Affidavit of Legal Interest

Dear Hannah,

The City of Garden City is requiring an Affidavit of Legal Interest for the Conditional Use Permit and Design Review permit applications for the proposed modifications at 8247 W. State Street, Garden City, ID (the “**Subject Property**”).

Attached hereto is the Affidavit of Legal Interest signed by Global Signal Acquisitions IV LLC appointing GMA Network Services as authorized representative to submit for permits (see **page 2** of this document).

The prior owner, Blynn Properties LLC (“**Blynn**”) signed a Wireless Communication Easement and Assignment Agreement dated August 18, 2010, with Unison, for a Communication Easement, which includes the Existing Agreements (as defined therein), for the property at 8247 W. State Street, Garden City, ID.

Blynn signed that First Amendment to Wireless Communication Easement and Assignment Agreement with Ulysses (as defined therein), which is successor-in-interest to Unison, dated March 16, 2016 (“**First Amendment**”) that appointed Ulysses as its Attorney-in-Fact, and which was executed by Robert Milter of Blynn. The First Amendment, Section 5, stipulates as follows:

Attorney-in-fact. *Site Owner hereby confirms, ratifies, acknowledges and affirms that pursuant to the Agreement, it irrevocably appointed Ulysses as its true and lawful attorney-in-fact, with full power of substitution and re-substitution, to apply for and obtain any and all licenses, permits, consents or approvals which may be required in connection with the use of the Easements by Ulysses and as necessary to comply with applicable laws, statutes or regulations as set forth in Section 5 of the Agreement.*

Further, under the Assignment and Assumption of Easement Agreement dated October 3, 2019 (“**Easement**”), Ulysses assigned its respective interest in the Communication Easement, which affects that property previously owned by Blynn and now owned by DBII LLC via that vesting deed in 2020, to Global Signal Acquisitions IV LLC (“**Global**”). The Easement transferred the rights to act as Attorney-in-Fact per Section 5 of the First Amendment to Global.

ASSIGNMENT AND ASSUMPTION OF EASEMENT AGREEMENT

This Assignment and Assumption of Easement Agreement (this "**Assignment**") is made and entered into as of the 3 day of October, 2019, but effective as of the 31st day of October, 2019 (the "**Effective Date**") by and between **Ulysses Asset Sub II, LLC**, a Delaware limited liability company, f/k/a T6 Unison Site Management LLC, a Delaware limited liability company (the "**Assignor**"), and **Global Signal Acquisitions IV LLC**, a Delaware limited liability company (the "**Assignee**"). Assignor and Assignee are sometimes referred to herein individually as a "**Party**" and collectively referred to herein as the "**Parties**".

WHEREAS, Assignor and Assignee are parties to that certain Site Exchange Agreement dated November 7, 2016, as amended by that certain Amended and Restated Site Exchange Agreement dated as of March 6, 2017 (as the same may have been further amended from time to time, collectively, the "**Exchange Agreement**"), pursuant to, and upon the terms of which, Assignor and Assignee have agreed to assign, transfer and convey all of their respective right, title and interest in and to certain assets, including, without limitation, real property interests, to each other, and to transfer certain obligations related thereto, all as more particularly described in the Exchange Agreement; and

WHEREAS, Assignor is the grantee pursuant to that certain easement agreement described on **Exhibit A** attached hereto and by this reference incorporated herein (as the same may have been

amended, modified or assigned from time to time, collectively, the "**Easement Agreement**", and together with any hereinbelow described Net Profits Agreement, Letter Agreement and Ground Lease, as applicable, the "**Easement Documents**"), pursuant to which the grantor specified in **Exhibit A** (hereinafter, the "**Grantor**") granted and conveyed to Assignor an easement in, to, under and over a certain portion of real property owned by the Grantor (the real property owned by the Grantor, hereinafter, the "**Property**", which Property is more particularly described in **Exhibit A-1** attached hereto and by this reference incorporated herein; and such portion of the Property subject to the Easement Agreement, hereinafter, the "**Easement Area**", which Easement Area is more particularly described in **Exhibit B** attached hereto and by this reference incorporated herein); and

WHEREAS, Assignor is also the current landlord under that certain lease agreement described on **Exhibit C** attached hereto and by this reference incorporated herein (as the same may have been amended, modified or assigned from time to time, collectively, the "**Ground Lease**"), and which Ground Lease demises a portion of the Property; and

WHEREAS, Assignor is also party to that certain Net Profits Agreement dated August 19, 2010 by and between Assignor and the Grantor (as the same may have been amended, modified or assigned from time to time, collectively the "**Net Profits Agreement**");

WHEREAS, the Parties hereby desire to effect such assignments, transfers and assumptions;

NOW, THEREFORE, in consideration of the representations, warranties, covenants and agreements contained in the Exchange Agreement, the Parties hereto hereby agree as follows:

