

To: Fenner Lake Riparian Property Owners

From: Fenner Lake Improvement Association

This notice is to inform you that the Fenner Lake Aeration system has been turned on late November 2025. The aeration system will create open holes in the lake ice causing unsafe ice conditions. As specified in WI Statute 167.26 Leaving Unguarded Ice Holes, the lake association has posted necessary warning signs / notices at the public access shoreline areas. *(There will not be ropes and reflectors barricading the open water, as with the old aeration system)*

The statute also requires that this warning notice be sent to each owner of riparian property on the lake by December 15th of each winter season.

Please communicate this warning notice to all who have access to the lake from your property.

Thank you,

Fenner Lake Improvement Association

President - Ed Weigl 608-584-4725 eweigl@maqs.net

Secretary / Treasurer – Julie Schmidt 608-584-4715 jschmidt@maqs.net
