Brown County Hazardous
Material Recovery Facility
2561 S. Broadway
Green Bay, WI 54304
(920) 492- 4950

RR.HHW@BrownCountyWi.gov

The Brown County Hazardous Material Recovery facility now accepts household batteries & battery containing devices from Brown County residents

FOR FREE!

Batteries are EVERYWHERE!

What are Household Batteries?

- Alkaline
- Button Cell
- AA, AAA, C, D, F
- Nickel Cadmium
- Nickel Metal-Hydride
- Lithium Ion
- Any Rechargeable Battery

If a device makes noise, moves or lights up without plugging it in, it has a battery. Batteries, even built in ones, can cause fires if they end up in trash or recycling.

What are Battery Devices?

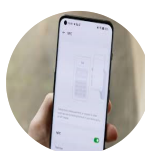

• Battery Containing Devices

Devices powered by batteries where the battery **IS NOT** designed to be replaced by the consumer are accepted for free.

E-Reader

Cell Phone

Electric
Toothbrush

Chrome
Book

Power Bank

• Battery Powered Devices

For devices powered by batteries where the battery **IS** designed to be replaced by the consumer the **battery** is accepted for free

E-Bike

Power Tool

Ride-On Toy

Toys

STOP

**these batteries and devices
from hitting your trash or
recycling bins!**

For batteries that can be removed from devices, tape off terminals with non-conductive tape and store in a non-metal, leak proof container before dropping off at the HMR.

Tuesday: 9AM - 3PM
Thursday: 12 PM - 6PM

BATTERIES NOW INCLUDED

Batteries are...

If a device makes noise, moves or lights up without plugging it in, it has a battery. Batteries, even built in ones, can cause fires if they end up in trash or recycling.

STOP

Batteries and devices from reaching your trash or recycling bin!

EVERYWHERE!

For batteries that can be removed from devices, tape off terminals with non-conductive tape and store in a non-metal, leak proof container before dropping off at the HMR.

Properly Dispose of Household Batteries and Battery Devices!

Prevent Battery Fires

- ⚡ The popularity of cordless devices is substantial and continues to grow due to better rechargeable batteries and changes in technology. Lithium batteries are especially popular power sources though they have the potential to start **fires**.
- ⚡ What happens when a device no longer meets our needs or the battery is no longer capable of powering our devices? They are often thrown in the trash or curbside recycling bin where they can start **fires!**
- ⚡ Battery fires can happen in the home, in trucks that pick up your trash and recycling, and facilities that handle the waste.
- ⚡ Help protect yourself and others by bringing your household batteries and battery devices to the Brown County Hazardous Material Recovery facility for **FREE** from Brown County residents!

Do Not Put Them in Your Garbage or Recycling!