1. **Capitalized Terms.** Capitalized terms used but not defined herein shall have the meaning given to such terms in the Exchange Agreement.
2. **Assignment and Transfer of Easement Documents.** As of the Effective Date, Assignor hereby assigns and transfers unto Assignee, and Assignee hereby accepts from the Assignor, all of the right, title and interest of Assignor in, to and under the Easement Documents, upon the terms and subject to the conditions of the Exchange Agreement and the Easement Documents, respectively. Notwithstanding anything in this Assignment to the contrary, but without limiting any of the Parties' duties and obligations arising under this Assignment, this Assignment shall not constitute an assignment or transfer hereby of any right, title and interest of Assignor in, to and under an Easement Document if an attempted assignment or transfer, without the authorization of a third party thereto, would constitute a breach or violation of such Easement Document, or in any way adversely affect the rights of Assignee thereunder, but only to the extent such authorization has not been obtained. If any authorization described in the preceding sentence is not obtained, or if any attempt at an assignment, transfer or other conveyance thereof would be ineffective or would affect the rights of the Assignor thereunder so that, after the applicable Closing Date, the Assignee would not in fact receive all such rights or obtain the benefits and rights contemplated by this Assignment and the Exchange Agreement, then the

Assignee may elect to pursue certain options, as more particularly described in Section 2(c) of the Exchange Agreement.

3. **Assumption of Easement Documents.** As of the Effective Date, Assignor hereby assigns and transfers to Assignee, and Assignee assumes and agrees to keep, observe and perform all of the terms, covenants, agreements, conditions and obligations (other than Pre-Closing Liabilities), pursuant to the Easement Documents. The Assignee assumes and agrees to keep, observe and perform those terms, covenants, agreements, conditions and obligations (other than Pre-Closing Liabilities), with the same force and effect as if the Assignee instead of Assignor (or any predecessor of the Assignor) had originally signed the Easement Documents.
4. **Terms of Exchange Agreement Control.** The provisions of this Assignment are subject, in all respects, to the terms and conditions of the Exchange Agreement, including, without limitation, all of the covenants, agreements, representations, and warranties contained therein, which shall survive the execution and delivery of this Assignment to the extent provided in the Exchange Agreement. Neither the making nor the acceptance of this Assignment shall in any way supersede, modify, replace, amend, change, rescind, waive, exceed, expand, enlarge, or in any way affect the terms and conditions of the Exchange Agreement. In the event of any conflict or inconsistency between the terms and conditions of this Assignment and the terms and conditions of the Exchange Agreement, the terms and conditions of the Exchange Agreement shall control.
5. **Amendments.** This Assignment may not be amended, modified or terminated except by an instrument in writing executed by the parties to this Assignment.
6. **Interpretation and Construction.** This Assignment shall be subject to the provisions set forth in Sections 30(g) and 30(h) of the Exchange Agreement, except to the extent that any contrary or different terms are set forth herein.
7. **Successors and Assigns.** This Assignment shall inure to the benefit of and be binding upon Assignor, Assignee, and their respective successors and assigns. Except as permitted under Section 30(d) of the Exchange Agreement, no Party may transfer or assign this Assignment or any of its rights hereunder, without the prior written consent of the other Party. Notwithstanding the foregoing, a Party may assign this Assignment to an Affiliate or to a party acquiring such Party or all or substantially all of the assets of such Party, provided, however, that the terms of any such acquisition may not impair, in any substantive way, either Party's ability to perform this Assignment.

8. **Notice.** All notices must be in writing and shall be valid upon receipt when delivered by hand, by nationally recognized courier service, or by First Class United States Mail, certified, return receipt requested to the addresses set forth below:

State Street, Garden City, Idaho 83714 ("Site Owner"), Treasure Valley Collision Center L.L.C. whose address is 8247 West State Street, Boise, Idaho 83714 ("Joinder Party"), and T6 Unison Site Management LLC, a Delaware limited liability company, whose address is P.O. Box 1951, Frederick, Maryland 21702-0951 ("Unison"). All references hereafter to "Unison", "Site Owner" and "Joinder Party" shall include their respective heirs, successors, personal representatives, lessees, licensees and assigns (Unison and Site Owner, collectively, "Parties").

RECITALS

WHEREAS, Site Owner is the owner of that certain property ("Property") located in the City of Garden City, and County of Ada in the State of Idaho, having a street address of 8247 W. State Street, Garden City, Idaho 83714, and which Property is more particularly described on Exhibit A attached hereto.

NOW, THEREFORE, for and in consideration of the sum of Ten and No/100 Dollars and other good and valuable consideration, the receipt and sufficiency of which Site Owner does hereby acknowledge and grant Unison full discharge and acquittance therefor, Site Owner and Unison agree to the following:

1. Grant of Easement.

(a) Site Owner grants, bargains, sells, transfers and conveys to Unison:

- (i) an exclusive easement in, to, under and over the portion of the Property substantially as shown and/or described on Exhibit B-1 ("Communication Easement") for the transmission and reception of any and all wireless communication signals and the construction, maintenance, repair, replacement, improvement, operation and removal of towers, antennas, buildings, fences, gates, generators and related facilities

(collectively, "Facilities") and any related activities and uses including those necessary for Unison to comply with its obligations under the agreements listed on Exhibit C ("Existing Agreements") together with the right to enter the Property and access the Easements described below, without notice to Site Owner, twenty-four (24) hours a day, seven (7) days a week, as may be required in connection with the activities and uses described in this Agreement, and

(ii) a non-exclusive easement in, to, under and over portions of the Property substantially as shown and/or described on Exhibit B-2 ("Access and Utility Easements," Communication Easement and Access and Utility Easements, collectively "Easements") for ingress and egress to and from the Communication Easement and a publicly dedicated roadway, and for the installation, repair, replacement, improvement, maintenance and removal of utilities providing service to the Communication Easement and the Facilities, and any related activities and uses.

