Narrative and Information Section

2018 AUTHORITY BUDGET MESSAGE & ANALYSIS

Borough of Buena Municipal Utilities Authority

FISCAL YEAR: FROM: January 1 2018 TO:

December 31,
2018

Answer all questions below. Attach additional pages and schedules as needed.

1. Complete a brief statement on the 2018 proposed Annual Budget and make comparison to the 2017 adopted budget for each operation. Explain any variances over +/-10% (**As shown on budget page F-4 explain the reason for changes for each appropriation changing more than 10%**) for each line item by operation. Explanations of variances should include a description of the reason for the increase/decrease in the budgeted line item, not just an indication of the amount and percent of the change. Attach any supporting documentation that will help to explain the reason for the increase/decrease in the budgeted line item. For example, if anticipated service charges have increased 15% due to an increase in rates, provide a copy of the resolution authorizing the rate increase. The Water Operations Budget reflects an overall increase of \$25,987(2.67%) and the Sewer Operations Budget reflects a

\$1,961(>1%) decrease. Individual increases/decreases contributing to the overall increases are listed on the following page (N-1a)

2. Complete a brief statement on the impact the proposed Annual Budget will have on Anticipated Revenues, especially service charges and on the general purpose/component unit financial statements. Explain significant increases or decreases, if any. An increase or decrease is considered significant if it is over +/-10% (**As shown on budget page F-2 explain reason for change for each revenue changing more than 10%**) from the current year adopted budget. The

Proposed budgets will have no impact on Anticipated Revenues which decreased slightly as a result of anticipated fewer new connections. The Budgets utilize Unrestricted Net Position to maintain stable rates.

Revenue from new connections has been reduced from 5 to 2 new homes.

3. Describe the state of the local/regional economy and how it may impact the proposed Annual Budget, including the planned Capital Budget/Program. As a result of a sluggish economy, minimal growth has been anticipated

4. Describe the reasons for utilizing Unrestricted Net Position in the proposed Annual Budget, i.e. rate stabilization, debt service reduction, to balance the budget, etc. If the Authority's budget anticipates a use of Unrestricted Net Position, this question must be answered. Unrestricted Net

Position is being used to stabilize rates and balance the budget and to provide for future Capital Improvements.

5. Identify any sources of funds transferred to the County/Municipality as a budget subsidy or a shared service and explain the reason for the transfer (i.e.: to balance the County/Municipality budget, etc.).

No amount has been requested by the Municipality for 2018

6. The proposed budget must not reflect an anticipated deficit from 2018 operations. If there exists an accumulated deficit from prior years' budgets (and funding is included in the proposed budget as a result of a prior deficit) explain the funding plan to eliminate said deficit (N.J.S.A. 40A:5A-12). If the Authority has a net deficit reported in its most recent audit, it must provide a deficit reduction plan in response to this question. (**Prepare a response to deficits caused by the implementation of GASB 68**) The Deficits reflected in the 2017 audit resulted from the Accrued Unfunded Pension Liability of \$782,922 and \$966,624 for the Water and

Sewer Operations respectively

7. Attach a schedule of the Authority's existing rate structure (connection fees, parking fees, service charges, etc.) **if it has been changed since the prior year budget submission** and a schedule of the proposed rate structure for the upcoming fiscal year. Explain any proposed changes in the rate structure and attach the resolution approving the change in the rate structure, if applicable. Not Applicable

REVISED SCHEDULE OF RATES
TO BE EFFECTIVE JANUARY 1, 2012

SCHEDULE I – RESIDENTIAL CLASSIFICATION

A. CHARGES FOR SEWER SERVICE ARE:

1. Annual Rate per Domestic Consumer Unit (DCU): \$ 545.00
2. All residential units shall pay an annual rate of \$545.00, regardless of whether said unit is occupied.

SCHEDULE II

A. FORMULA FOR CUSTOMERS OF BBMUA WHOSE SEWERAGE CHARGES ARE DETERMINED BY FLOW ONLY. (COMMERCIAL CLASSIFICATION)

The sewerage charge for customers billed on the basis of flow shall be determined by taking the average daily potable water flow in gallons, generated by that customer for the preceding quarter, as read by the BBMUA, and divided by a factor of 165 (165 gpd [gallon per day] represents the equivalent value of the daily consumption of the domestic consumer unit). The calculated number of DCU's X \$545.00 annual rate equals the sewerage charge. This formula equals the total charge to the customer. The BBMUA will use the customers' water meter reading to calculate the sewer usage of said customer. The only exception to using the water meter to calculate sewer usage is if there is an approved sewer meter in place. All customers pay a minimum charge of one unit.

