

Sump Pump Inspections  
Dec 09, 2015

A notice was mailed out in the December water bills regarding sump pump inspections. The Village is showing more flow in the sewer lines than should be. Therefore the Village is going to conducting inspections of sump pumps to make sure that they are running outside and not running into the sewer system. Please contact the Village hall at 715-229-4319 to set up a time for the director of public works to inspect your sump pump. If you do not have a basement and no need for sump pump, please disregard this notice.

Thank You!