- (b) The Parties agree that the Communication Easement includes, without limitation, (i) the portion of the Property leased by Site Owner under the Existing Agreements, plus an additional 20.00 feet by 20.00 feet adjoining the westerly line of the area leased under the Existing Agreements and (ii) the portion of the Property upon which any Facilities are located on the Effective Date.

2. Assignment of Existing Agreements. Site Owner transfers and assigns to Unison, as of the Effective Date, all of its right, title and interest in, to and under the Existing Agreements, including without limitation, all rents, security deposits and other monies due the Site Owner specified therein. The Parties intend that this Agreement serve as an absolute assignment and transfer to Unison of all rents and other monies due the Site Owner pursuant to the Existing Agreements. Unison assumes the obligations and liabilities of Site Owner under the Existing Agreements only to the extent that such obligations and liabilities (i) are not the responsibility of the Site Owner pursuant to the terms of this Agreement; and (ii) accrue on or after the Effective Date.

3. Use of Easements. Consistent with the uses set forth in Section 1 above, Unison shall have the unrestricted right to lease, license, transfer or assign, in whole or in part, or permit the use of the Easements and/or its rights under this Agreement by any third parties including communication service providers or tower owners or operators, and any lessee or licensee under the Existing Agreements and the affiliates, agents, contractors, invitees and employees of Unison and/or Unison's present or future lessees or licensees (collectively, "Customers").

4. Term. This Agreement and the Easements shall be perpetual commencing on the Effective Date. Notwithstanding the foregoing, in the event Unison and Customers voluntarily cease to use the Easements (as defined in Section 1) for a period of more than five years (for reasons other than casualty, condemnation or Act of God), the Easements shall be deemed surrendered. Unison may surrender the Easements for any reason or at any time by giving thirty (30) days' notice to Site Owner. Upon surrender, this Agreement shall be terminated, and Unison and Site Owner shall execute and record such documents reasonably required to terminate the Easements. This Agreement may not be terminated by Site Owner.

5. Improvements; Utilities. Unison and its Customers, may, at their discretion and expense, construct such improvements in, to, under and over the Easements, consistent with the uses specified in Section 1, all of which shall be deemed part of the Facilities. The Facilities shall remain the property of Unison and its Customers, as applicable, and Site Owner shall possess no right, title or interest therein. In the event that utilities necessary to serve the Facilities cannot be installed within the Easements, Site Owner agrees to cooperate (at no cost to Site Owner) with Unison and to act reasonably and in good faith in granting Unison the right to locate such utilities on the Property without requiring the payment of additional fees. If necessary, Site Owner shall, upon Unison's request, execute and record a separate written easement with Unison or with the utility company providing the utility service to reflect such right. Site Owner hereby irrevocably constitutes and appoints Unison as its true and lawful attorney-in-fact, with full power of substitution and resubstitution, to apply for and obtain any and all licenses, permits, consents or approvals which may be required in connection with the use of the Easements by Unison and as necessary to comply with applicable laws, statutes or regulations.

6. Taxes. Site Owner acknowledges that a portion of the purchase price delivered by Unison to Site Owner is for and in consideration of the continuing obligation of Site Owner to pay, on or before the due date, all present and future real property taxes, transfer taxes, penalties, interest, roll-back or additional taxes, sales and use taxes and all other

fees and assessments, regardless of the taxing method (the "Taxes") attributable to the Property, this Agreement and the Easements. Without limiting the foregoing, except to the extent Taxes are the obligation of tenants under the Existing Agreements, Site Owner shall be solely responsible for the payment of such Taxes. Within ten (10) days of receiving a request from Unison, Site Owner shall furnish to Unison a copy of each bill for any such Taxes and evidence of Site Owner's payment of such bill. In the event that Site Owner fails to pay any Taxes when due, Unison shall have the right, but not the obligation, to pay such Taxes on behalf of Site Owner. Site Owner shall reimburse Unison for the full amount of such Taxes paid by Unison on Site Owner's behalf within five (5) business days of Site Owner's receipt of an invoice from Unison.

7. Property Maintenance and Access. Site Owner agrees to maintain the Property. Without limiting the foregoing, except to the extent maintenance is the obligation of tenants under the Existing Agreements, Site Owner shall be solely responsible for the maintenance of the Property. Site Owner agrees to provide Unison and its Customers access to and from the Easements and all other space in the Property consistent with the grant of the Easements set forth in Section 1 above, twenty-four (24) hours a day, seven (7) days a week.

