RE: Sump Pump Discharge to Leonard Point Road (STH 21 to Highland Shore Lane)

Dear Property Owner,

The Town of Algoma will be undertaking a storm sewer improvement project as part of the Leonard Point Road reconstruction project in 2028.

If you have an existing sump pump hose or pipe that discharges to the Leonard Point Road ditch we need your help to identify that hose/pipe location. Please notify the town and you will be provided with a painted wooden lath to place at the location where your sump pump discharges into the ditch.

To request a lath contact Jason Loduha at (920) 235-3789 or publicworks@townofalgoma.org. **We will need to have the discharge point identified and the lath in place by June 1, 2026** for the project surveyors.

Also, a reminder that the survey crew is also placing stakes for the new right of way limits in early May. Once the stakes are placed, please do not move/disturb them.

We appreciate your cooperation during this project. If you have any questions, please contact me at (920) 235-3789 or publicworks@townofalgoma.org.

Sincerely,

A handwritten signature in blue ink that reads "Jason Loduha". The signature is fluid and cursive, with the first name being the most prominent.

Jason Loduha
Public Works Director
