Township of Metomen
W12605 Sheldon Rd.
Brandon, WI 53919

Dear Sir/Madam,

Bug Tussel Wireless of Green Bay, WI is planning a project to expand telecommunications coverage near the town of Metomen over the next several months. The proposed project would require that we enter and perform new construction in the Metomen Township Road Right-of-Way.

The project will consist of placing new Fiber Optic Cables, conduit, and vaults in previously disturbed utility corridors and Right-of-Ways along a specific path within the Township. The Cables are to be placed at a minimum depth of 36" via plow in most areas. Where there are obstacles such as driveways, culverts, waterways, etc., cable will be placed by means of directional boring at a minimum depth of 48". There will not be any substantial amount of earth/soil movement during the construction process. All RUS approved procedures are to be observed, as well as all State and Local entity guidelines for permitting and construction practices to ensure there is little impact on the ROW land.

Enclosed are site maps showing the overall, and specific construction routes of the project within the township.

If you have any questions, concerns, or need more information, please contact me at (605) 254-1182 or by email at Zane.Brandt@farrtechnologies.com

Additionally, if during your review, you find an area that would require a permit or other permission to proceed, please let me know.

Respectfully,

Zane Brandt