8. Representations; Other Covenants of Site Owner. 9. Environmental Covenants and Indemnity. Site Owner represents that it has not permitted or engaged in the use of, and has no knowledge of, any substance, chemical or waste (collectively "Substance") located on, under or about the Property that is identified as hazardous, toxic or dangerous in any applicable federal, state or local law or regulation. Neither Site Owner nor Unison will introduce or use any such Substance on, under or about the Property in violation of any applicable law or regulation. No underground storage tanks for petroleum or any other Substance, or underground piping or conduits, are or have previously been located on the Property, and no asbestos-containing insulation or products containing PCB or other Substances have been placed anywhere on the Property by Site Owner or, to Site Owner's knowledge, by any prior owner or user of the Property. Site Owner and Unison shall each defend, indemnify, protect and hold the other party harmless from and against all claims, costs, fines, judgments and liabilities, including attorney's fees and costs, arising out of or in connection with the presence, storage, use or disposal of any Substance on, under or about the Property caused by the acts, omissions or negligence of the indemnifying party and their respective agents, contractors and employees. The foregoing indemnity shall survive any termination of this Agreement.

10. General Indemnity. In addition to the Environmental Indemnity set forth above, Site Owner and Unison shall each indemnify, defend and hold the other harmless against any and all costs (including reasonable attorney's fees) and claims of liability or loss arising (a) due to the breach of any representation, warranty or covenant of such indemnifying party set forth herein; and (b) out of the use and/or occupancy of the Property and Easements by the indemnifying party. This indemnity shall not apply to any claims to the extent arising from the gross negligence or intentional misconduct of the indemnified party.

11. Assignment; Secured Parties. Unison has the unrestricted right to assign, mortgage or grant a security interest in all of Unison's interest in and to this Agreement and the Easements, and may assign this Agreement and the Easements to any such assignees, mortgagees or holders of security interests, including their successors and assigns ("Secured Party" or, collectively, "Secured Parties"). Site Owner agrees to notify Unison and Secured Parties (provided Unison has given Site Owner notice and contact information of Secured Parties) simultaneously of any default by Unison and give Secured Parties the same right to cure any default. If a termination, disaffirmation or rejection of this Agreement shall occur, pursuant to any laws (including any bankruptcy or insolvency laws), Site Owner will notify Secured Parties (provided Unison has given Site Owner notice and contact information of Secured Parties) promptly and Site Owner shall enter into a new easement agreement with any such Secured Party upon the same terms of this Agreement, without requiring the payment of any additional fees. If any Secured Party shall succeed to Unison's interest under this Agreement, such Secured Party shall have no obligation to cure and no liability for any defaults of Unison accruing prior to the date that such Secured Party succeeds to such interest. Site Owner will enter into modifications of this Agreement reasonably requested by any Secured Party. Site Owner hereby waives any and all lien rights it may have, statutory or otherwise, in and to the Easements and/or the Facilities or any portion thereof.

12. Estoppel Certificate. At any time during the term hereof, each party shall have the right to deliver to the other a statement of such party certifying: (i) that this Agreement is unmodified and in full force and effect (or, if there have been modifications, stating the modifications and that the modified Agreement is in full force and effect); (ii) whether or not, to the best knowledge of the responding party, the requesting party is in default in performance of any of its obligations under this Agreement, and, if so, specifying each such default; (iii) that there are no amounts due to the responding party from the requesting party; and (iv) any other information reasonably requested concerning this Agreement (the "Estoppel Certificate"). In the event the responding party fails to dispute the Estoppel Certificate by delivery to the requesting party of a notice specifying the nature and circumstances of any matter in the Estoppel Certificate that is disputed by the responding party within ten (10) days of receipt of the Estoppel Certificate, then all matters specified in the Estoppel Certificate shall be deemed true and correct, and the Estoppel Certificate shall thereafter be binding on the Parties, Secured Party or any party designated by the requesting party, and all of such parties may thereafter rely on the Estoppel Certificate as a conclusive statement of fact by the responding party as to the matters set forth therein.

13. Additional Customers. It is the intent of the Parties to encourage the addition of Customers to the Property throughout and after the term hereof. Site Owner hereby irrevocably constitutes and appoints Unison as its true and lawful attorney-in-fact, with full power of substitution and resubstitution to negotiate and consummate leases, licenses and/or other agreements of use with Customers having a duration beyond the term of this Agreement. Site Owner ratifies and acknowledges the right of Unison to enter into such agreements, and the Property and Site Owner will be bound by such agreements throughout and after the termination of this Agreement for any reason. Site Owner acknowledges that all such agreements entered into by Unison shall survive the termination of this Agreement for any reason. Site Owner agrees that it shall not, directly or indirectly, divert or solicit the business of any of Unison's Customers on behalf of itself or on behalf of any third party. Unison shall have a right of first refusal to acquire, on the same terms and conditions offered by or to a third party, any interest in the Property or any portion thereof being transferred by Site Owner for wireless communication purposes such as described in Section 1 above. Site Owner shall, prior to granting or transferring such interest, notify Unison with a copy of the offer including the price and terms thereof. The foregoing is a continuing right in favor of Unison and shall not be extinguished by Unison's exercise or non-exercise of such right on one or more occasions. Upon the grant or transfer of the Property, or any portion thereof, to a third party, Site Owner shall immediately notify Unison in writing of such grant or transfer, with the name and address of the purchaser.

14. Condemnation. In the event of any condemnation of the Easements in whole or in part, Unison shall be entitled to file claims against the condemning authority for, and to receive, the value of the portion of the Property so taken on which the Easements are located, business dislocation expenses and any other award or compensation to which Unison may be legally entitled. Site Owner hereby assigns to Unison any such claims and agrees that any claims made by Site Owner will not reduce the claims made by Unison.

