

A PFAS informational meeting will be held on October 1, 2025 at 5:30pm at the Stella Town Hall. This meeting will be to discuss drinking water and soil issues related to PFAS contamination. All Town of Stella residents with questions or concerns are encouraged to attend. If others from outside the Stella Community are interested in attending, they are welcome, but the focus will be on the community of Stella and the issues we face with PFAS in our drinking water and soils. Attendance will include the USEPA, WDNR, WDHS, and the Oneida County Health Dept. These agencies will be available to provide updates on PFAS issues related to drinking water, contaminated wells, health issues, soil contamination and cleanup, and various other PFAS related issues.

**This meeting will focus on drinking water and soil. If you have question about the health advisories issued on September 4, 2025, there may be time at the end of the meeting, if the DHS and DNR staff are available to stay, for questions about this subject. There are no guarantees this will be possible and questions regarding these issues asked during the water and soil discussions will be deferred to the end of the Stella Community meeting.**

**If there are questions about the meeting and subjects to be discussed send emails to chair@townofstella.com.**
