Good morning, colleagues,

We have received resubmittals for DSRFY2024-0018 Ozzy's Car. You can view them at the [link](#).

As a reminder, I have included below the requirements of the last consultation on January 6th.

Required Changes/Updates

- a. Clarify materials and colors on elevations, particularly horizontal siding (**The horizontal metal siding is noted as Slate Gray, yet there is not a sample of the "Slate Gray" metal panel**)
- b. Remove references to pre-engineered buildings from drawings
- c. Ensure that at least 15% of the first-floor façade visible from a public street includes windows, showcases, displays, or pedestrian access elements to meet the requirement. (**Staff to verify compliance**)
- d. Address pedestrian amenities along 42nd Street. (**It is not evident if there are any site furnishings included. A list of the amenities provided should be clarified on the drawings**)
- e. Relocate trash enclosure from alley to internal site
- f. Verify site triangle compliance at building corner
- g. Add terminal view feature at the end of the driveway (**Not addressed in resubmittal docs**)
- h. Update fencing plans to show:
 - Existing vs new fencing
 - Reference to approved CUP requirements
- i. Clarify the curb requirements along Stockton Street

Let me know if you have any comments.

Thank you!

Mariia Antonova