15. Covenant Running with the Land. The provisions of and covenants contained in this Agreement shall run with the land and shall bind and inure to the benefit of the Parties and their respective successors, heirs and assigns.

16. Dispute Resolution.

(a) If Unison fails to perform any of its obligations under this Agreement, Site Owner agrees to notify Unison and any Secured Parties, provided Unison has given Site Owner notice and contact information of Secured Parties, in writing of any default by Unison, and to give Unison and/or any Secured Parties the right to cure any default within a period of not less than sixty (60) days from Unison's receipt of the written default notice. If Unison or any Secured Parties shall fail to cure any default in accordance with this Section, Site Owner agrees that its only remedies for such default shall be specific performance or damages. Any and all damages for which Site Owner may be compensated is limited to the actual damages of Site Owner and Unison's liability shall be limited to its interest in the Property. In the event that any dispute or claim arises that could impair the use or possession of the Facilities by Unison or its Customers, Unison shall have the right to seek injunctive relief, without the necessity of posting a bond.

(b) Except as set forth in Section 16(a), in the event of any dispute arising out of this Agreement, the following dispute resolution process shall be followed: (i) upon a party's written notice of dispute to the other party, an authorized representative of the Site Owner and Unison shall, through a good faith negotiation, attempt to settle a written resolution within thirty (30) days and (ii) if such negotiation attempts fail, the dispute shall be submitted by the parties to a mutually agreed upon arbitrator for a binding and final arbitration decision in accordance with the rules of the American Arbitration Association ("AAA") and using the Federal Rules of Evidence and Civil Procedure. In the event the parties are unable to mutually agree to an arbitrator, each party shall select their own arbitrator, and each such arbitrator shall thereafter mutually agree on a third arbitrator, and the majority decision by all such arbitrators shall be final and binding on the parties. Each party shall pay one-half of all arbitrator professional fees and the prevailing party, in any proceedings under this Section 16, shall be entitled to recover all costs incurred in connection therewith, including legal fees.

17. Notices. All notices, requests, demands and other communications hereunder shall be in writing and shall be deemed given one (1) business day after posting with a nationally recognized overnight courier service, or the earlier of receipt or ten (10) days after posting by registered or certified mail, return receipt requested, to the addresses of Site Owner and Unison set forth on the signature page. Either party may change its notice address by providing a new recipient name and address by notice as set forth in this paragraph.

18. Miscellaneous. (a) This Agreement and all Exhibits attached hereto constitute the entire agreement and understanding of Site Owner and Unison with respect to the subject matter of this Agreement, and supersedes all offers, negotiations and any other written or verbal agreements; (b) any amendments to this Agreement must be in writing and executed by both parties; (c) this Agreement is governed by the laws of the State in which the Property is located; (d) if any term of this Agreement is found to be void or invalid, such provision shall be fully severable herefrom and such invalidity shall not affect the remaining terms of this Agreement, which shall continue in full force and effect, and this Agreement shall be reformed and construed as if such invalid provision had never been contained herein, and if possible, such provisions shall be reformed to the maximum extent permitted under applicable law to render same valid, operative and enforceable to reflect the intent of the Parties as expressed herein; (e) upon the request of Unison, Site Owner shall execute a Memorandum of this Agreement and such plats or surveys as deemed reasonably necessary by Unison for recordation in the public records of the County in which the Property is located; (f) the paragraph headings of this Agreement have been inserted for convenience of reference only, and shall in no way modify or restrict the terms of this Agreement; (g) Site Owner acknowledges that Unison has not provided any legal or tax advice to Site Owner in connection with the execution of this instrument; and (h) this Agreement may be executed in any number of counterparts, each of which shall, when executed, be deemed to be an original and all of which shall be deemed to be one and the same instrument.

19. Joinder Party. And now to these presents, intervenes Treasure Valley Collision Center L.L.C., who joins with Site Owner in entering into this Agreement and does hereby agree to be bound by all of the terms hereof and joins Site Owner in granting the easement to Unison and assigns all of its right, title and interest in the Existing Agreements to Unison in all respects.

Subject: Compliance Statement and Statement of Intent

Dear Reviewing Parties:

AT&T is requesting conditional use permit and design review approval to expand a current legal non-conforming use in the C-2 zone pursuant to Garden City Code § 8-1B-3. The existing facility was lawfully established through Conditional Use Permit 03-17-CU by Garden City on December 17, 2003. Garden City subsequently amended allowed uses in the C-2 zone that excluded Wireless Communication Facilities.

This letter is submitted as the Compliance Statement and Statement of Intent in consideration of the requirement by Garden City for a conditional use permit application.

Request: Conditional Use Permit and design review to expand an existing legal non-conforming use, pursuant to Garden City Code 8-1B-3

Location: 8247 W. State St.
Garden City, Idaho 83714

Parcel #: R0719420250

Zoning: C-2 (General Commercial)

AT&T continues to expand and upgrade its wireless communication network to meet the public's demand for current and future technologies related to wireless services. The proposed installation includes installing antennas and ancillary equipment at the 90-foot level on the existing 119' monopole that currently exists. AT&T proposes to install associated ground equipment, including an 8' x 8' walk-in-cabinet and an emergency generator, within an expanded fenced compound. Detailed construction drawings are included with this application.

