---

### RULES FOR USE OF FIRE HYDRANTS

1. No hydrant shall be used without having obtained a permit from the Village of Stamford
2. Only proper tools will be used on a hydrant, i.e. only hydrant wrench use is permitted
3. For permitted use, the hydrant MUST have a reducing coupling attached to the nozzle of the hydrant, along with an independent gate valve for regulating the water supply
4. The main valve of the hydrant must be opened fully , to cover the barrel drains, and remain open until stoppage of work at the end of the day. The gate valve will be used to turn water on and off during the work day
5. No leakage is permissible
6. If hose or water streams will affect traffic or safety of the public, the applicant must notify the Village of Stamford and must also provide a flagman, if applicable
7. The applicant shall be financially responsible for any and all damage which may occur while using the hydrant. The cost of repairs shall be born by the applicant

---

I have read the above rules and applicable law regarding fire hydrant use and agree to abide and be bound by same.