B. FORMULA FOR CUSTOMERS OF THE BBMUA WHOSE SEWERAGE CHARGES ARE DETERMINED BY FLOW AND STRENGTH. (Industrial Classification)

The "Industrial" classification will be given to the customers of the BBMUA who are given the industrial classification by New Jersey Department of Environmental Protection.

The sewerage charge for customers of the BBMUA whose charges are determined by both flow and strength shall be based upon the number of actual domestic consumer units subject to the above-mentioned flow formula, times an excess charge, using the strength formula times the current rate for domestic consumer unit. The strength formula shall be:

$$\frac{.40 \times (\text{BOD in ppm})}{(300)} + \frac{.40 \times (\text{TSS in ppm})}{(300)} + \frac{.20 \times (\text{TKN in ppm})}{(40)}$$

In any instance where the application of this formula includes a parameter of less than 300 Mg/L in BOD or less than 300 Mg/L in TSS or less than 40 Mg/L in TKN, the value in the parenthesis of the foregoing formula shall always be equal to a factor of 1.

In all cases where effluent characteristics are shown by actual testing to contain excessively high loadings with respect to parameters other than BOD, TSS or TKN, the BBMUA shall have the right, privilege and ability to expand the foregoing strength factor formula to incorporate these other characteristics in the equation.

Sampling for strength shall be performed by each customer utilizing the services of a certified laboratory in each of the months of February, May, August and November of each calendar year. The results of all tests so taken shall be supplied to the BBMUA within thirty (30) days and shall include analyses of BOD, TSS and TKN, along with such other parameters as the BBMUA shall identify from time to time.

C. FORMULA FOR COMMERCIAL AND INDUSTRIAL CUSTOMERS WHO CHOOSE TO IRRIGATE

If a customer of the BBMUA chooses to irrigate, said customer will have the option to install a second meter so that the calculated amount of irrigation can be deducted from the main meter for sewer usage.

SCHEDULE III

A. THE CHARGE FOR SEPTAGE TREATMENT SHALL BE AS FOLLOWS:

1. Customers hauling septage for treatment in an amount of 0 to 200,000 gallons per month shall be charged a rate of \$.05 per gallon.
2. Customers hauling septage for treatment in excess of 200,000 gallons per month shall be charged a rate of \$.04 per gallon.

The above rates shall become effective on August 1, 2011

SCHEDULE IV

- A. Connection Fee: \$3,500.00
(Not including all state and county utility road
opening permit fees and expenses as may be necessary)
1. Residential = minimum one domestic consumer unit per residence (one domestic consumer unit = 165 gallons per day)
 2. Commercial = Based on the BBMUA's engineers estimate of flow in gallons per day divided by one domestic consumer unit (165 gallons per day)
 3. Industrial = Based on the BBMUA's engineers estimate of flow in gallons per day divided by one domestic consumer unit (165 gallons per day)

The BBMUA reserves the right to adjust the number of commercial and industrial connections if actual flows do not reflect original estimates.

METERED SERVICE RATES

The following shall be the rates at which the water will be furnished, and shall be a minimum charge for each consumer unit of \$254.00 per annum, as follows:

\$63.50 per quarter for the first 15,000 gallons or less.

For each 1,000 gallons or less over the 15,000 gallon minimum there shall be a charge of \$1.50.

For purposes of determining the minimum charge, a consumer unit is defined as a single family dwelling, an apartment, a single condominium, half of a duplex home. Each motel room and/or rented room with bathroom facility attached thereto shall be considered a half consumer unit. For purposes of billing, a commercial enterprise shall be considered as one unit.

The aforesaid metered charge shall include maintenance of meters and any repair or maintenance charges on meters, except for repairs made necessary by gross neglect of the consumer as hereinbefore mentioned.

All water services to a residential dwelling shall be 1 inch and the meter shall be a 3/4 inch meter. The cost of the installation from the curb line to the home with the exception of the meter shall be borne by the consumer.