§ 8-1B-3 NONCONFORMING USES:

A. A nonconforming use may continue as long as the use remains lawful and is not abandoned, expanded, or extended, subject to the following provisions:

1. Nonconforming uses, structures, or portions thereof that have been declared dangerous and not abated or are a chronic public nuisance as defined by Garden City code shall lose their nonconforming status for failure to act.

Response: Not applicable as none of the aforementioned has been declared nor are they reasonably applicable to the facility.

2. No existing use or structure containing a nonconforming use may be expanded in intensity or degree of use, enlarged, extended, constructed, reconstructed, moved, or structurally altered except: (a) through the approval of a conditional use permit in accord with the procedures set forth in chapter 6, article B, "Specific Provisions", of this title; or (b) where the use of the structure is changed to a conforming use.

Response: Not applicable. The applicant and parties to the applicant (applicants) do not agree with Garden City staff's interpretation that the proposed collocation constitutes an expansion in intensity or degree of use, enlargement, or extension. The existing facility is a wireless facility that includes a tower and equipment compound. As such the proposed collocation does not change, enlarge or extend that use or facility. Additionally the proposed project is an Eligible Facilities Request. In order to move the project forward this application is submitted under protest in order to satisfy subsection (a) of this section. As such the applicants have not agreed the proposal is not an Eligible Facility nor waive any rights or remedy under Federal Law including associated Order(s).

3. A nonconforming use may be extended to occupy additional land area only through the approval of a conditional use permit in accordance with the procedures set forth in chapter 6, article B, "Specific Provisions", of this title.

Response: This conditional use permit application is submitted to satisfy City staff's interpretation and position for this subsection. The preceding response is incorporated by reference as it shares applicability to our position to this subsection as well.

4. The nonconforming use shall be deemed to be abandoned and shall not be reestablished if the use of the property is changed. Conducting activity of another use on the property, commencing utility service for another use, or approval of an application to change the use of a property shall be considered change of use.

Response: Not applicable. There is no proposed change of use.

B. A nonconforming use may be changed only to a conforming use.

Response: Not applicable. There is no proposed change of use.

C. If a nonconforming use has ceased for twelve (12) consecutive months and not declared the intent to continue the nonuse of the use or improvements designed for the use, as defined by Idaho Code section [67-6538](#) and approved Garden City procedures, or has been replaced with a conforming use, the nonconforming use shall be deemed abandoned and shall not be reestablished. If a nonconforming use has ceased for ten (10) consecutive years the nonconforming use shall be deemed abandoned and shall not be reestablished regardless of declaration to continue the nonuse of the use or improvements designed for the use.

Response: Not applicable. The legal non-conforming use has not ceased.

8-2C-46: **WIRELESS COMMUNICATION FACILITY:**

A. **Setback:**

1. A wireless communication facility shall not be located closer than five thousand two hundred eighty feet (5,280') (1 mile) from an existing cellular tower.

Response: Not applicable as a wireless communication facility as defined by the City's code is not proposed. § 8-7A-2 defines a Wireless Communication Facility as (a) steel monopole, guywire tower, lattice tower or other similar structure designed to support directional antennas, parabolic dishes or antennas, microwave dishes; in addition to associated ground equipment and other similar equipment used in the wireless communications industry. The proposed collocation of antennas are to be attached to an **existing** legal non-conforming Wireless Communication Facility.

2. *In addition to the setbacks required for the base zoning district as set forth in section 8-2B-3, table 8-2B-2, "Form Standards In All Base Zoning Districts", of this chapter, a support tower for a wireless communication facility shall be set back one foot (1') for every ten feet (10') of the total tower height.*

Response: Not applicable as a new support tower is not proposed.

3. *All equipment shelters, cabinets or other on ground ancillary structures shall meet the setback requirements of the zone.*

Response: AT&T proposes to expand the fenced area to accommodate its 8' x 8' walk in cabinet and an emergency generator, and the required minimum 5-foot setback to all property lines in the C-2 zone will be maintained.

- B. *Height: The maximum height, including all antenna attachments shall be one hundred feet (100') in the C-1 zone and one hundred twenty five feet (125') in the LI zone.*

Response: Not applicable as the existing facility is not within a C-1 or LI zone. As previously stated the proposed installation includes installing antennas and ancillary equipment at the 90-foot level on the existing 119' monopole that was legally established in 2003.

Further, § 8-2B-3 (E)(2) exempts maximum height limitations as follows: *The maximum height limitations shall not apply to the following: fire and hose tower; power line tower; water tank or tower; windmill; **wireless communication facility, or other commercial or personal tower and/or antenna structure; or other appurtenances** usually required to be placed above the level of the ground and not intended for human occupancy (emphasis added in bold.)*

- C. *Collocation: No new towers shall be allowed unless there has been an analysis certified by a qualified engineer and specific to the site that collocation on an existing wireless communication facility is infeasible. Evidence to demonstrate that no existing facility can accommodate the proposed new facility may consist of any of the following:*

1. *No existing towers or structures are located within the geographic area required to meet the proposed facility's requirements;*
2. *Existing structures are not of sufficient height to meet the engineering requirements of the proposed structure;*
3. *Existing structures do not have sufficient structural strength to support the proposed antenna and/or equipment; or*

4. *The proposed antenna would cause electromagnetic interference with the antenna on existing structures, or the antenna on the existing structure would cause similar interference with the proposed antenna.*

Response: Not applicable as a new tower is not proposed.

