placed on the assessment roll as a 50% valuation. Mr. Aberg claimed that plants do not increase in value as residences do, but that they depreciate and become obsolete. The addition which Royster constructed was for purpose of changing to a granular method of manufacturing instead of a powder method and that the powder form is gradually being discarded. This does not add to the market value of the plant. Mr. Aberg also stated that merchant stock should be assessed at cost and not at retail value. Mr. Aberg stated that the City of Madison had assessed Royster as follows:

|              |            |
|--------------|------------|
| Land         | 12,500.00  |
| Improvements | 636,700.00 |

Swift Plant as follows:

|              |            |
|--------------|------------|
| Land         | 26,600.00  |
| Improvements | 373,800.00 |

Swift, however, being a 40,000 ton plant and Royster a 60,000 ton plant, and Royster also has the acid plant.

Mr. Aberg stated that Royster demands few services and he felt that there should be no increased in assessment; Mr. Powell concurring. Mr. Aberg stated he felt that the 1957 valuation was already 70% of full value.

Mr. Entwistle read a memo he had made after visiting the Royster Plant, June, 1958. Mr. Entwistle maintained that using their Dec. 31, 1957 report and taking all depreciation, they still had a total book value on buildings of \$1,167,000. Mr. Aberg objected to the book value stated, because of the excessive cost account. He also stated that a part of the present plant would become obsolete as the powder method of manufacture would become obsolete within one or two years. Mr. Powell stated that in 1959, 80% of fertilizer manufactured would be by granular method.

Mr. Bohnsack asked Mr. Aberg that if an increase from 60% to 70% shouldn't also effect Royster. Mr. Tipple inquired as to what percentage of equipment for the manufacture of powder form will be discarded when it will become a granular process completely. No accurate estimate could be given.

Regarding Personal Property, Mr. Aberg said that he had filed on the basis of 14,040 tons. Mr. Entwistle stated he based his figures on 15,000 ton and valued at \$861,000.00 from income tax returns. Mr. Aberg stated the inventory should be based on \$ 25.00 per ton and therefore filed his Personal Property form on an estimate of \$140,000.00.

The Board members asked Mr. Aberg if he could produce cost figures for the May 1, 1958 inventory and any other pertinent information.

The Board members advised Mr. Aberg that they would inform<sup>him</sup> of their decision at a later date.

The Clerk advised that Mrs. Edna Norden had informed him, by 'phone, that she would be unable to attend, because of illness in the family and would not attend any other meeting.

A motion to adjourn Board of Review to September 20, 1958, at 9:00 A. M. was carried and the members resolved themselves into the Town Board.

V2-P61 Mr. Pederson presented a preliminary plat prepared by Pete J. Beehner. A motion by Mr. Bohnsack, seconded by Mr. Kurt, to approve the preliminary plat, was carried.