D. Site Design:

1. *Tower facilities shall be landscaped with a buffer outside the perimeter of the compound in accordance with the standards set forth in subsection 8-4I-5C of this title.*

Response: No impact or change to the existing combination of existing solid wood fence and existing landscaping previously installed to satisfy this condition, and the AT&T equipment will be screened with a fence that will match the existing fenced area.

2. *Materials, colors, textures and screening shall be used that blend the tower facility to the natural and built environment. Supporting electrical and mechanical equipment installed on the tower shall use colors that are similar to the tower.*

Response: Supporting electrical and mechanical equipment proposed for installation on the tower will match the materials, colors and textures of the existing electrical and mechanical equipment currently installed that includes colors that are similar to the tower.

3. *Except as required by the federal aviation administration (FAA) or the federal communications commission (FCC), transmission structures shall not be artificially lighted. Equipment shelters may use lighting consistent with the lighting standards set forth in section 8-4A-4, "Outdoor Lighting", of this title.*

Response: No new tower lighting is proposed as part of this application.

- E. *Site Maintenance: A wireless communication facility that is no longer in use shall be completely removed and the site restored to its preexisting condition within six (6) months of the cessation of operation.*

Response: The proposed wireless communication facility will be removed within six months of the cessation of operation to the extent that any conflicting law or right that may conflict including legal remedy(s) is not waived should this unlikely event occur.

- F. *Other Regulations Apply: The site and structure design shall be subject to review by the design committee and the process set forth in section 8-6B-3 of this title. (Ord. 898-08, 9-8-2008; and. Ord. 944-12, 5-14-2012)*

Response: This section is recognized not withstanding pre-emptive law and ruling under the Middle Class Tax Relief and Job Creation Act of 2012, Pub. L. No. 112-96, § 6409 (2012) and subsequent FCC Infrastructure Orders.

Conclusion

Thank you in advance for your prompt review and approval of this application.

Sincerely,

Gary Abrahams

Dear Hannah,

On behalf of New Cingular Wireless PCS, LLC (“AT&T Mobility” or “Applicant”), Crown Castle USA Inc. (“Crown Castle”) is pleased to submit this request to modify the existing wireless facility noted above through the collocation, replacement and/or removal of the Applicant’s equipment as an eligible facilities request for a minor modification under Section 6409¹ and the rules of the Federal Communications Commission (“FCC”).²

Section 6409 mandates that state and local governments must approve any eligible facilities request for the modification of an existing wireless tower or base station that does not substantially change the physical dimensions of such tower or base station. Under Section 6409, to toll the review period, if the reviewing authority determines that the application is incomplete, it must provide written notice to the applicant within 30 days, which clearly and specifically delineates all missing documents or information reasonably related to whether the request meets the federal requirements.³ Additionally, if a state or local government, fails to issue any approvals required for this request within 60 days, these approvals are deemed granted. The FCC has clarified that the 30-day and 60-day deadlines begins when an applicant: (1) takes the first step required under state or local law; and (2) submits information sufficient to inform the jurisdiction that this modification qualifies under the federal law⁴. Please note that with the submission of this letter and enclosed items, the thirty and sixty-day review periods have started. Based on this filing, the deadline for written notice of incomplete application is November 6, 2022, and the deadline for issuance of approval is December 6, 2022.

The proposed scope of work for this project includes:

Add or replace antennas, ancillary equipment and ground equipment as per plans for an existing carrier on an existing wireless communication facility.

At the end of this letter is a checklist of the applicable substantial change criteria under Section 6409. Additionally, please find enclosed the following information in support of this request:

- (1) Eligible Facilities Request Cover Letter and narrative (see this document), with **Attachment “A,”** Section 6409 Substantial Change Checklist, and **Exhibit “B,”** Proposed Scope of Work, **Exhibit “C,”** Photo of subject site; **Exhibit “D,”** Location map; and **Exhibit “E,”** Crown Castle authorization to submit permit applications;
- (2) City of Garden City Conditional Use Permit application form;
- (3) Compliance Statement and Statement of Intent;
- (4) Neighborhood Map;
- (5) Site Plan;
- (6) Construction drawings prepared by Telcyte dated 2/18/2022;
- (7) Photos of the site (in lieu of landscaping plan);
- (8) Neighborhood Meeting verification – meeting held on September 13, 2022, including list of mailing labels (addresses) the notice was sent to and a copy of the community meeting notice;
- (9) Affidavit of Legal Interest;
- (10) Structural Calculations prepared by Morrison Hershfield dated 12/16/2021;
- (11) Ada County assessor information; and
- (12) Warranty Deed.

As these documents indicate, (i) the modification involves the collocation, removal or replacement of transmission equipment; and (ii) such modification will not substantially change the physical dimensions of such tower or base station. As such, it is an “eligible facilities request” as defined in the FCC’s rules to which the 60-day deadline for approval applies. Accordingly, Applicant requests all authorization necessary for this proposed minor modification under Section 6409.

**Section 6409 Substantial Change Checklist
Towers Outside of the Public Right of Way**

The Federal Communications Commission has determined that a modification substantially changes the physical dimension of a wireless tower or base station under 47 U.S.C. § 1455(a) if it meets one of six enumerated criteria under 47 C.F.R. § 1.6100.

Criteria for Towers Outside the Public Rights of Way

YES/NO NO	Does the modification increase the height of the tower by more than the greater of: (a) 10% (b) or, the height of an additional antenna array plus separation of up to 20 feet from the top of the nearest existing antenna?
YES/NO NO	Does the modification add an appurtenance to the body of the tower that would protrude from the edge of the tower more than 20 feet or more than the width of the tower structure at the level of the appurtenance, whichever is greater?
YES/NO NO	Does the modification involve the installation of more than the standard number of new equipment cabinets for the technology involved or add more than four new equipment cabinets?
YES/NO NO	Does the modification entail any excavation or deployment outside the current site by more than 30 feet in any direction, not including any access or utility easements?
YES/NO NO	Does the modification defeat the concealment elements of the eligible support structure?
YES/NO NO	Does the modification violate conditions associated with the siting approval with the prior approval the tower or base station other than as specified in 47 C.F.R. § 1.6100(c)(7)(i) – (iv)?

If all questions in the above section are answered "NO," then the modification does not constitute a substantial change to the existing tower under 47 C.F.R. § 1.6100.

DIRECT BURIAL

BASE PLATE LAYOUT

A detailed cross-section diagram of a trench installation. The diagram shows a trench cut into the ground. The top layer is labeled 'FINISHED GRADE, AC PAVING MATCH SLOPE AND THICKNESS OF EXISTING'. Below this is a layer of 'UNDISTURBED' material. The trench itself is filled with 'COMPACTED BACKFILL PER SITEWORK SPECIFICATIONS'. A 'FIBER CONDUIT' is shown running horizontally through the backfill. A 'POWER CONDUIT' is shown running vertically through the backfill. A 'UTILITY WARNING TAPE' is shown running horizontally below the backfill. The trench is labeled 'TRENCH'. Dimensions are given: '3'-0" MIN.' for the depth of the trench, '2'-0"' for the width of the trench, '4"' for the depth of the backfill, '6" MIN. (TYP.)' for the width of the trench, and '4" MIN TO SECONDARY ELECTRIC 12" MIN TO PRIMARY ELECTRIC' for the distance from the trench to the primary and secondary electric lines. A box in the top right corner contains the text: 'PULL BOXES AND CONDUIT INSTALLED PER LOCAL UTILITY REQUIREMENTS'.

3.1) Analysis Method

tnxTower (version 8.1.1.0), a commercially available analysis software package, was used to create a three-dimensional model of the tower and calculate member stresses for various loading cases. Selected output from the analysis is included in Appendix A. When applicable, Crown Castle has calculated and provided the effective area for panel antennas using approved methods following the intent of the TIA-222 standard.

3.2) Assumptions

- 1) Tower and structures were maintained in accordance with the TIA-222 Standard.
- 2) The configuration of antennas, transmission cables, mounts and other appurtenances are as specified in Tables 1 and 2 and the referenced drawings.

This analysis may be affected if any assumptions are not valid or have been made in error. Morrison Hershfield should be notified to determine the effect on the structural integrity of the tower.

4) ANALYSIS RESULTS

4.1) Recommendations

The tower and its foundation have sufficient capacity to carry the proposed load configuration. No modifications are required at this time.

Tower Input Data

The tower is a monopole.

This tower is designed using the TIA-222-H standard.

The following design criteria apply:

Tower base elevation above sea level: 2605.00 ft.

Basic wind speed of 102 mph.

Risk Category II.

Exposure Category C.

Simplified Topographic Factor Procedure for wind speed-up calculations is used.

Topographic Category: 1.

Crest Height: 0.00 ft.

Deflections calculated using a wind speed of 60 mph.

A non-linear (P-delta) analysis was used.

Pressures are calculated at each section.

Stress ratio used in pole design is 1.

Tower analysis based on target reliabilities in accordance with Annex S.

Load Modification Factors used: $K_{es}(F_w) = 0.95$.

Maximum demand-capacity ratio is: 1.05.

Local bending stresses due to climbing loads, feed line supports, and appurtenance mounts are not considered.

Value provided is 3-second gust wind speeds at 33 ft above ground for Exposure C Category, based on linear interpolation between contours. Wind speeds are interpolated in accordance with the 7-16 Standard. Wind speeds correspond to approximately a 7% probability of exceedance in 50 years (annual exceedance probability = 0.00143, MRI = 700 years).

Site is not in a hurricane-prone region as defined in ASCE/SEI 7-16 Section 26.2.

Ice thicknesses on structures in exposed locations at elevations higher than the surrounding terrain and in valleys and gorges may exceed the mapped values.

Values provided are equivalent radial ice thicknesses due to freezing rain with concurrent 3-second gust speeds, for a 500-year mean recurrence interval, and temperatures concurrent with ice thicknesses due to freezing rain. Thicknesses for ice accretions caused by other sources shall be obtained from local meteorological studies. Ice thicknesses in exposed locations at elevations higher than the surrounding terrain and in valleys and gorges may exceed the mapped values.
